Download the Air Oasis App

First, ensure your smartphone is updated to the latest operating system. Download the latest Air Oasis App from the App Store or Google Play.

Android

1. Open the Google Play Store App.
2. Search for Air Oasis.
3. Select the Air Oasis App icon.
4. Select Install.
5. Follow the onscreen instructions to complete the installation.

(https://play.google.com/store/APPS/details?id=com.airoasis.android&hl=en_US)

Apple's iOS

1. Open the App Store.
2. Select Apps and search for Air Oasis.
3. Select the Air Oasis App icon.
4. Select Get then Install.
5. If prompted, sign in to the iTunes Store to complete the installation.

Prepare for Operation

This step is not mandatory but may prevent issues with connecting.

1. Ensure the iAdapt Air is plugged in and turned off.
2. Press and hold the Smart Mode button until an audible beep is heard.
3. Wait 5 minutes for the reset to occur.

Smart Mode Button

Check Phone/Tablet Setting

The adapter connection must be established on a 2.4 GHz network on your WiFi. The 5Ghz channel cannot be used for the initial connection.

Select the unsecured guest network on your router if unable to connect to the password-protected 2.4 networks.

Open the WiFi settings on your smartphone and connect to your 2.4 GHz WiFi.

Navigate to the Settings option within your smartphone or tablet and ensure location settings are correct.

Directions are provided in the steps below.

Android Location Settings

1. Open the smartphone/tablet settings.
2. Select Apps & Notifications.
3. Select Advanced.
4. Select App Permissions.
5. Select Location.

6. Find the Air Oasis App.
7. Ensure that the Air Oasis App is enabled. If this was not the default setting, power off the phone/tablet and restart to initiate the new setting.

Apple iOS Location Settings

1. Open the smartphone/tablet settings.
2. Select Privacy.
3. Select Location Services.
4. Find the Air Oasis App.
5. Select the Air Oasis App.
6. Click Allow Location Access While Using the App. If this was not the default setting, power off the smartphone/tablet and restart to initiate the new setting.

Create an Air Oasis Account

Please note if you are planning to use the Amazon Alexa Skill with the Air Oasis App, you must use the same Login email address with Amazon and Air Oasis.

1. Open the Air Oasis App.
2. In the bottom right corner, select Sign Up.
3. Enter your email address and create a unique password.
4. Click Sign Up to be sent an activation email.
5. Go to your email account, open the email from Air Oasis and select Activate.

If you were able to successfully create and activate your account please proceed to **Create a Place**.

If you did not receive an activation email, follow these steps:

- Select the settings icon in the upper left corner of the Air Oasis App.
- Select Log Out.
- Close the app.
- Restart/launch the Air Oasis App.
- In the bottom right corner select Sign Up.
- Enter the same email and password from the initial setup.
- Select Resend Email Verification.

If at any point during the account set up the app crashed or closed itself, follow the instructions below:

Android

- Close the Air Oasis App.
- Open your smartphone/tablet settings menu.
- Select Apps & Notifications.
- Select See All.
- Select the Air Oasis App.
- Select Storage.
- Select Clear Cache.
- Restart the smartphone/tablet.

Apple's iOS

- Close the Air Oasis App.
- Open your smartphone/tablet settings menu.
- Select General.
- Select iPhone Storage.
- Select the Air Oasis App.
- Select Delete App.
- Reinstall the Air Oasis App.

Create a Place

If you have not already done so, ensure that your phone/tablet is connected to the 2.4 GHz Wi-Fi.

1. Open the Air Oasis App and login if needed.
2. Select New Place.
3. Enter the information listed on the diagram below.

The diagram shows the Air Oasis app interface for creating a new place. At the top, there is a menu icon (three horizontal lines) and the word "PLACE". Below this is a green button labeled "+ NEW PLACE" and a blue button labeled "+ NEW DEVICE". A large blue arrow points from the "+ NEW PLACE" button down to the "ADD NEW PLACE" screen. The "ADD NEW PLACE" screen has a dark background and contains the following fields and options:

- A camera icon for selecting a picture or taking a photo.
- A "PLACE NAME" field with the text "My New Place".
- A "WIFI NETWORKS (SUPPORT 2.4GHz Router only)" field with a dropdown menu showing "<unknown ssid>".
- A "WIFI PASSWORD" field with a toggle icon.
- A "CONFIRM WIFI PASSWORD" field with a toggle icon.
- An "ADD" button at the top right.
- An "ADD PLACE VIA QR CODE" link at the bottom.

Blue arrows point from the text instructions to the corresponding fields and buttons in the app interface:

- Click Add after all Information is filled in. (points to the ADD button)
- Select a picture or take a photo. (points to the camera icon)
- Name your new place. (points to the PLACE NAME field)
- Enter the password for your WiFi. (points to the WIFI PASSWORD field)
- Re-enter the password for your WiFi. (points to the CONFIRM WIFI PASSWORD field)

If the field WiFi Networks is blank, please quit the app, return to page 2 and follow the steps.

If the field WiFi Networks shows Unknown SSID, tap the Unknown SSID and select your WiFi from the dropdown list.

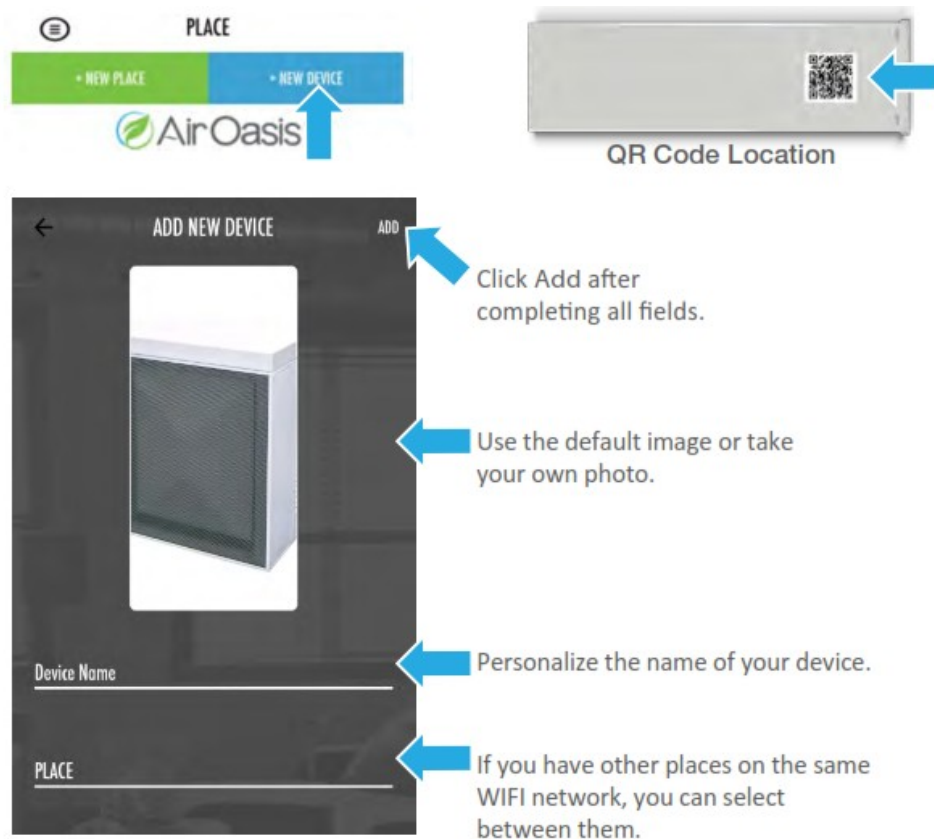

Note Ensure that your WiFi password is entered correctly. Failure to do so will prevent connection.

Add a Device

If you have not already done so, ensure that your phone/tablet is connected to the 2.4 GHz WIFI.

If you are attempting to connect multiple devices, you must do it one at a time. Only one adapter can be powered on during the connection process. (Any device already connected to the app does not need to be powered down). Multiple devices may be controlled through the app simultaneously once the connection process is complete for each individual one.

1. Select New Device.
2. Input the QR code manually or use your camera. The QR code is located on the backside of the filter cover on your adapter.
3. Enter the information listed on the diagram below.

If the field Place Name is blank, quit the app, return to page 2 and follow the steps.

If the field Place Name matches the place you created, tap Add.

During this process, do not close the app, allow the phone/tablet screen to dim, or press the lock button on your device.

The adapter will now attempt to sync to the 2.4Ghz network using the smartphone/tablet. Allow the app to go through the three-step process.

If connecting to the device fails, check the following:

1. Is the Phone connected to WiFi?
2. Did you enter the correct WiFi password during Create a Place?
3. Is the adapter plugged in?
4. Are other adapters plugged in? Please unplug them all except for the one being paired.
5. Is the adapter connected to another router?

Alexa Integration

This guide is intended for use on a pre-established/pre-configured Amazon Alexa account. If you have not set up your Alexa device and/or created an account, please visit this link prior to proceeding: <https://alexaappext.com>.

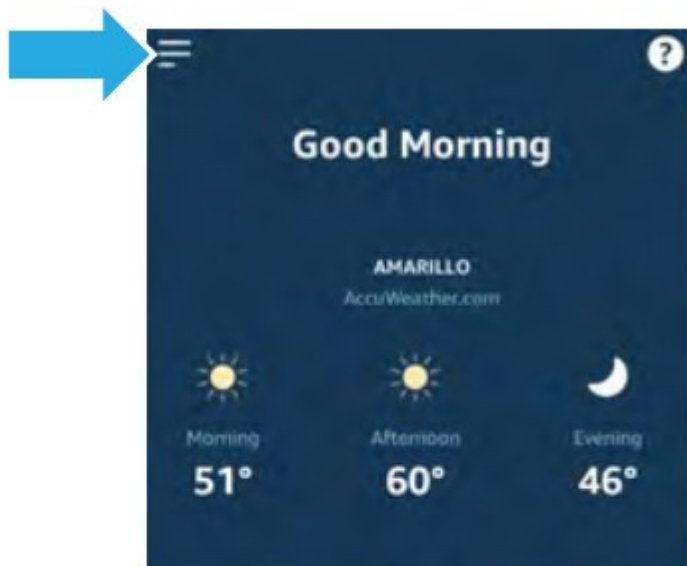

1. Open the Amazon Alexa App (log in if applicable.)

5. Select Enable to Us

2. Select Menu.

6. Enter your usernam

3. Select Skills & Games.

7. Select Authorize.

4. Search for Air Oasis.

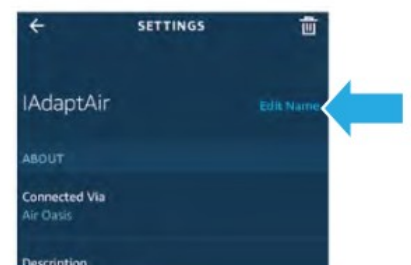

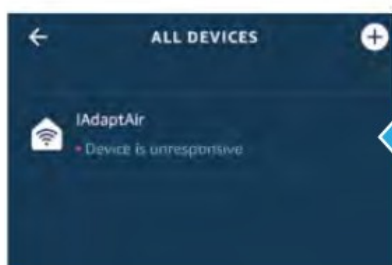

8. Allow Alexa to disc

Alexa Commands

Replace the word "iAdapt Air" with a simple name if you wish. Alexa can better understand fewer syllables.

Power On/Off

- Alexa, Set iAdaptAir On.
- Alexa, Set the adapter Off.

Set Fan Speed

- Alexa, Set the adapter to Low.
- Alexa, Set the adapter to Medium.
- Alexa, Set the adapter to High.

Set Smart Mode

- Alexa, Set iAdaptAir Smart Mode to Activate.
- Alexa, Set iAdaptAir Smart Mode to Deactivate.

Set UV Light

- Alexa, Set iAdaptAir UV (or ultraviolet) to Activate.
- Alexa, Set iAdaptAir UV (or ultraviolet) to Deactivate.

Set Ionizer

- Alexa, Set the adapter Ionizer to Activate.
- Alexa, Set the adapter Ionizer to Deactivate.

Set Sleep/Lock Mode

- Alexa, Set adapter Sleep to Activate.
- Alexa, Set adapter Sleep to Deactivate.
- Alexa, Set the adapter Child Lock to Activate.
- Alexa, Set the adapter Child Lock to Deactivate.

Set Timer

- Alexa, Set the adapter to Reset.
- Alexa, Set the adapter to 2 Hours.
- Alexa, Set the adapter to 4 Hours.
- Alexa, Set the adapter to 8 Hours.

Set Quick Key A or B

- Alexa, Set the adapter to Preset A.
- Alexa, Set the adapter to Preset B.
