iclever IC-BK08 Multi Device Foldable Wireless Keyboard

Product Information

Specifications

- Product Name: Multi-device Foldable Wireless Keyboard
- Model Number: IC-BK08
- Catalog Number: N/A
- Charging Port: USB-C

Pairing with 1st device:

1. Unfold the keyboard to power it on, the indicator light will turn blue for 3 seconds.
2. Hold and press the key of *[key]* for 5 seconds to enter pairing mode in channel 1 until the indicator light flashes blue quickly.
3. On your device, go to Bluetooth settings and find the Bluetooth name "iClever IC-BK08 Keyboard" and click to connect.
4. The indicator light will turn off once paired successfully.

Pairing with 2nd device:

1. Hold and press the key of *[key]* for 5 seconds to enter pairing mode in channel 2 until the indicator light flashes blue quickly.
2. On your device, go to Bluetooth settings and find the Bluetooth name "iClever IC-BK08 Keyboard" and click to connect.
3. The indicator light will turn off once paired successfully.

Pairing with 3rd device:

1. Hold and press the key of *[key]* for 5 seconds to enter pairing mode in channel 3 until the indicator light flashes blue quickly.
2. On your device, go to Bluetooth settings and find the Bluetooth name "iClever IC-BK08 Keyboard" and click to connect.
3. The indicator light will turn off once paired successfully.

Switch among connected channel:
Press *[key]*, *[key]*, or *[key]* to switch among the connected devices.

Re-pairing connected channels:

Hold and press the key of *[key]*, *[key]*, or *[key]* for 5 seconds to enter pairing mode again. On your device, find the Bluetooth name "iClever IC-BK08 Keyboard" and click to connect.

FAQs

Bluetooth connectivity issues

Connection failed / Unable to connect

Please follow the troubleshooting steps below:

1. Please Please make sure that your iClever device and computer are within close proximity of each other.
2. Try moving away at least 8 inches (20 cm) from metal and other sources of wireless signal.
3. Delete all Bluetooth connection records, turn Bluetooth off on the device and turn it back on to refresh.
4. Connect again.
5. Try a different device to test.

Keystroke delay / Character repetition / Frequent disconnections

Please follow the troubleshooting steps below:

1. Restart your device and keyboard.
2. Charge the keyboard for 2 hours.
3. Check if there are any updates running in the background that may cause the delay.
4. Make sure your operating system (OS) is up to date.
5. Try on a different device to test.
6. Try moving away from metal and other sources of wireless signal:
   Bluetooth Speakers, TWS, headphone, WiFi router, Computer power supplies, Strong WiFi signals,Metal or metal wiring in the wall, any device that could emit wireless waves: Microwave, cordless phone, baby monitor, wireless speaker, garage door opener.

Keyboard are not searched in the match list

Here are some troubleshooting tips to ensure that your iClever device is ready to connect:

1. Restart your Bluetooth device.
2. Make sure you are in Bluetooth pairing mode (the keyboard Bluetooth indicator will keep flashing when you are in Bluetooth paring).
3. The pairing name may be shown as a keyboard icon (like 7B:08:22:19:27:B9).
4. Remove the iClever previous connection records and pair it again.

The output does not match the key symbols

For Windows/iOS/Mac OS users
Please ensure your input method corresponds to the keyboard layout. For example, if you are using a English(US) keyboard, please choose the English(US) input method. If you have it this way but the problem still persists, please keep us updated.

For Android users
Please ensure your input method corresponds to the keyboard layout by setting the Virtual Keyboard and the Physical Keyboard on your device.

1. Virtual Keyboard:
   Step 1: Find the language-switching button which is usually represented by a globe icon on the virtual keyboard.
   Step 2: Choose your language from the virtual keyboard. This will change the virtual keyboard layout to match your language.
2. Physical Keyboard:
   Step 1: Go to the Settings menu on your device.
   Step 2: Find and choose "Language and Input" on your android device. You may need to follow a slightly different path depending on the brand of your device.
   Step 3: Find the option related to the physical keyboard settings and choose your language layout for your physical keyboard.

Touchpad issues

Touchpad not working

Possible solution for not-working touchpad:

1. Press "Fn+right Alt" to activate the touchpad.
2. If it doesn't make a difference, please reset the keyboard by pressing "fn+left shift+backspace" for 5 seconds.
3. Remove the Bluetooth record of the keyboard from your device's Bluetooth list. Turn off Bluetooth on your device, then turn it back on, and re-pair.
4. Reboot your device to refresh the system.
5. Ensure that your device's operating system is up to date.
6. Try connecting the keyboard to another device to verify if the issue persists.

Please note that for iOS and iPad OS users, you may need to enable Assistive Touch for accessing the touchpad,

please go to Settings > Accessibility > Touch > Assistive Touch.

Touchpad Sensitivity

Mac OS/Windows:
Please note that touchpad sensitivity adjustment is not available on Mac and Windows systems.

iOS:
Setting > General > Trackpad & Mouse > follow on-screen instructions.

Android:

possible solution:
Settings – Mouse & touchpad- Additional mouse options – Pointer Options- Move "Select a pointer speed" to fast, tick "Enhance pointer precision".
Please note that the exact settings may vary depending on the device brand and Android version.

Touchpad scrolling direction
Please note that the scrolling direction of the touchpad can't be changed in any operating system.

Does not hold a charge

1. Try using another USB cable and connect it to a different power source to charge for 2 hours (e.g., USB port on a computer or a different charging adapter).
2. Make sure that the voltage of the charger you are using is not greater than 5V. Higher voltage can potentially cause the keyboard to shut down.

Note: the charging indicator will turn green once the battery is fully charged and please unplug the cable.

Compatibility issues and scope of compatibility
Incompatible range at this stage:

- Devices: Steam deck, PlayStation (PS4, PS5), XBOX, Smart TV
- System: Linux all, Ubuntu all
- Other: 3rd party Bluetooth adapters 4.0 and below, remote desktop software

Range of compatibility at this stage:

- System version: Windows 8 or later, Mac OS 10.12 or later, iOS 9.0 or later, Android 6.0 or later , Chrome OS
