INSTALL TO THE RIGHT POSITION FIRST TIME – EVERYTIME!

The innovative design of the rotating nut means the outlet is always in the desired position for ease of connection. The cone washer seals on the inside of the brass nipple, meaning Teflon Tape or Hemp is not required, minimizing the risk of leakage.

- Quick to install
- Rotatable and compact
- No Teflon tape or Sealant required
- Great for confined spaces

SIMPLE 2 STEP INSTALL

Align stop outlet to the correct position

Screw on Swivel nut (with cone washer) to the threaded nipple. Then tighten with a wrench.

CISTERN TAP 1/4 TURN
CODE: TMCT15 Cistern Tap

1/2" (15mm) Male

1/2" (15mm)
Female

COMBO DISHWASHER TAP 1/4 TURN
