# iAquaLink iQ30 Web Connect Device User Guide

Contents

iAquaLink iQ30 Web Connect Device

Product Information

The product is an intelligent pool control system that can be accessed through a web interface or a mobile application. It allows you to remotely monitor and control your pool's temperature, lights, and other auxiliary devices installed on your AquaLink system.

Product Usage Instructions

1. Go to iAquaLink.com to access the web interface or download the mobile application.
2. Create a user account.
3. Add the iQ30 Web-Connect Device to your account by entering the 12-digit alphanumeric device number found on the device itself or on the back of the door hanger.
4. After logging into the app, click the plus sign for iOS devices or the pencil icon for Android devices found in the upper right-hand corner of the My Systems screen. Follow the steps to add the device to your account.
5. For security reasons, ensure that your smart phone or tablet and the iQ30 are connected to the same internet network (router) before adding the device.
6. Use the web interface or mobile application to monitor and control your pool's temperature, lights, and other auxiliary devices installed on your AquaLink system.
7. To set up OneTouch items, use the web interface to configure and label them. OneTouch items allow you to turn on multiple functions with a single button.
8. If a color LED light is installed and programmed on your AquaLink system, use the web interface to control its sub-menu. Four choices of light intensity are available, and you can turn the color LED light ON to the selected color or change it to the selected color.

Intelligent pool control from your smart phone or web-connected device.
Thank you for choosing AquaLink® automation, the easiest to use, most versatile pool control system. The iAquaLink® app, for your iOS or Android device, allows you to control your pool anytime, anywhere. Let's get started.

Getting Started

1. **Installation**

   The iQ30 Web-Connect Device for AquaLink® automation, should be installed and connected to the Internet. The green LED on the side of the iQ30 indicates it is connected to the Internet. If the green LED is not lit, please reference the included Quick Start Guide detailing the steps to connect the device to the Internet before proceeding.
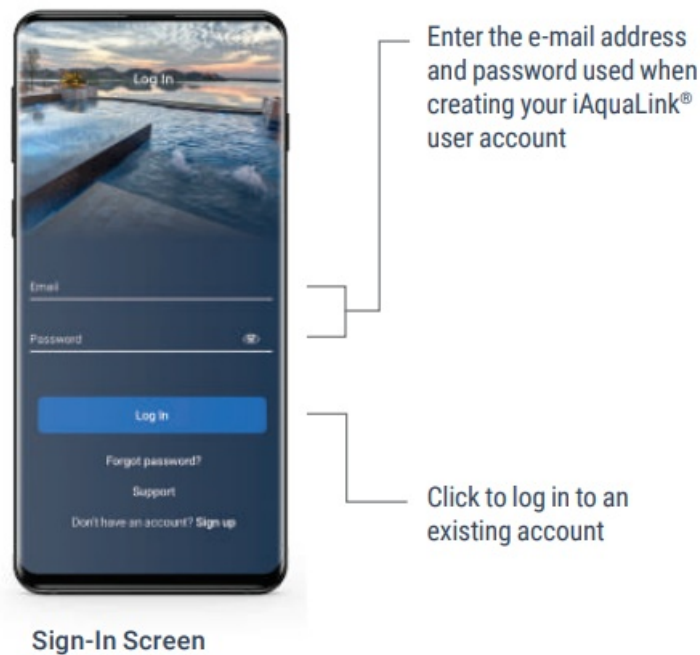

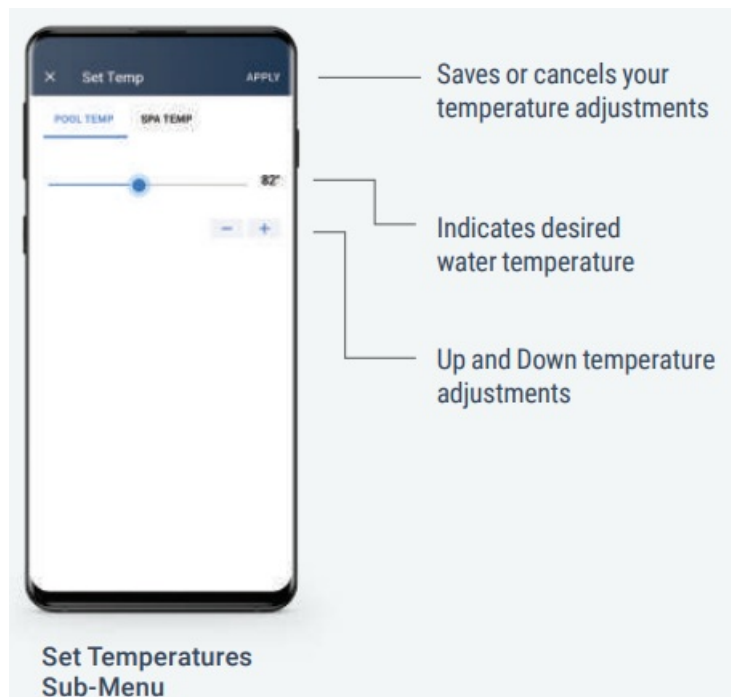

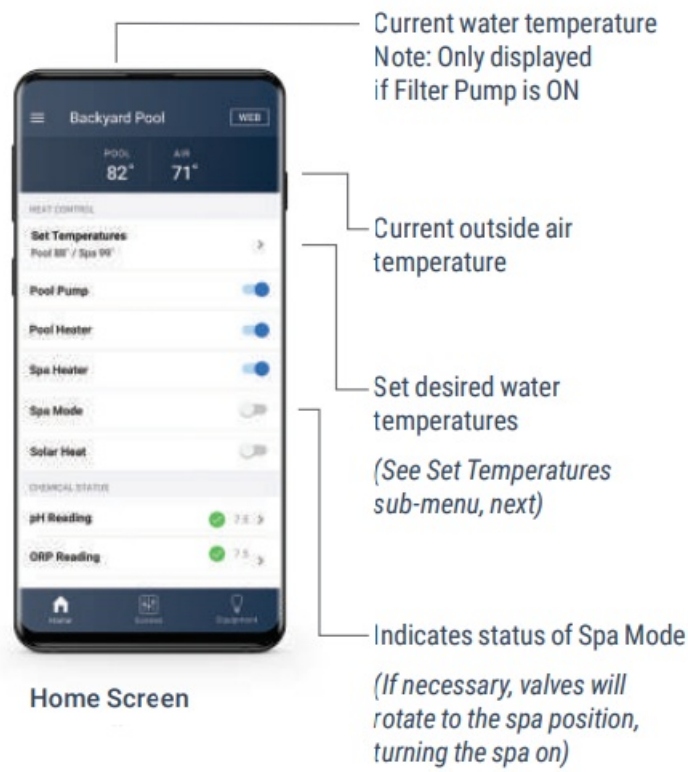

2. **Create a User Account**

   To create a user account, first download the iAquaLink® app. The app can be found in the Apple App Store for iOS devices or on Google Play for Android devices. Open the app and follow the steps to create an account.
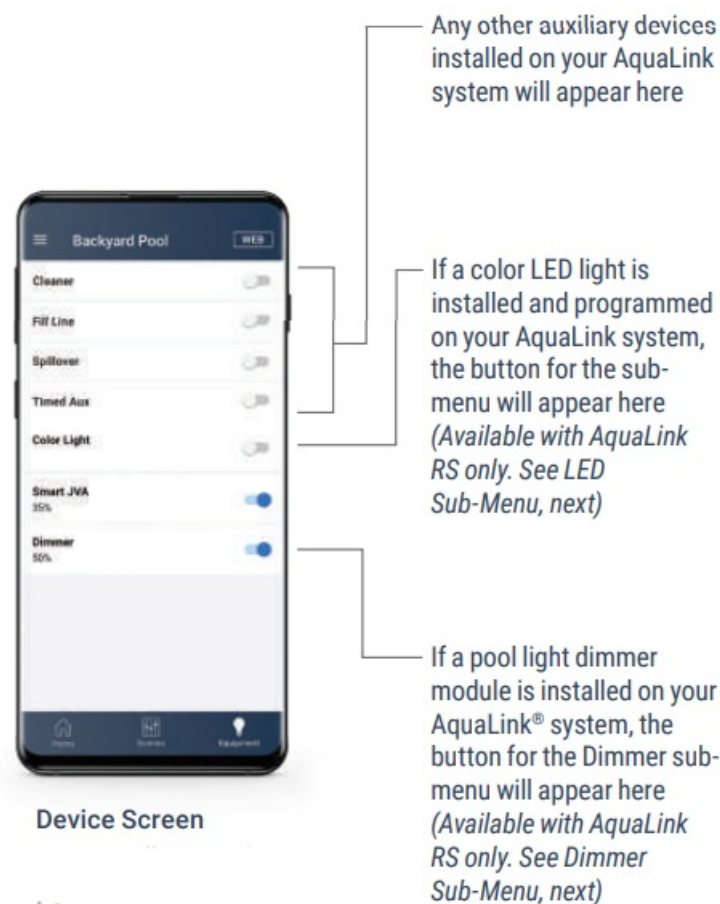

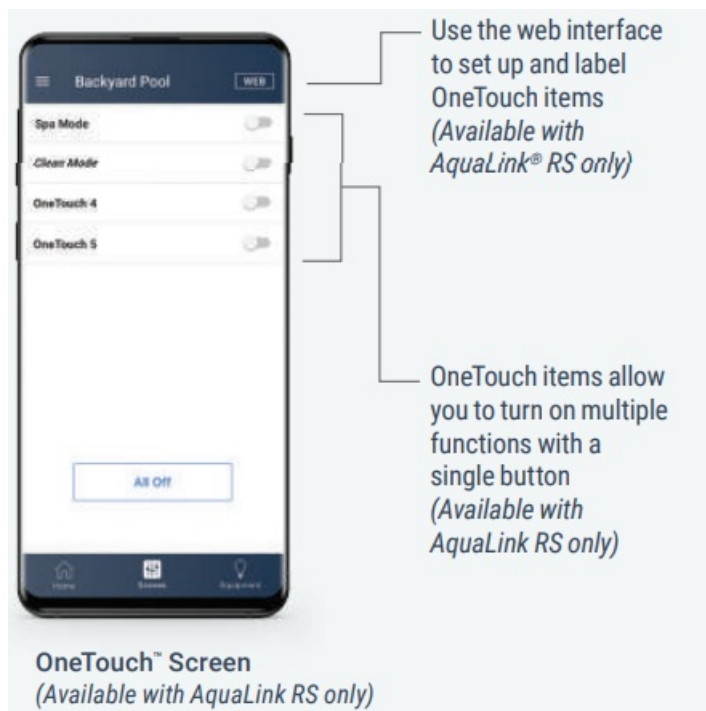

3. **Add the Web-Connect Device to Your Account**
   1. To add an iQ30 Web-Connect Device to your account, you will need the 12-digit alphanumeric device number found on the device itself, or on the back of the door hanger your installer may have given you. It starts with a 'Q' and looks like QXX-XXX-XXX-XXX.
   2. After logging into the app, on the My Systems screen, click the plus sign for iOS devices or the pencil icon for
   3. Android devices found in the upper right-hand corner.
   4. Follow the steps to add the device to your account.
   5. For security reasons, the account server only allows an iQ30 Web-Connect Device to be added to an iAquaLink account when the smart phone (or tablet) and the iQ30 are on the same Internet network (router).

Control

Enter the e-mail address and password used when creating your iAquaLink® user account
