Mini Sway 12V Path Light

Read through the manual for the transformer and cable before installing this fixture | This product may only be used within the in-lite system. If components are used in the system that do not originate from in-lite, the warranty no longer applies | Install the in-lite system components (fixtures, transformers, mini-connectors, Easy-Locks and cable connectors) so that they can easily be replaced | Never use the in-lite low-voltage cable in combination with 100-240V. This is only suitable for use with the components of the in-lite 12 volt low-voltage system.
