Huiran

Huiran YMP-A1 MP4 Player

Use this Manual

Please read this manual carefully before using. All illustrations in this manual are for reference only, please refer to the actual product.

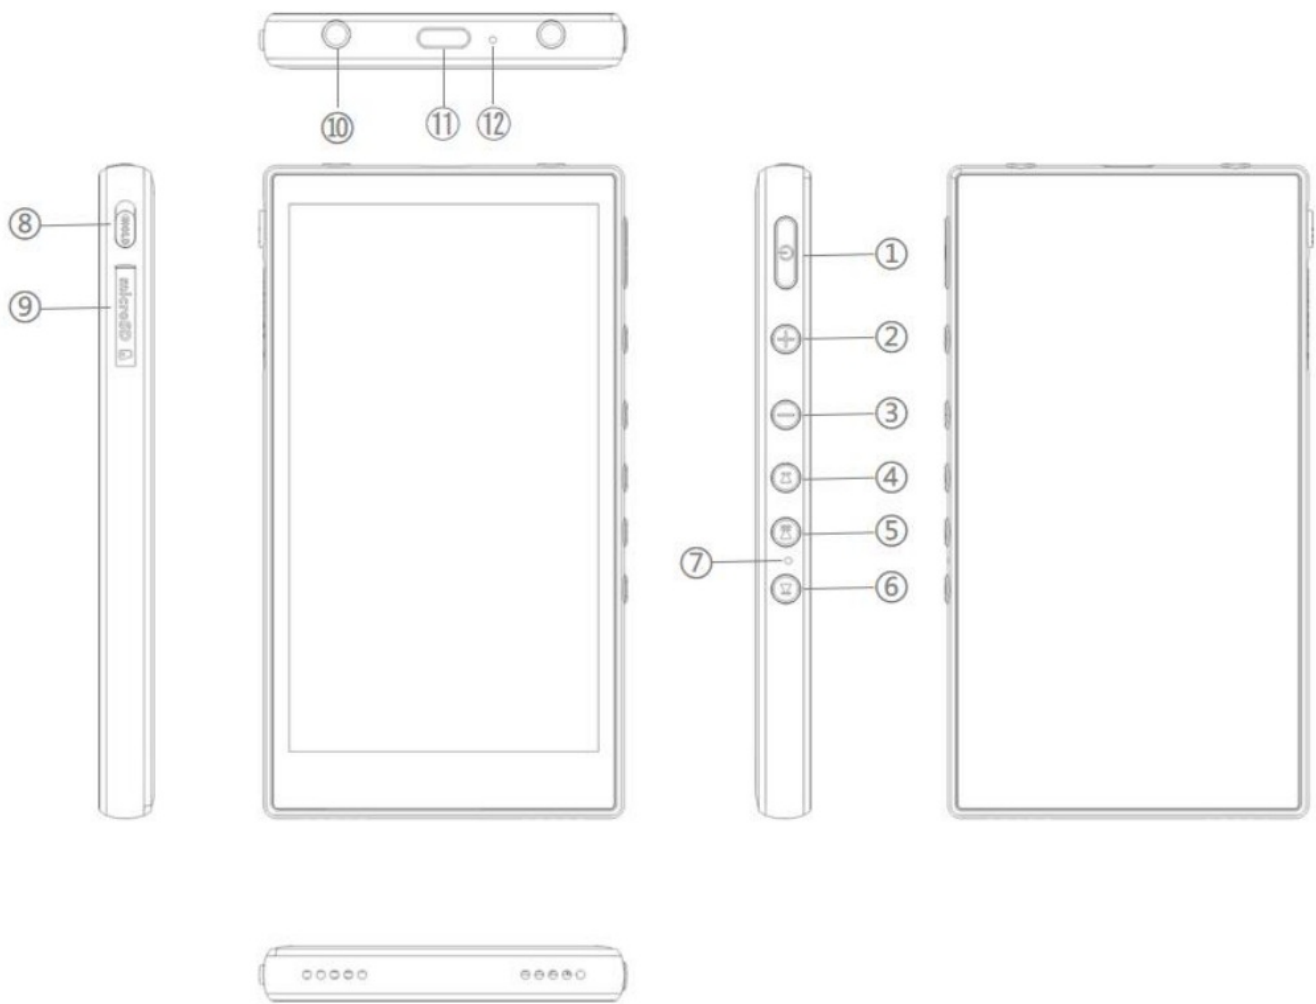

Warm Tips

1. To protect the new machine, a protective film is applied on it. If you want to get the best visual and operating experience, it is recommended to tear it off.
2. There are many Internet applications embedded in the player, and the experience will be better in a WIFI environment. Of course, choosing to use offline is no problem at all.
3. It is recommended to apply for a Google account before use, so that most Internet applications can use it to log in. Follow the link below to learn how to create a Google Account.
<https://edu.gcfglobal.org/en/googleaccount/creating-a-google-account/1/>
4. It is recommended not to execute too many large-scale applications at the same time, which will easily cause the machine to heat up. Periodically clean up background executors manually or through clean software.
5. If the player will not be used for a short period of time, it is recommended to manually shut down the system to prevent excessive power consumption.
6. The player provides Google Store, you can download applications at will, but many applications are charged, please use with caution.
7. If the player crashes, prick the reset hole with a needle to reset the system and force restart. If it still cannot be turned on, check whether the product is out of power.
8. Android operating system and Google input method support multiple languages, you can choose the language

you need through system settings.

9. It is recommended to turn down the volume of the unit before using, headphones, and gradually increase the volume after you start listening until, it is suitable. Don't turn up the volume too high to protect your hearing, (Doctors point out that listening at high volume for extended periods of time, will damage the listener's hearing). When tinnitus occurs, turn down the volume or stop using it.
10. It is recommended to back up the personal data stored in the player, before formatting.
11. Over-voltage, power cable strain, bending or squeezing by heavy, objects is not allowed to avoid overheating or fire disaster.
12. Please keep the product away from the electromagnetic environment,
13. excessive humidity, smoke and other harsh environments.
14. Do not immerse the product in water, and do not use any corrosive or abrasive cleaners to clean.
15. Do not expose the product to moisture or rain. It may cause equipment, failure or even hard to repair because of water and moisture penetration.
16. Do not use headphones while driving, riding, operating machinery, or, doing work that requires attention to outside sounds.
17. Please do not repair or disassemble the product by yourself, otherwise, we will not provide you with normal after-sales service.
18. There is an automatic shutdown function in setting. The following conditions must be met for achieving this function: No programs running automatically in the background; B. Can not be in the charging state.
Note: The automatic shutdown timer starts after the screen is completely turned off.
19. If the actual setting and using method of this product are inconsistent, with this manual due to firmware upgrade, please contact us.

Open the Package

Appearance Buttons Introduction

1. Power on/off, Screen on/off
2. Volume+
3. Volume-
4. Previous
5. Play/Pause
6. Next
7. Reset Hole
8. Hold
9. microSD Card Slot
10. Headset Hole 1○1 .USB-C Slot 1○2 .MIC

-  Return to main interface.
-  return to previous menu.

Notes

1. After the device is operated for a long time, especially in a high temperature environment, it is a normal phenomenon that the surface might be hot. When you feel it is hot, please stop using or charging, turn off some functions as well as moving the device to a cool place. Avoid prolonged contact with hot surface.
2. If you do not use the device for a long time, please charge and discharge it at least once a month to prevent damage caused by excessive battery.

Configuration of New Device

Connect to Wi-Fi Network

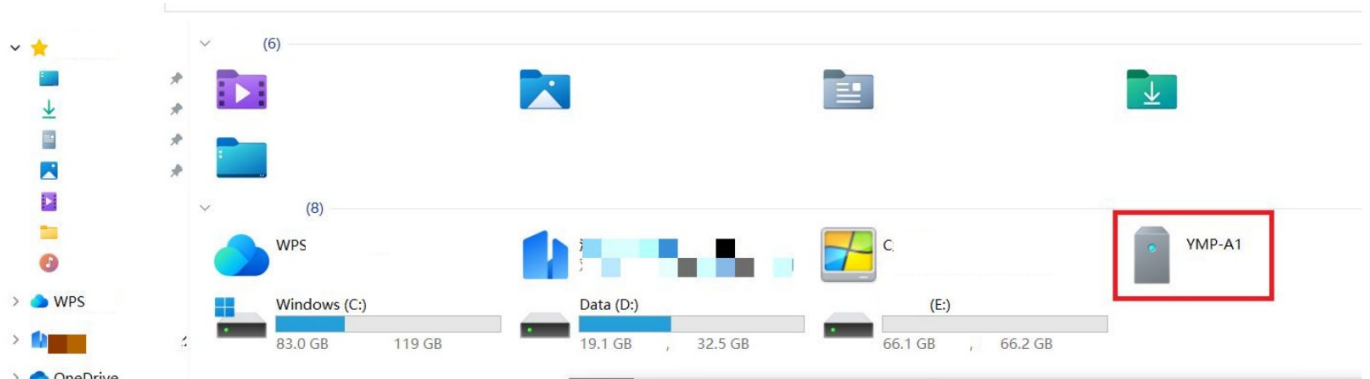

1. Swipe down from the status bar to open the notifications bar or find "Wi-Fi" in settings.
2. Turn on "Wi-Fi" switch and the system will list all detected WiFi networks.
3. Tap the Wi-Fi network you want to connect to. If you choose an encrypted network, you will need to enter a password for access connection.

Connect to Bluetooth

1. Swipe down from the status bar to open the notifications panel or find "Bluetooth" in settings.
2. Turn on "Bluetooth" switch. Enter the Bluetooth settings interface and, click to search new device.
3. Tap the name of the Bluetooth address you want to connect to and, perform a pairing connection.

Transfer MP3 Music Files

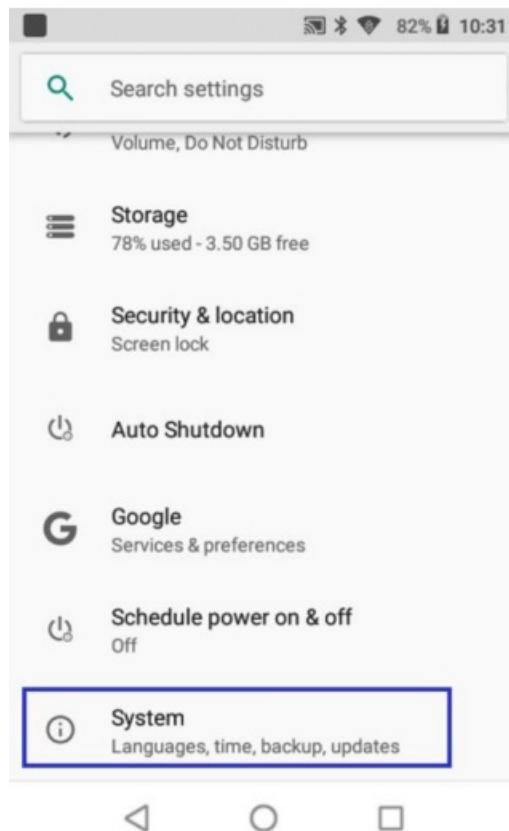

1. Connect your MP3 player to your PC using a USB cable.
2. Open “YMP-A1” folder as below on your PC windows panel.
3. Drag and drop the music files from your PC to the MP3 player’s folder.
4. Once the transfer is complete, safely eject the MP3 player from your PC.

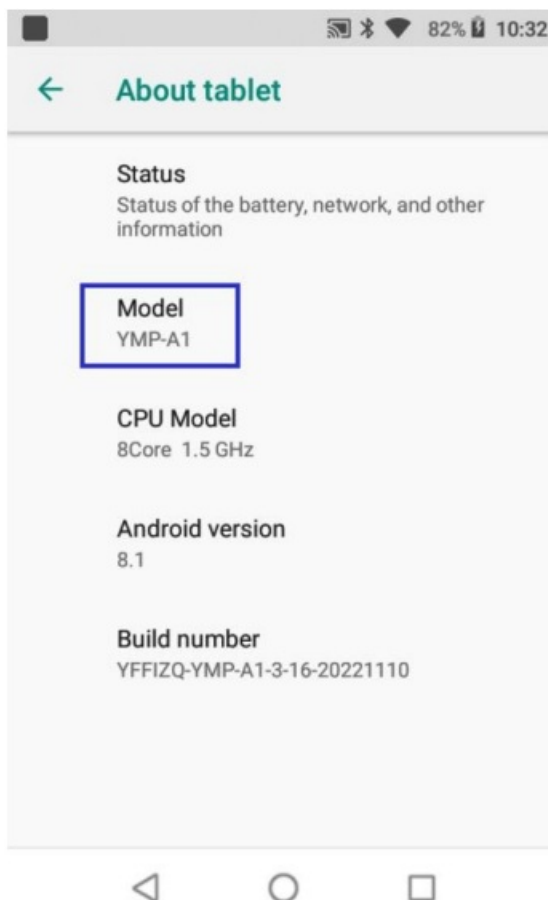

Exception handling

If you are still unable to transfer MP3 files from PC to MP3 player, here are some troubleshooting steps you can try:

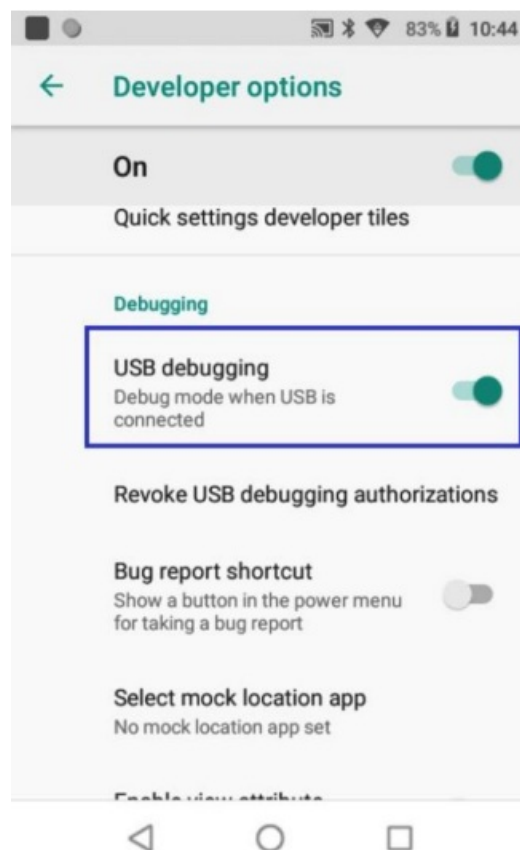

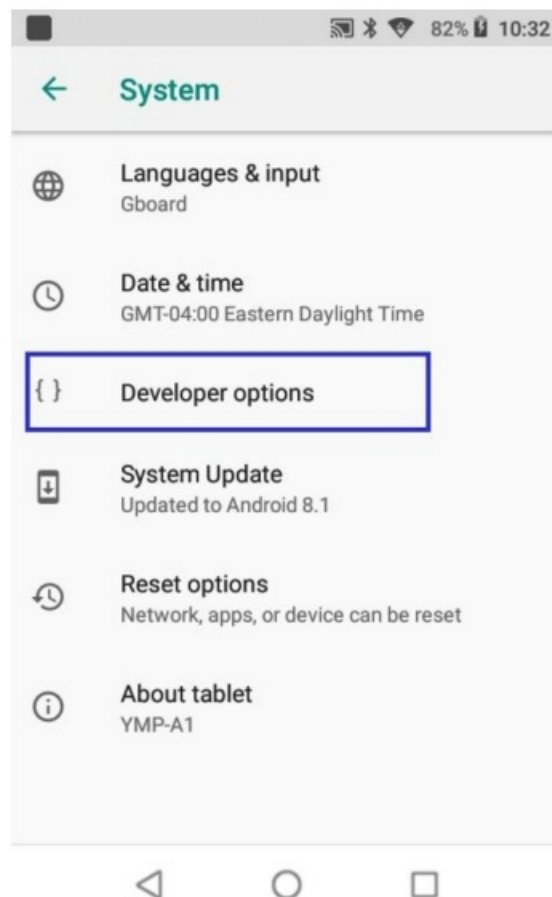

1. Check the USB cable: Make sure the USB cable you are using is functioning properly and is not damaged. Try using a different USB cable to see if the issue persists.
2. Enable USB debugging: On your Android device, go to “Settings” > “Developer options” > “USB debugging” and enable it. This will allow your PC to recognize your Android device. Below are the detailed instructions:
 - Enter the settings APP, click “System”

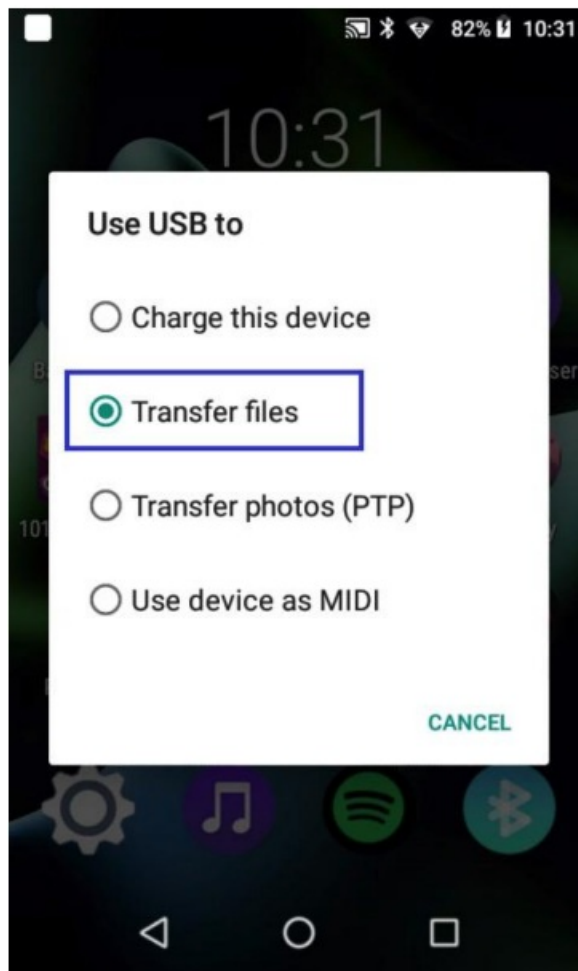

- Click “Model” 7 times in a row, back again, developer options mode is turned on on your device.

- Enter the developer options, swipe down, you will see the USB debugging option, slide the slider on the right side of the USB debugging to the right, and the USB debugging function will be turned on.

- After these steps are completed, you connect the MP3 to the computer with a data cable, and the following options will appear on your MP3, please select Transfer files, At this time, the YMP-A1 mobile hard disk will appear on your computer, and you can transfer the data on your computer to MP3.

- Restart your devices: Sometimes, a simple restart can fix the issue. Try restarting both your Android device and your PC.
- Use a different transfer method: If none of the above steps work, you can try using a different transfer method, such as Bluetooth or cloud storage.
- By following these troubleshooting steps, you should be able to resolve any issues you are experiencing when transferring MP3 files from your Android device to your PC.

Screen and Display

- Basic Operation of Screen
- Tap: Touch the target once. Eg: tap to confirm selection or, open the APP. Long Press: Touch the target for more than 2 seconds. Eg: long press the blank area on home screen to enter the editing, state of home screen.

Notes on Battery Charging

1. Please use PC USB port or 5V/1A power adapter (Charger is NOT included) to charge. Note: Different PCs have different current output capabilities of the USB interface, and the charging time will also be slightly different. It is recommended that when using the PC USB interface to charge, try to charge in the off state to speed up

the charging speed. When charging, it is a normal phenomenon that the charger and the player have a certain, temperature rise.

2. New battery needs to charge and discharge for several times to achieve, optimum performance.
3. The player can be fully charged in about 3 hours normally. It is recommended to unplug it from the USB interface after charging and please do not connect to the power supply for a long time.
4. The polymer lithium battery coming with can be recharged repeatedly.
5. The polymer lithium battery must be replaced by professionals, do not replace it by yourself. Note: if the battery is improperly replaced, there is a danger of explosion and it can only be replaced with the same type or equivalent type of battery. In order to protect the environment, give the waste battery to a professional organization for recycling.
6. Battery life may vary with usage conditions and production time.
7. Do not expose the battery to overheated environment such as sunlight or fire.

Using Temperature	0>45℃		

Supporting

If you meet any product or usage problem, Please feel free to contact us to get the technical support to enhance your using experience. Welcome to contact us from your Amazon order or directly email us to get the following supports if you need:

1. Electronic Instruction Manual
2. If product defective, Free replacement of a new one
3. Please contact us first to enjoy a 15% discount on the next purchase at our store.
4. Technical support
5. E- mail: lisyftx@sina.com
6. WhatsApp: +86-13760321959
7. Phone Support: +86-13760321959

Again, Thank you very much for your support and trust!

Warning

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

- This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
- This device may not cause harmful interference
- this device must accept any interference received, including interference that may cause undesired operation.
- Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

RF warning statement:

- The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

FAQs

The computer does not display the USB symbol when transferring files.

A: Since the device is Android system, the computer cannot display the USB symbol. However, you can open "Computer" or "My Computer" in your computer to view the disk name "YMP-A1" and continue the transmission.

The computer reminded that the format is not supported during the transmission of files.

A: Due to system reason, some formats may cause the computer to pop up, "format not supported" window when transferring files. In fact, they can be supported. When this window pops up, please select "Yes" and "Execute, the operation on all files". The transmission will continue without appearing this window.

The navigation bar will disappear after open some applications

A: When the navigation bar disappears, you can check whether the navigation bar is hidden. Steps: Settings Navigation bar Hide, navigation switch, and select Close. If there is no problem in the navigation bar setting you can pull down from status bar to open the notification bar and the navigation bar will be appeared. You can choose to exit and return.

Some video formats cannot be opened in the built-in video software?

A: The built-in video software of this device has limited decoding capability. It can download third-party video software for playback. In addition, files in rmvb format are copyright protected, so this device cannot support this

format. cannot support this format.
