ICT BILLET LS3 Camaro Alternator Bracket Kit

Product Information

Specifications

- **Product Name:** LS3 Camaro Alternator Bracket Kit
- **Model Number:** IN 551971-LS3-3
- **UPC:** 840117204911

Product Usage Instructions

Installation Steps

1. Begin by identifying all the components in the kit as listed in the manual.
2. Follow the provided diagram for proper placement and orientation of each part.
3. Ensure all necessary tools are ready for installation, including wrenches and sockets.
4. Start by mounting the alternator bracket securely onto the designated mounting points on the vehicle.
5. Attach the spacers and pulleys according to the specified sizes and positions.
6. Secure all connections with the appropriate bolts and tighten them to the recommended torque settings.
7. Double-check all connections and alignments before starting the vehicle.

Maintenance Tips

- Regularly inspect the bracket kit for any signs of wear or damage.
- Ensure all bolts and connections remain tight to prevent loosening during operation.
- Clean the pulleys and spacers periodically to remove any dirt or debris buildup.
- Refer to the user manual for any specific maintenance requirements recommended by the manufacturer.

FAQ

- **How do I know if this bracket kit is compatible with my vehicle?**

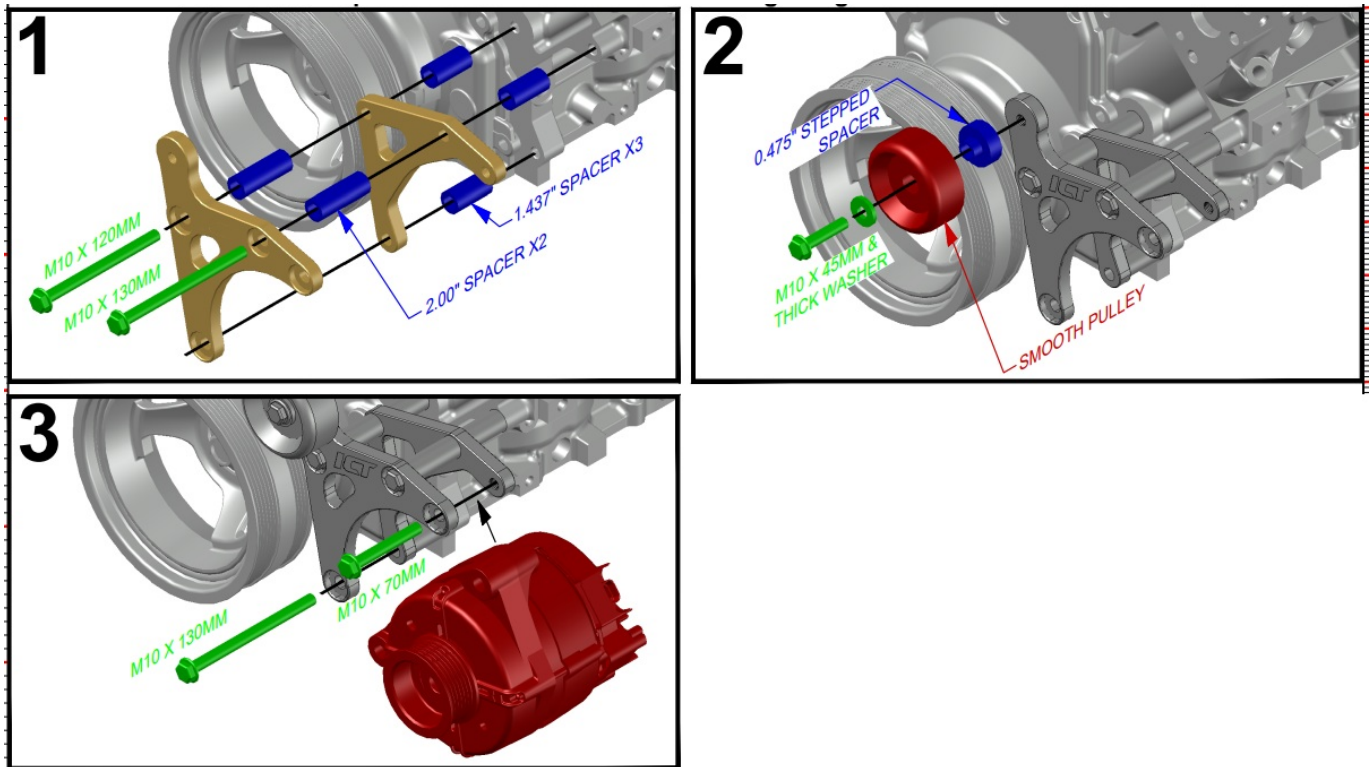

Check the product specifications and consult with your vehicle's manual or a professional mechanic to ensure compatibility before purchasing.

- **What is the recommended torque setting for the bolts in this kit?**

The recommended torque settings can be found in the user manual provided with the kit. It is crucial to follow these guidelines to prevent over-tightening or under-tightening of bolts.

WARNING: Cancer and Reproductive Harm – www.P65Warnings.ca.gov

ASSEMBLY INSTRUCTION

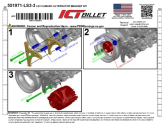

WARNING: Proposition 65 – This product can expose you to chemicals including lead, which is known to the State of California to cause cancer, birth defects, or other reproductive harm. For more information go to www.P65Warnings.ca.gov **ALUMINUM** – Most of the aluminum alloys used today contain some level of lead, usually less than .1%. Lead is known to the state of California to cause cancer and reproductive harm. Most aluminum alloys are physiologically inert in their solid form, and the lead is contained within, however user-generated dust and/or fumes may pose a hazard if inhaled or ingested. Heating beyond a certain temperature may also provide avenues for exposure. **STEEL BOLTS** – Steel is an iron alloy with several metals including Nickel and Chromium. Both Nickel and Chromium are known to the State of California to cause cancer and reproductive harm respectfully. This warning applies to stainless steels as well.
