PAIRING INSTRUCTIONS

a.How to pair with Bluetooth devices?

Pair with the 1st device

Step 1. Slide the "OFF/ON" key to power on the keyboard.

Step 2. Press and hold [01] key for 5 seconds until the indicator keeps flashing.

Step 3. On your Bluetooth device, find the Bluetooth name "iClever IC-BK10 Keyboard" and click to connect it.

Step 4. The status indicator will turn blue after successful pairing.

Pair with the 2nd device

Step 1. Slide the "OFF/ON" key to power on the keyboard.

Step 2. Press and hold [02] key for 5 seconds until the indicator keeps flashing.

Step 3. On your Bluetooth device, find the Bluetooth name "iClever IC-BK10 Keyboard" and click to connect it.

Step 4. The status indicator will turn blue after successful pairing.

Pair with the 3rd device

Step 1. Slide the "OFF/ON" key to power on the keyboard.

Step 2. Press and hold [03] key for 5 seconds until the indicator keeps flashing.

Step 3. On your Bluetooth device, find the Bluetooth name "iClever IC-BK10 Keyboard" and click to connect it.

Step 4. The status indicator will turn blue after successful pairing.

Note:

- Each Bluetooth channel can pair with only 1 device.
- When you turn on the keyboard, it will connect with the last-used device automatically.
- If the connection fails, please try as below:
  (1) On your device, delete the Bluetooth connection records of "iClever IC-BK10 Keyboard".
  (2) On your device, turn Bluetooth off and turn Bluetooth on again and follow the above instructions for re-pairing.

b. How to switch the devices that have already been connected?

Press [01] / [02] / [03] key to switch among connected devices.

Note:

Do not press and hold [01] / [02] / [03] key more than 5 seconds when you switch among connected devices.

c.How to re-connect a Bluetooth channel that has been already connected?

Step 1. Press [01] / [02] / [03] key to choose the Bluetooth channel 1/2/3 you want to re-connect.

Step 2. Press and hold [01] / [02] / [03] key for 5 seconds to enter Bluetooth pairing mode again.

Step 3. On your Bluetooth device, find the Bluetooth name "iClever IC-BK10 Keyboard" for connection.

Step 4. The status indicator will turn blue after successful pairing.

HOW TO SWITCH THE LANGUAGE

Windows 10: win + space or alt + shift
Mac OS: ctrl + space
iOS: ctrl + space
Note: there is no common way to switch input language for Android.

HOW TO SET YOUR DESIRED LANGUAGE

As this is a multilingual keyboard, set the language of the device to your desired language before use.

For iOS devices:
Settings > General > Keyboard > Keyboards > Add New Keyboard > Select desired language

For Windows devices:
Win > Settings > Time&Language > Language > Add a language > Select desired language

For Mac OS devices:
Apple > System Preferences > Keyboard > Input Sources > Click "+" > Select desired language

SYSTEM REQUIREMENTS

1. iOS 9.0 and above
2. Mac OS X 10.12 and above
3. Windows XP / Vista / 7 / 8 /10, PC with a Bluetooth host.
4. Android 3.0 and above with Bluetooth HID profile (Smartphones and Tablets)

Note:
This keyboard is not fully compatible with Samsung Smart TV, Mac mini, iPad mini 5, Nokia phones and Bluetooth adapter.

CHARGE THE KEYBOARD

If the keyboard stops working, please use the included charging cable directly to connect the keyboard with the computer USB port for charging.
(Note: Output: DC 5V/200mA; USB charger is not included.)

FAQ

Q: Keyboard fails to connect.
- Charge the keyboard for 30 minutes.
- On your device, delete/remove the previous connection record of "iClever IC-BK10 Keyboard".
- On your device, turn Bluetooth off, and then turn Bluetooth on again.
- Make sure that your iClever device and computer are within close proximity of each other.
- Try on a different computer/smart phone/tablet.

Q: Keyboard frequently gets disconnected or laggy.
Typing lag most often occurs as the result of a lack of memory/system setting/PC poor performance/signal environment. Please try as blow to check:

- Restart your Bluetooth device.
- Charge the keyboard for 30 minutes.
- Make sure that your iClever Bluetooth keyboard and computer are within close proximity of each other.
- Do not use it on metal surfaces.
- Try to move it away from any device that could emit wireless waves, such as microwave, cordless phone, baby monitor, wireless speaker, garage door opener, WiFi router, Computer power supplies and metal
- Make sure your operating system (OS) is up to date.
- Check if there are any updates running in the background that may cause the delay.
- Try on a different computer/smart phone/tablet.

FRIENDLY TIPS

This keyboard is not splash, dust and water resistance, please avoid splashing water and drooping some snacks on the keyboard so as not to affect the normal use of the keyboard.
