Infinity Instruments Saffron Yellow 9-inch Clock

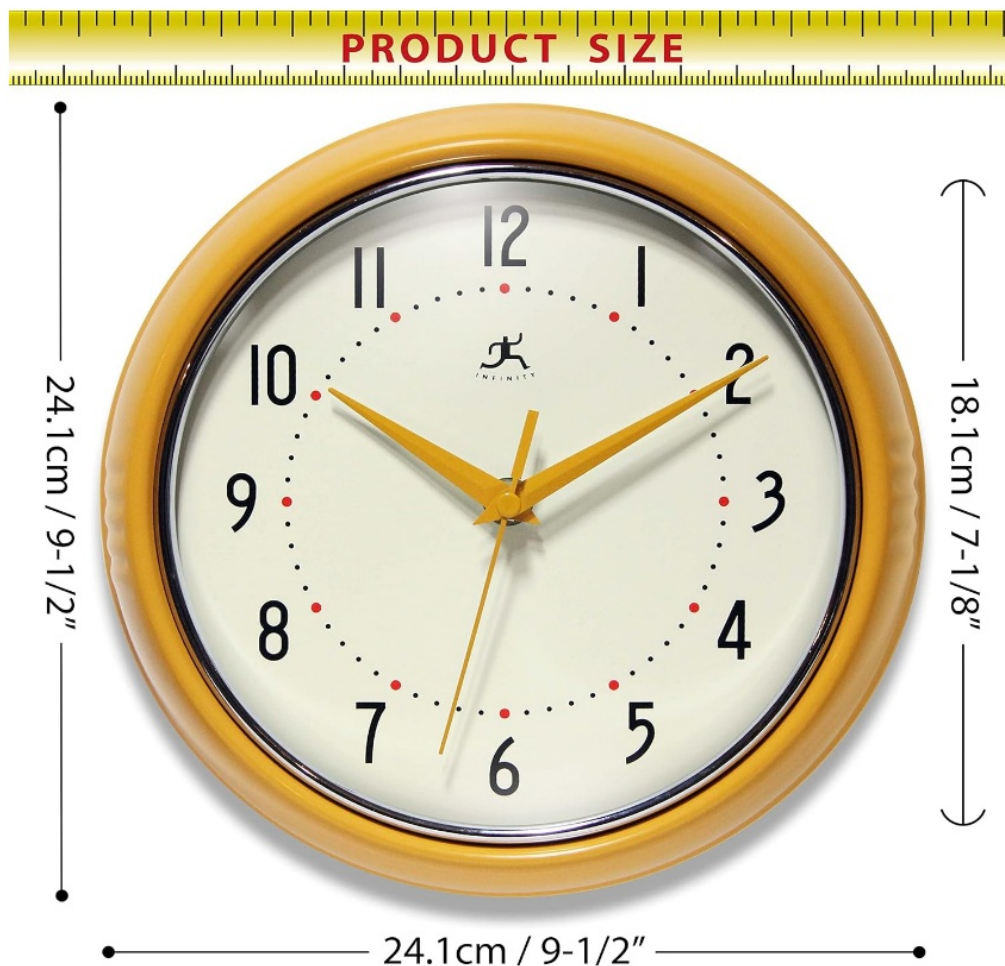

INTRODUCTION

The Infinity Instruments Saffron Yellow 9-inch Wall Clock is a chic homage to mid-century design that will add a touch of nostalgia to your house. This vintage wall clock, which was released on September 3, 2020, is a great decorative element for living rooms, dining rooms, kitchens, and more since it combines classic design with contemporary technology. It is **\$34.99** and has a silent quartz sweep movement that reduces bothersome ticking noises and creates a calm atmosphere. Its metal hands, glass lens, and aluminum frame all exhibit fine craftsmanship, and its striking black numerals stand out against the warm saffron yellow dial. This 9.5-inch wall-mounted clock, which is made by the reputable clock manufacturer Infinity Instruments, is both aesthetically pleasing and dependable. The clock has mounting hardware for simple setup and runs on a single AA battery, which is not included. This retro clock is a great option if you're looking for a statement piece that is both stylish and useful.

SETUP GUIDE

- **Unpack with Care:** Gently take the clock and all of its accessories out of the box.
- **Check for Damage:** Before continuing, make sure the glass lens and frame are undamaged.
- **Prepare a Wall Hook:** Depending on the type of wall, install your own mounting hook or use the one that is supplied.
- **Select the Proper Site:** Pick a level, dry area that is out of direct sunlight and has good sight.
- **Install Battery:** Installing a new AA battery (not provided) requires opening the battery compartment.
- **Verify Polarity:** When putting the battery in, make sure the positive and negative terminals line up.
- **Set the Time:** Select the appropriate time by turning the adjustment dial (never manually move the hands).
- **Close Battery Compartment:** Snap the lid back into place firmly.
- **Locate Hanging Point:** Find the mounting hole on the clock's back to determine the hanging point.
- **Mark Wall Spot:** Mark the location of the hook or nail using a pencil.
- **Install Hook or Nail:** Make sure it is firmly fastened to support 1.5 pounds.
- **Hang the Clock:** Make sure the clock is level and carefully hang it on the hook.
- **Check Function:** Make sure the second hand goes smoothly and softly.
- **Adjust if Necessary:** Move to improve visibility or balance.
- **Monitor Timekeeping:** Verify that it is maintaining proper time after a few hours.

CARE & MAINTENANCE

- **Replace Battery Annually:** Every six to twelve months. To prevent leaks, switch when the clock slows down or

stops.

- **Use Alkaline Batteries:** Superior for steady performance and have a longer lifespan.
- **Dust Weekly:** Gently wipe the frame and glass with a gentle microfiber cloth.
- **Avoid Direct Sunlight:** Protect internal components from heat damage and color fading.
- **Avoid Humidity:** To prevent moisture damage, keep your clock away from sinks, showers, and stoves.
- **Check for Loose Screws:** Check the back and rear case for any loose screws on a regular basis.
- **Clean with Mild Soap:** If necessary, use a towel soaked in soapy water to wipe; never submerge.
- **Steer Clear of Harsh Chemicals:** Avoid using abrasive sprays or window cleaner on the lens or frame.
- **Verify Time Accuracy:** Verify that the clock is not losing or gaining time on occasion.
- **Reposition for Aesthetic:** Shift it to new locations to accommodate changes in interior design or seasonality.
- **Store Batteries Properly:** Keep extra AA batteries in a dry, cool location.
- **Avoid Magnetic Fields:** To maintain the accuracy of your timepiece, stay away from speakers and microwaves.
- **Take Care When Moving:** To avoid internal damage, take out the battery before moving.
- **Examine Hand Movement:** Verify that the hands for the hour, minute, and second do not come into contact with one another.
- **Use Wall Anchors for Drywall:** Proper anchoring on plaster or drywall surfaces will prevent tilting or falling.

TROUBLESHOOTING

Issue	Possible Cause	Solution
Clock not working	Dead or improperly inserted battery	Replace battery and check polarity
Hands not moving	Loose battery contact or internal issue	Reseat battery or contact support
Time drifting or inaccurate	Low battery or quartz movement defect	Use a fresh AA battery; reset time
Clock ticking sound present	Mechanical error despite silent claim	Contact manufacturer for evaluation
Hard to read in dim light	No luminous features	Use under well-lit conditions
Clock won't hang straight	Misaligned hook or uneven surface	Use level tool during installation
Second hand stuck or jerky	Battery low or internal obstruction	Replace battery and check for dust interference
Glass lens fogging	Humid environment	Move to a drier location; avoid kitchen steam
Clock stops after short use	Incompatible or cheap battery	Use a high-quality alkaline AA battery
Scratches or damage on arrival	Shipping mishandling	Report to seller immediately for return or replacement
