Troubleshooting

Problem	Solution
Cannot set up the camera	•Ensure your mobile device and the camera are within range of your Wi-Fi router. •Ensure the LED indicator on the camera is flashing green before beginning setup.
The APP says 'Failed to configure device network'	•Reset your Camera and connect it again. •Some cameras only support 2.4GHz, while some routers have dual-band, 2.46/5 G. Make sure you are connecting 2.4GHz only.
The app says °Failed to bind"	The camera is already connected to Wi-Fi, but the router is: •Not connected to the Internet •Poor network status •The Wi-Fi signal is not stable due to obstacles or electronic interference
No picture / signal	•Ensure the LED indicator on the camera is flashing steady green. See 'LED Status' section for details if otherwise. •Ensure the camera is properly connected to power using the included USB power adapter. •Try repositioning the camera, router, or both to improve signal strength.
Picture is not clear	•Check the camera lens for dirt, dust, spider webs. Clean the lens with a soft clean cloth. •Remove the vinyl cover on the camera lens.
No audio	•Ensure the audio function on the camera is turned on. •Ensure audio is turned up on the viewing device.
Phone is not reading QR code	•Clean the camera lens of your Smartphone •Ensure that there is enough light on the QR code •Don't hold the QR code too close to the camera
