PET-7000 / ET-7000 User Manual http://ftp.icpdas.com/pub/cd/6000cd/napdos/et7000_et7200/document/

What's in the Box?

PET-7000/ET-7000 Module

Plastic Rail

Quick Start

Factory Default Settings

Network Connection	Default	Authentication	Default
IP Address:	192.168.255.1	User name:	Admin
Subnet Mask:	255.255.0.0	Password:	Admin
Gateway:	192.168.0.1		

Connecting to Network, Computer, and Power

Non-PoE

PoE

Assigning a Valid IP Address – Method 1

1. Install eSearch from <http://ftp.icpdas.com/pub/cd/6000cd/napdos/software/esearch/>
2. Launch search and click “Search Server”

3. Double-click the name for your module on the list

4. Enter the network configuration and click “OK”

5. **Repeat Step 2. to search the module again**

To make sure your modifications take effect.

3-2 Assigning a Valid IP Address – Method 2

1. **Set the IP configuration on your computer**

The ET-7000 module comes with the default IP address of 192.168.255.1, you must choose an IP address for the computer in the range of 192.168.255.2 – 192.168.255.253 that is not in use.

2. **Launch your web browser to go to the ET-7000 web interface**

Enter the factory default IP address 192.168.255.1 for the ET-7000 as the URL in the browser and press Enter.

3. **Fill out the User name and Password**

Fill out the factory default user name and password “Admin” and then click “OK”.

4. **Assign a valid IP address for your ET-7000 module**

1. Click “**Configuration**”
2. Click “**Network Settings**” in the sub-menu
3. Enter a valid IP address for your ET-7000 module.
4. Click the “**SUBMIT**” button.

5. Restore the original IP address to your computer

Logging in to the ET-7000 Module

1. Enter the new IP for the ET-7000 as the URL in the browser
2. Fill out the User name and Password “Admin” again
3. Welcome to the ET-7000 website
