## USE AND FUNCTIONS

A neutral density filter is used to reduce the amount of light that enters the lens without modifying the original colours.

It allows the photographer to select combinations of large aperture in

bright sunshine or long exposure times which would otherwise produce overexposed pictures.

Thanks to this variable ND filter you will not need to carry with you several filters with different densities. Your variable ND filter includes all densities!

## HOW TO MOUNT ON CAMERA

Follow the steps below to install it correctly

1. Screw back part (smaller) of filter into front part of your lens -with screw fixation system.

**NOTE:** if you already have a protective filter installed on your lens you do not need to remove it. You can install your Variable ND filter on top of it without any problem.

2. You can now start using your Variable ND filter.
3. To vary filter density, twist mobile ring and you will notice how the image lightens or darkens.
4. Density varies from 2 to 400 light paths.

## COMPABILITY

This filter is compatible with all 52mm and 58mm lenses.

## Limited Warranty

- ✓ This product is guaranteed for 2 years from the date of purchase.
- ✓ Warranty is effective since the commercial invoice duly is filled and sealed settlement.
- ✓ If there is any problem with the product, the user should contact us in the address: [sat@imperielectronics.com](mailto:sat@imperielectronics.com). Once received, the doubts, incidents and problems will be resolved by email. If this is not possible and the problem persists, the guarantee will be processed in accordance with current law.
- ✓ The warranty is extended for two years, referring only to manufacturing defects
- ✓ The expedition to the nearest service center or our central office to be made prepaid. The item must arrive well packed and with all its components.
- ✓ Assume no liability for damages arising from misuse of the product
- ✓ The warranty does not apply in the following cases:

1. If you have not been followed this manual correctly
2. If the product has been tampered
3. If it has been damaged by improper use
4. If the defects have arisen as a result of power failures
