HYPERTECH PowerStay Insert Card Installation Guide

HYPERTECH

Quick Install Guide
READ BEFORE USING YOUR
HYPERTECH POWERSTAY

Contents

INTERNET UPDATEABLE

If you need to update your PowerStay, go to **hypertech.com** and click "Update Your Device" at the bottom of the homepage, and follow the instructions. Then connect your PowerStay to your Windows-based computer with the supplied USB cable that came in your PowerStay box, then follow a few simple instructions. After the updating is complete, you can install the PowerStay into your vehicle.

- Instantly & safely disable your vehicle's Auto Start-Stop and/or V4 mode
- Quick & easy installation. Plug the PowerStay in to the OBD-II diagnostic port under the driver's side dash and drive your vehicle…That's all there is to it
- Re-enable either feature by unplugging the PowerStay from your vehicle
