IKEA IDENTISK Wok with Lid

Before first use

- Wash with washing-up liquid and rinse with water before using the first time.

Cleaning

- Always wash the product by hand after use.
- Do not use steel wool or anything that may scratch the coating. Dishwasher detergent and waste powder that solidifies cooking oil can affect the surface.
- The base is slightly concave when cold, but expands to flatten out when heated. Always leave the cookware to cool before cleaning it. This allows the base to resume its shape and helps to prevent it from becoming uneven with use.

Good to know

- This cookware is suitable for use on all types of hobs.
- By placing the cookware on a hob with the same or a smaller diameter you can save energy.
- Always lift the cookware when moving it on a glass ceramic hob to avoid the risk of scratching the hob.
- Do not let the cookware boil dry since the base can become skew by overheating and the coating can lose its non-stick properties.
- The cookware is provided with non-stick Teflon® Select coating, which means you can cook food without or with a small amount of fat or oil.
- Use only wooden or plastic utensils without sharp edges.
- Bear in mind that the cookware gets hot during use. Always handle with pot holders.
- The handle can be damaged by the flame when the cookware is used on a gas hob.
- If you have any problem with the product, contact your nearest IKEA store/Customer Service or visit www.ikea.com.
