HUION KD100 Mini Keydial Shortcut Remote Controller

Product Overview

Thanks for choosing HUION mini Keydial KD100. This is a first generation of professional mini keyboard, which can greatly improve your work efficiency of painting and creation, and full of fun. You can freely define the function of the button, which brings you a real shock experience.

To give you a better understanding and using of your keyboard, please read this user manual carefully. The user

manual only shows the information under Windows, unless otherwise specified, this information applies to both Windows and Mac systems.

Note: The pictures in the User Manual are for reference only.

Accessories

After unboxing your package, make sure that you have the following items:

- Mini Keydial*1
- USB Cable*1
- Wireless Receiver*1
- Quick Start Guide*1

Product Connection

The product supports two ways of wired connection and wireless connection, please choose these ways to connect according to the usage.

Wired Connection

Connect the tablet to your computer with USB cable. Please follow the steps below:

1. Take out the USB cable from the package, then connect Keydial to your computer.
2. Please download the Keydial Driver from our website: Driver-KD100. Besides, you don't need to download the driver anymore if you already installed the other display or tablet driver(V15). They can work together with one driver.
3. Open the driver interface, the device picture will be displayed on the interface, indicating that the tablet is successfully connected to the computer. You can start use the tablet.

Wireless connection

Please follow the steps below:

1. Insert the wireless receiver to your computer.
2. Switch the power button on to power on the Keydial.
3. Not using 15 mins, the tablet will enter sleep mode. In this case, you need to switch the power button on again to wake the tablet up.

LED Light

You can judge the working status of the product by observing the color of the light.

1. Blue light: Working
2. Flash red light: Low battery
3. Red light: Charging
4. Green light: Charged
5. Flash blue light: Standby
6. Light off: Off state

Driver

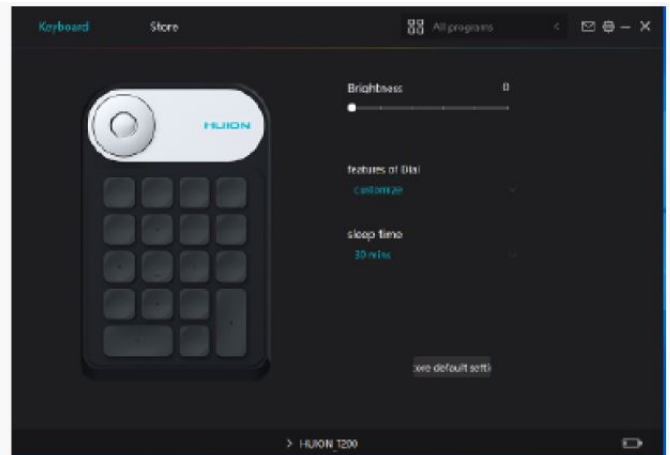

Install Driver

Please download the driver from our website: [Driver-KD100](#)

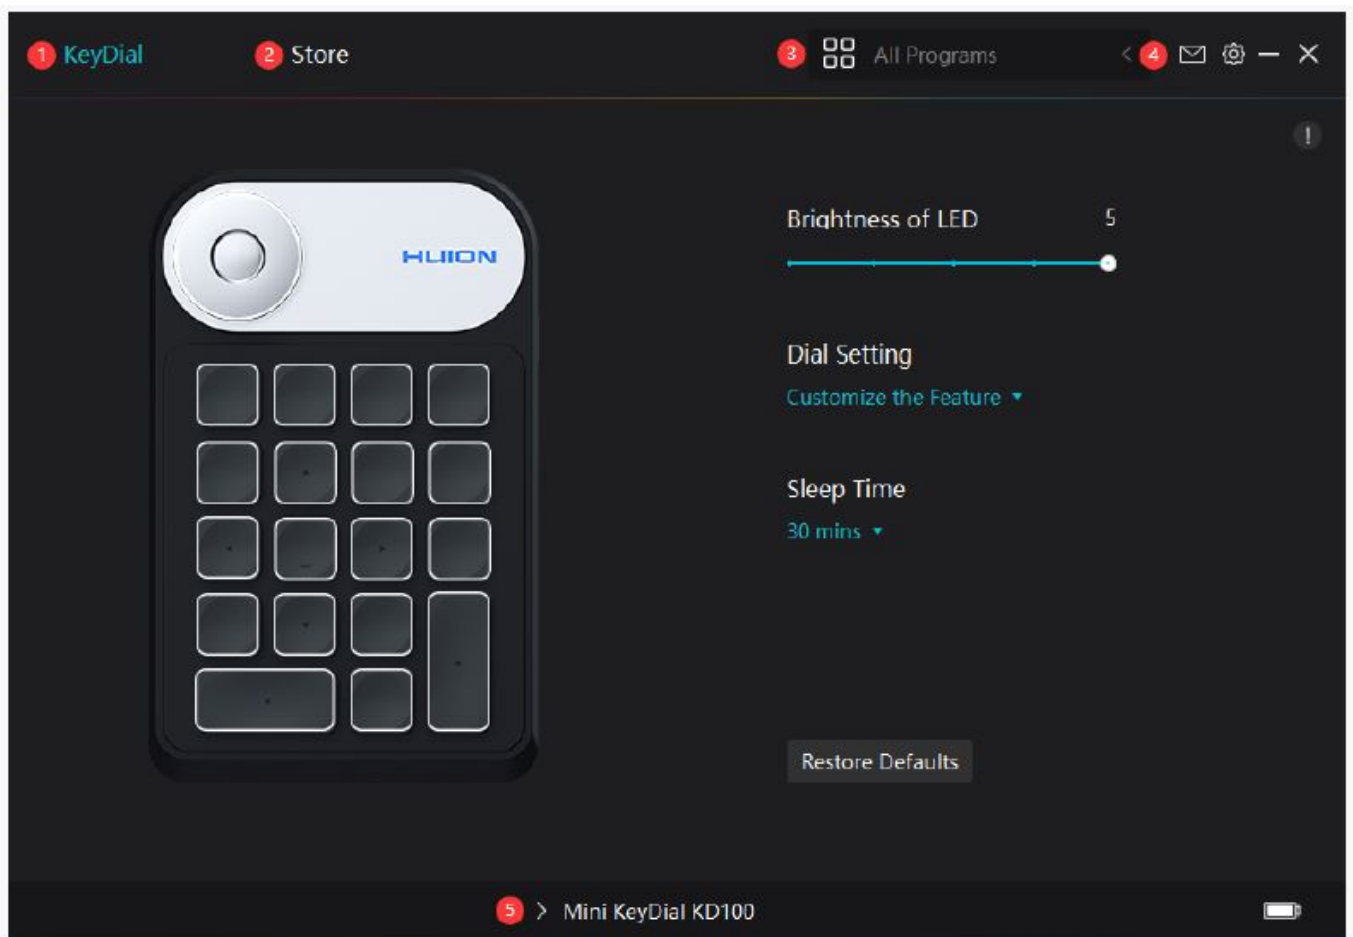

Note:

1. You don't need to download the driver anymore if you already installed the other display or tablet driver(V15). They can work together with one driver.
2. Before installing driver, please close all graphic software and antivirus program.
3. Please make sure your computer OS are as following: Windows 7 or later, macOS 10.12 or later.
4. Run the tablet driver program and complete the installation according to the instruction.

After the download is successful, double-click to open the driver, Connect the device to your computer.
If the connection fails, please reconnect the computer to the device, or restart the driver or computer.

Driver Interface Preview

1. **KeyDial**

Keydial function setting interface, the users can set the KeyDial function on this interface, such as Press Key and Dial.

2. **Store**

Huion Store, where you can get the latest information about the product such as its FAQ or sales promotion. Additionally, you can also purchase other products or accessories on Huion Store.

3. **Add Programs**

You can customize different functions on the current device for different programs.

When select All programs, the setting of the device is valid for every program.

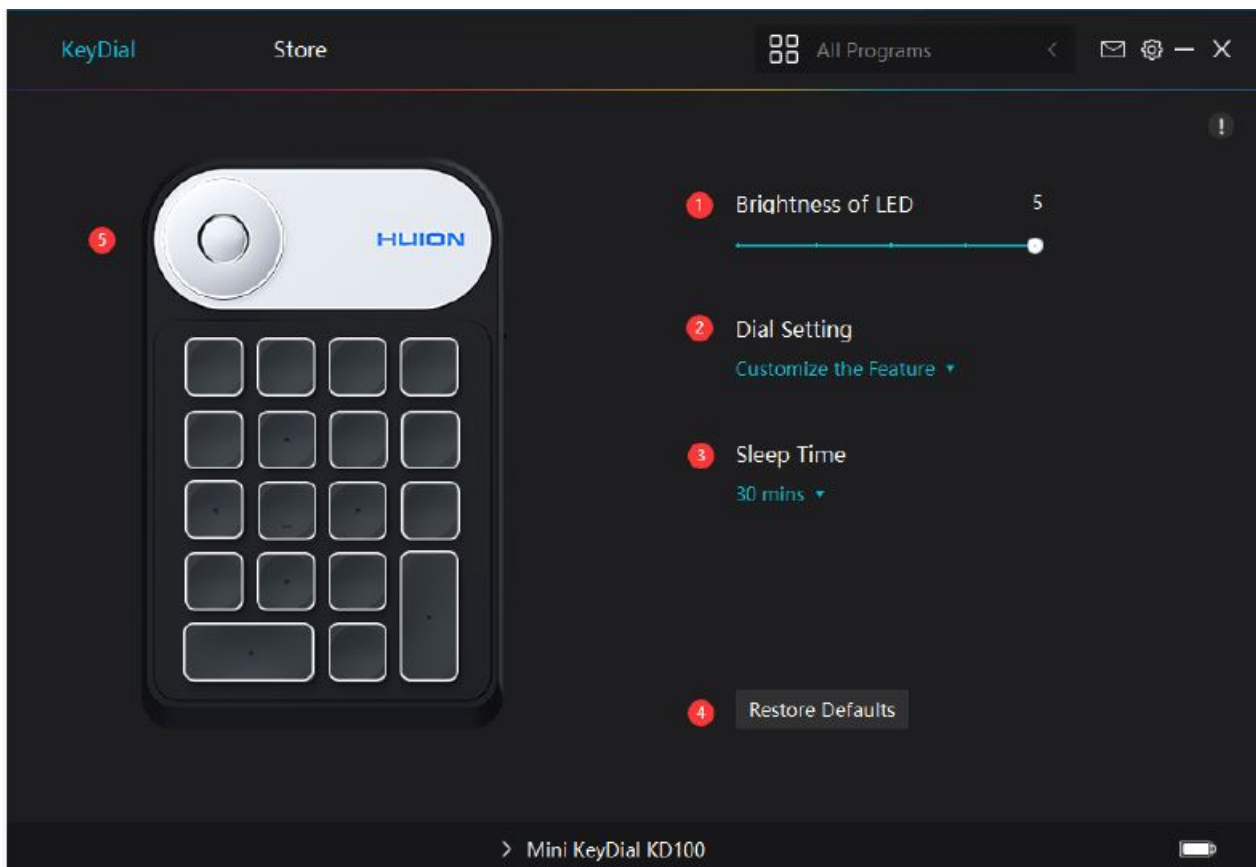

By clicking Add a Program from the drop-down list, you can set the functions for a specific program and hence have unique settings for different programs. After that, when launching a specific program, the Driver will automatically recognize it and the setting features will change to its corresponding one.

4. **Setting**

The users can set the Driver function on this interface. About Device Information, Backup Setting, General Setting and Driver Update.

5. **Switch between Devices**

Driver can support the connection to two digital drawing devices at the same time. When these devices are sharing the same Driver with the current device, users can customize the settings of the devices by switching the Driver interface to the corresponding one. Keydial Setting

1. **Brightness of LED**

Click to adjust the brightness of the LED light from level 1 to level 5, among which level 1 represents the darkest and level 5 represents the brightest.

2. **Dial Function Setting**

You can select Customize mode, Radial mode, or Off mode under the Features of Dial. In Customize mode, you can customize the features of the Dial.

3. **Sleep Time**

By default, the device will turn into sleep mode in 30 minutes when you are not using, but you can also set the sleep time to 1h, 1.5h or 2h according to your usage habits.

4. **Restore Default**

Click to restore all the default settings. Including LED light brightness, sleep time, Keys function setting, Dial function setting, interface color and so on.

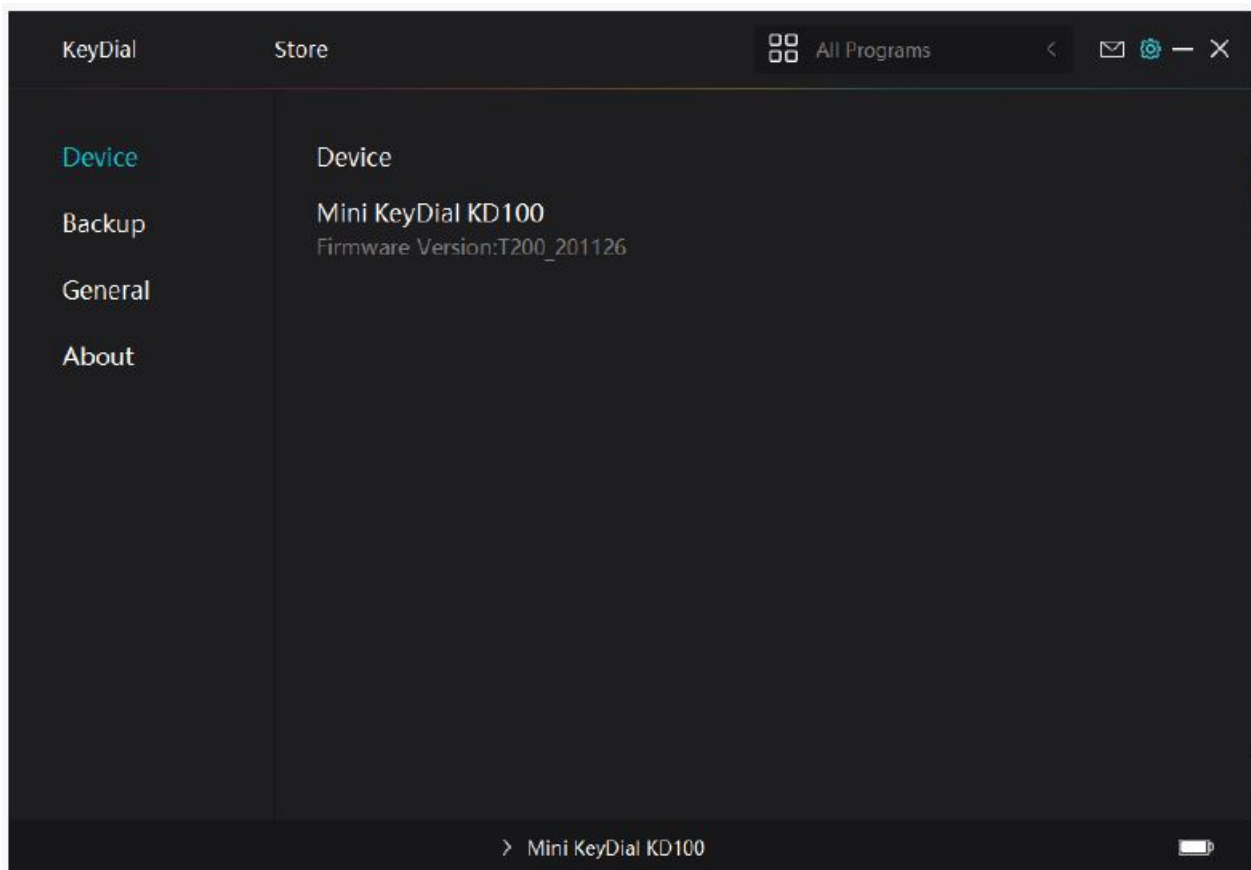

5. **Keys Function Setting**

You can customize the functions of these buttons according to your own habit.

Driver Setting

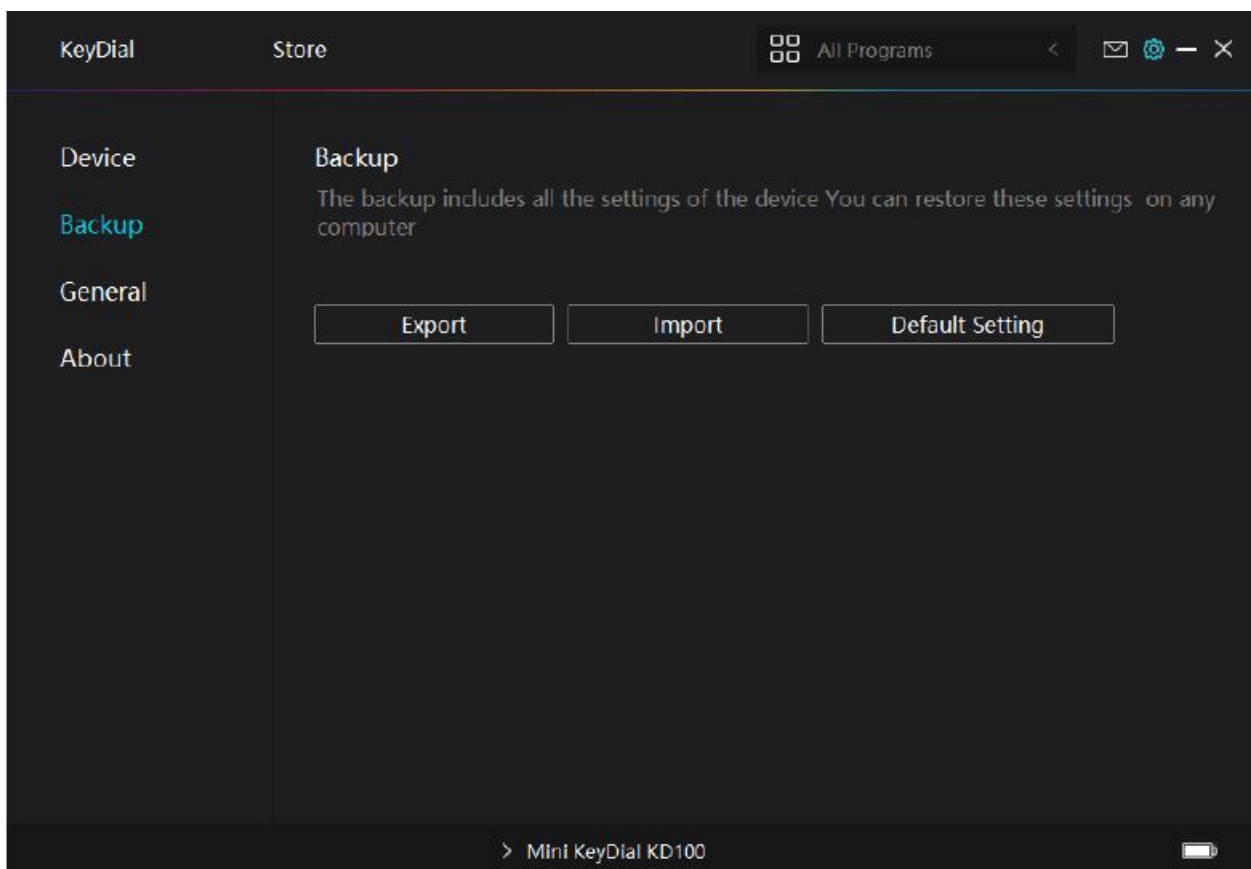

1. **Device**

You can view product information.

2. Backup

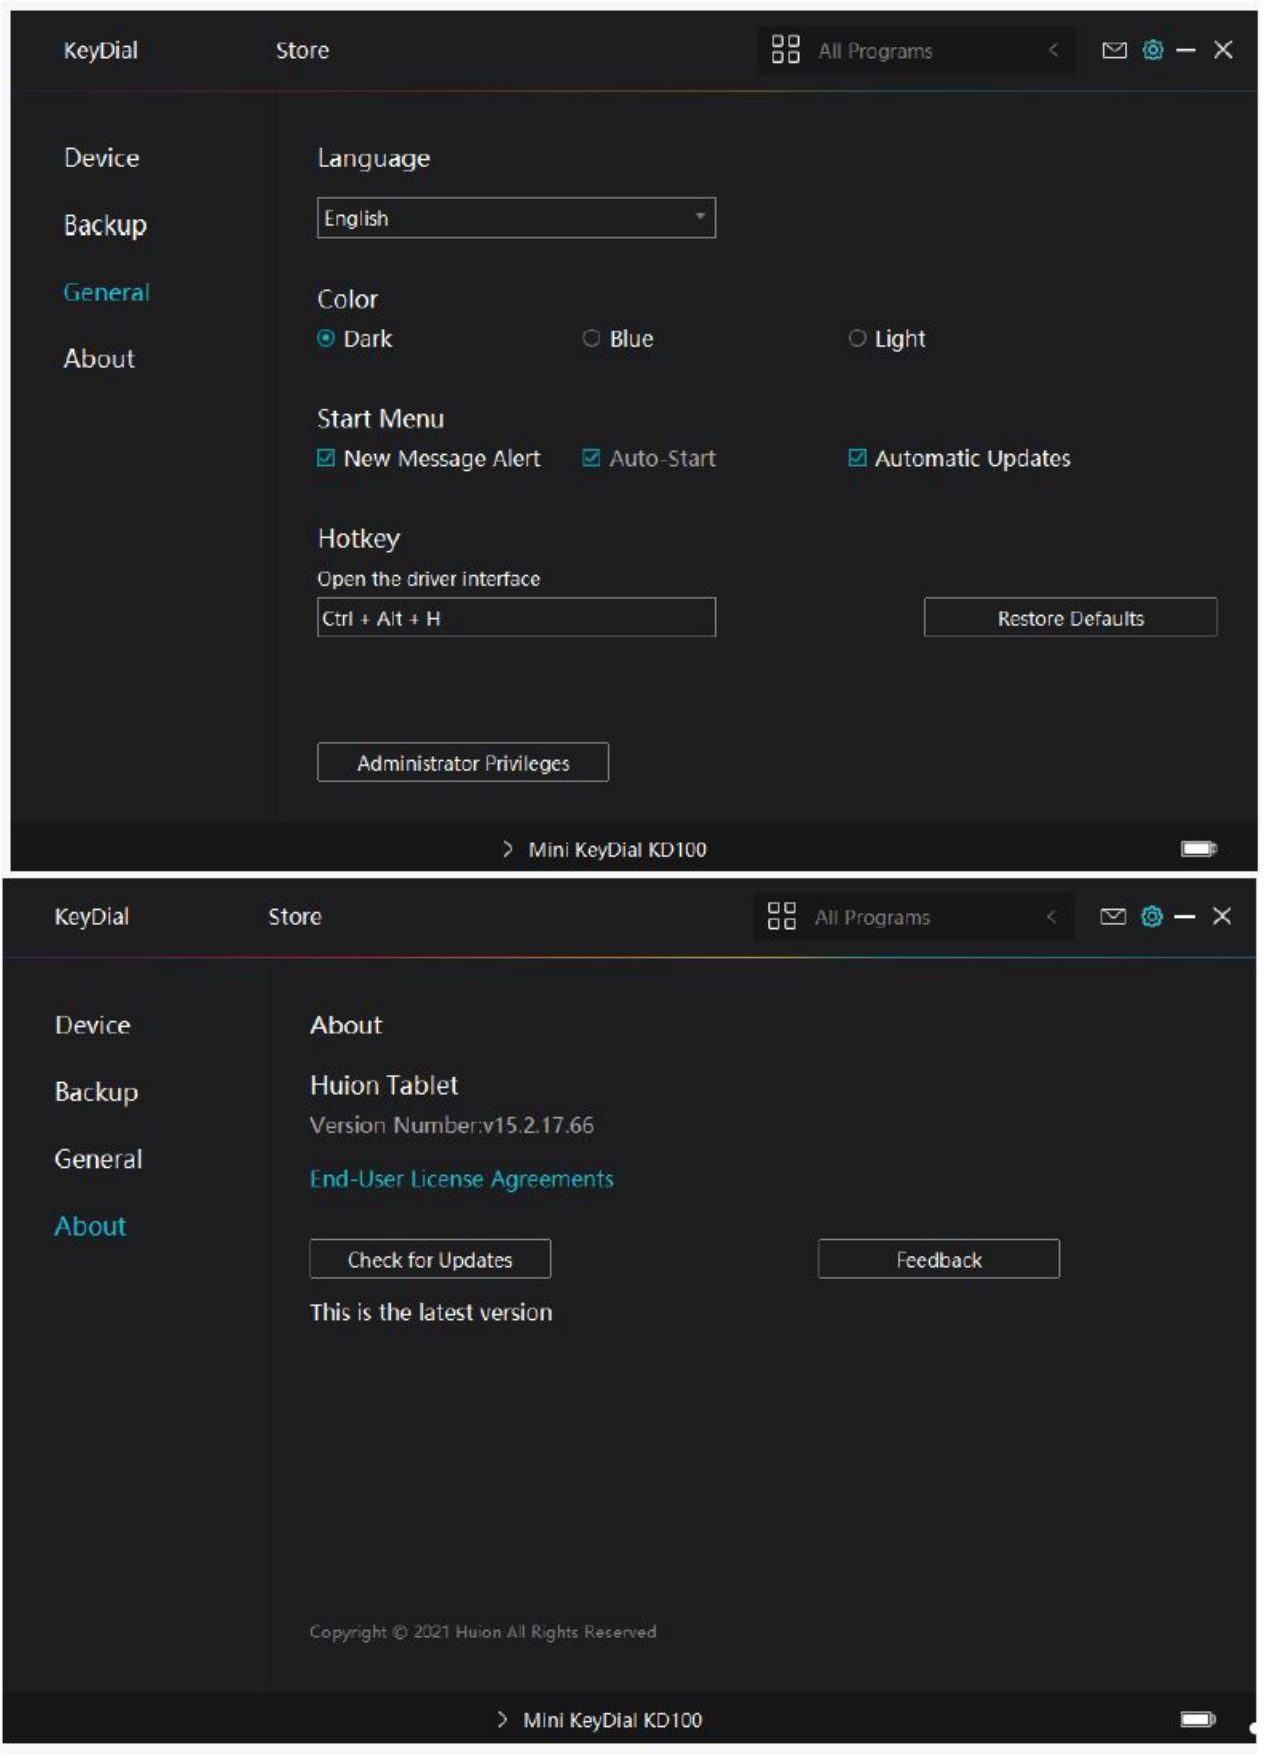

The Driver can import and export your custom settings, which helps to avoid repeated settings when launching a different program.

3. General Setting

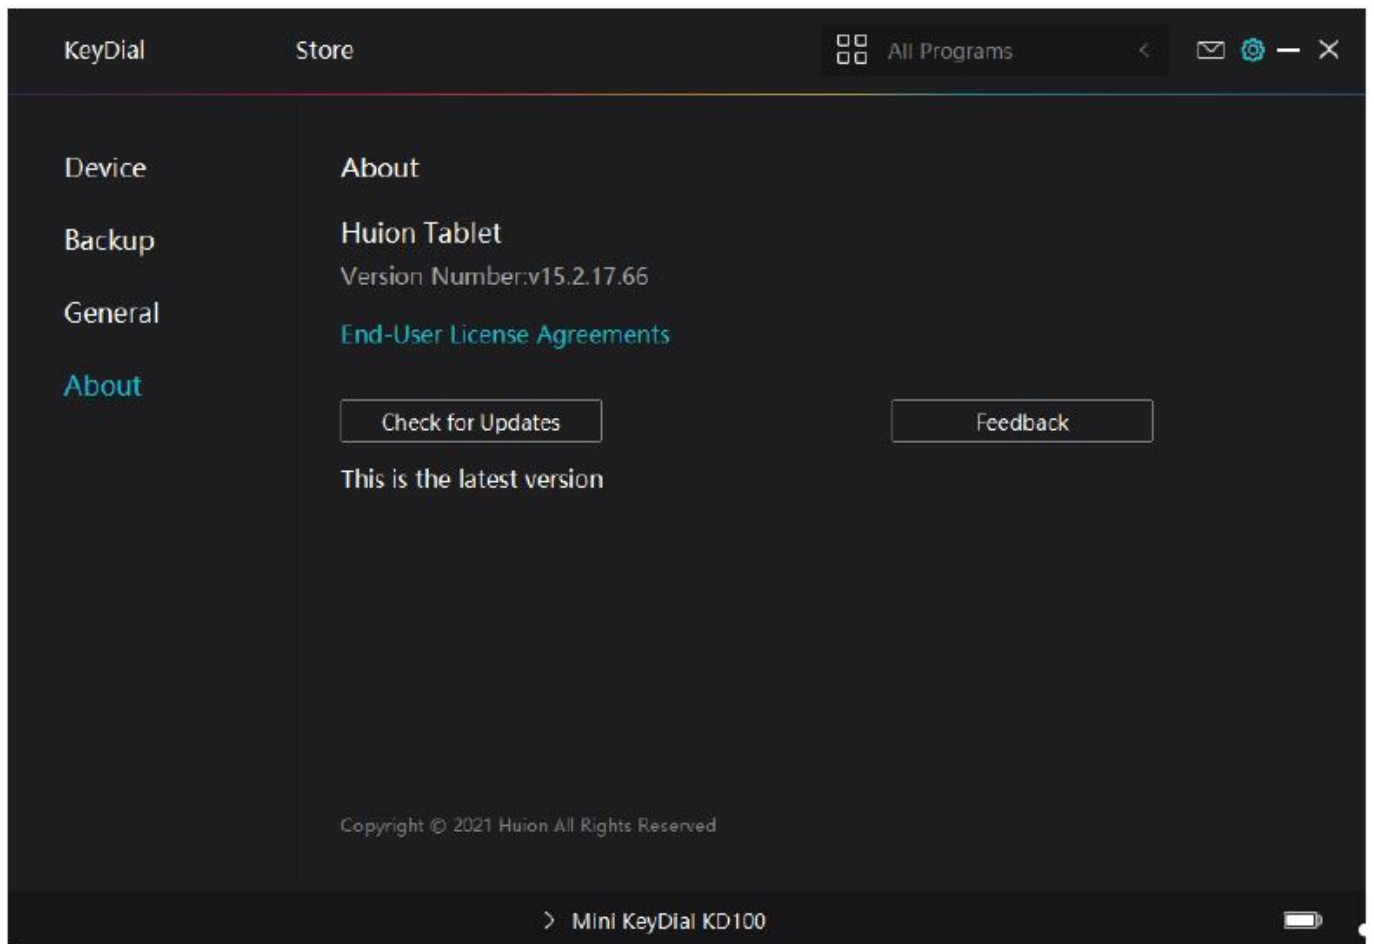

1. Language: Click the drop down menu to select a language.
2. Color: You can select the color of the Driver interface among Dark, Blue, and Light according to your preference.

3. Start Menu: Click to enable or disable AutoStart, New Message Alert, Automatic Updates.
4. Hotkey: A hotkey can be used to call out the Driver interface quickly, you can set one according to your usage habits.

4. About

Users can check the Driver version number here. Click Check for Updates to view the latest Driver version and then follow the prompts to update the Driver if needed.
