*Note: the bracelet can receive messages in 12 different languages: English, Czech, German, Spanish, French, Italian, Japanese, Korean, Portuguese, Russian, Simplified Chinese, Traditional Chinese, and others.*

## FAQ

**Can't find the bracelet or can't connect?**

**Android systems:**

1. Please make sure that the Bluetooth is turned on, and that the Bluetooth icon is not visible on the wristband screen (if the symbol is visible, it is connected). Put the bracelet next to the phone, and try searching and connecting again. The connection can be established with Android 4.4 or higher systems.
2. If you still cannot connect, enter **Settings-Application** manager Authorizations – **Application authorization.** Look for **Wearfit2.0,** allow access. Enter Settings again and turn on the **GPS tracking service.** Restart the phone and try again.

**IOS systems:**
Please make sure that the Bluetooth is turned on, and that the Bluetooth icon is not visible on the wristband screen (if the symbol is visible, it is connected, please forget the device). Go to **Settings- Bluetooth** – Forget device, and now the App can now detect the bracelet.

After linking the bracelet is not connected, or the battery is 0%?
The devices have not been linked correctly, please try again.
**No se muestran datos en la App?**
Swipe down to update the data, these will be synchronized and displayed in the App. Automatic data synchronization will occur the first time the bracelet and device are connected, and then again every hour. In addition, you must activate the hourly measurement. The App reads the data of the bracelet every hour (steps, heart rate, etc.). No data will be displayed if the time measurement is disabled.

Go to app setting-reset factory setting-press-smart band tum off- tum on the smart band arid connect to the APP again. The data will be able to load on the APP.

**TI me is not synchronized .**
**Go to Setting**-Application management-tum on APP access connect the smart band and the APP again-Pull down to refresh the APP.
