① Tips

To ensure the best possible wireless performance, please make sure there are no obstacles and electromagnetic interference between the camera and router.

3 Installing the Camera

Troubleshooting

Problem	Solution
The APP says “Failed to configure device network”	<ul style="list-style-type: none"> • Reset your Camera and connect it again. • Some cameras only support 2.4GHz, while some routers have dual-band, 2.4G/5G. Make sure you are connecting 2.4GHz only.
No audio	<ul style="list-style-type: none"> • Ensure the audio function on the camera is turned on. • Ensure audio is turned up on the viewing device.
Human detection not working	<ul style="list-style-type: none"> • Ensure you have enabled “Human Detection” in the Device Settings screen of the Imou LifeApp.
The device cannot work normally or start?	<ul style="list-style-type: none"> • Check the LED indicator status. If the light is not in green, press and hold the reset button for 10 s to reset the camera.
How to connect the camera to a new Wi-Fi?	<ul style="list-style-type: none"> • If the camera is offline, reset the camera, and configure the camera again.
Connection is time?	<ul style="list-style-type: none"> • Check if the distance between the camera and the router, the camera, and the smartphone is within 5 m (16.4 ft) during the connection.
When the Micro SD card is full, how is the recorded video saved?	<ul style="list-style-type: none"> • When the Micro SD card is full, the system will overwrite the previously recorded videos. Save the important information in time.
The device is offline?	<p>Check the indicator status:</p> <ul style="list-style-type: none"> • If the green light is on, check whether the router can connect to the Internet. If the Internet is working, restart the camera. • If the red light flashes, reset the camera, and then configure the camera again. • If the red light is on, it means the camera is faulty.
