## Introduction

This Inateck docking station is a versatile storage device for duplicating hard drives as well as a high capacity USB 3.0 storage. The simple docking design offers quick access and removal of your hard drives for storage or data offline clone. With USB 3.0 the dock ensures high-bandwidth transfer speeds up to 5 Gbps and it also supports full SATA III bandwidth of 6 Gbps. Reverse compatible with USB 2.0 and 1.1, this enclosure is a perfect solution for data transfers or data backup.

## Overview

## Technical Specifications

<b>Product Name</b>	USB3.0 Dual SATA HDD Docking Station with Offline Clone Function
<b>Model Number</b>	Inateck FD2005
<b>Weight</b>	294
<b>Color</b>	Black
<b>Drive Size</b>	2.5"/3.5" SATA I/II/III HDD/SSD
<b>Interface</b>	USB3.0 up to 5Gbps
<b>Material</b>	ABS plastic
<b>Hot Plug, Plug &amp; Play</b>	Supported
<b>Licenses</b>	CE, FCC
<b>Dimensions</b>	158mm length×100mm width×68mm height
<b>Environmental</b>	Storage: -20 to 70 ° C; Operating: 5 to 40 ° C
<b>Operating Systems</b>	Windows XP/7/8/8.1/10, Mac OS 9.0 and higher
<b>Tool free</b>	Yes
<b>Driver</b>	No software or drivers required

## Package Contents

FD2005 Docking Station ×1  
 USB 3.0 Data Cable ×1  
 DC Power Adapter ×1  
 Instruction Manual ×1

## Troubleshooting/FAQ

Q: Unable to clone.

A: Please check if the capacity of Disk B is larger or equivalent to that of Disk A. Here the capacity means the actual capacity that can be used, instead of the one marked on the product. For example, the actual capacity of a disk marked 500GB might be 480GB only. The actual capacity of disks with the same marked capacity differs if they are produced by different producers. To ensure two disks of the same marked capacity have the same actual capacity, they should

Q: LED indicator turns off during offline offline clone.

A: Hard drive with bad sectors might not be directly cloned. It is advised to repair the bad sectors first or simply replace it with a new hard drive.

Q: I cannot see the capacity remaining in HDD B after the offline clone.

A: If the capacity for HDD B is bigger than HDD A, the capacity remaining in HDD B upon completion of the offline clone should be formulated to a new partition. Go to Control Panel and select Administrative Tools. From there, choose Computer Management. On the left panel, select Disk Management. Windows should

now give you the option to initialize the disk.

Q: Why can I not read more than 2TB?

A: The MBR is an old style which has limitations that allowing only partition sizes less than 2TB and only four primary partitions. You need to convert MBR to GPT if you want to make your partition size larger than 2TB.

Q: Can I recover my data in HDD B?

A: All data in HDD B will be deleted once offline clone starts. Before you attempt to clone your hard drive, we highly recommend backing up all your data first.

Q: How come my hard drives are not showing up?

A: Disconnect the FD2005 from your computer. Wait a few moments and then reconnect the device; Connect the FD2005 to another USB port. If the problem still exists, the hard drive might need to be reformatted. If needed open up Disk Management which can initiate / format / partition hard drives. You can also use third-party software such as Fdisk, DM or PQ Magic to do this.
