RC250 5-Key Zigbee Wireless Smart Remote Control

Connect your Innr Remote Control to Philips Hue

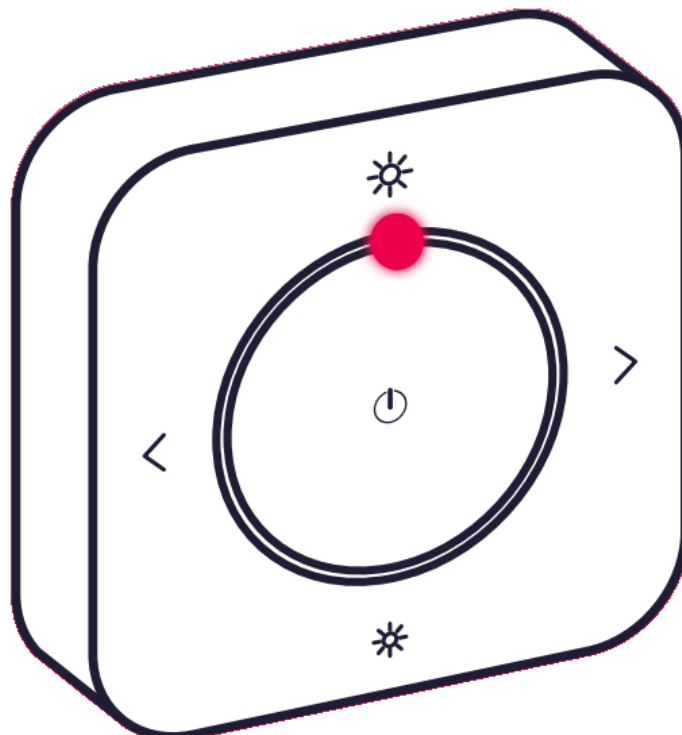

Step 1: Connect the Remote Control to the Philips Hue Bridge

Open the Philips Hue app and start searching for lights.

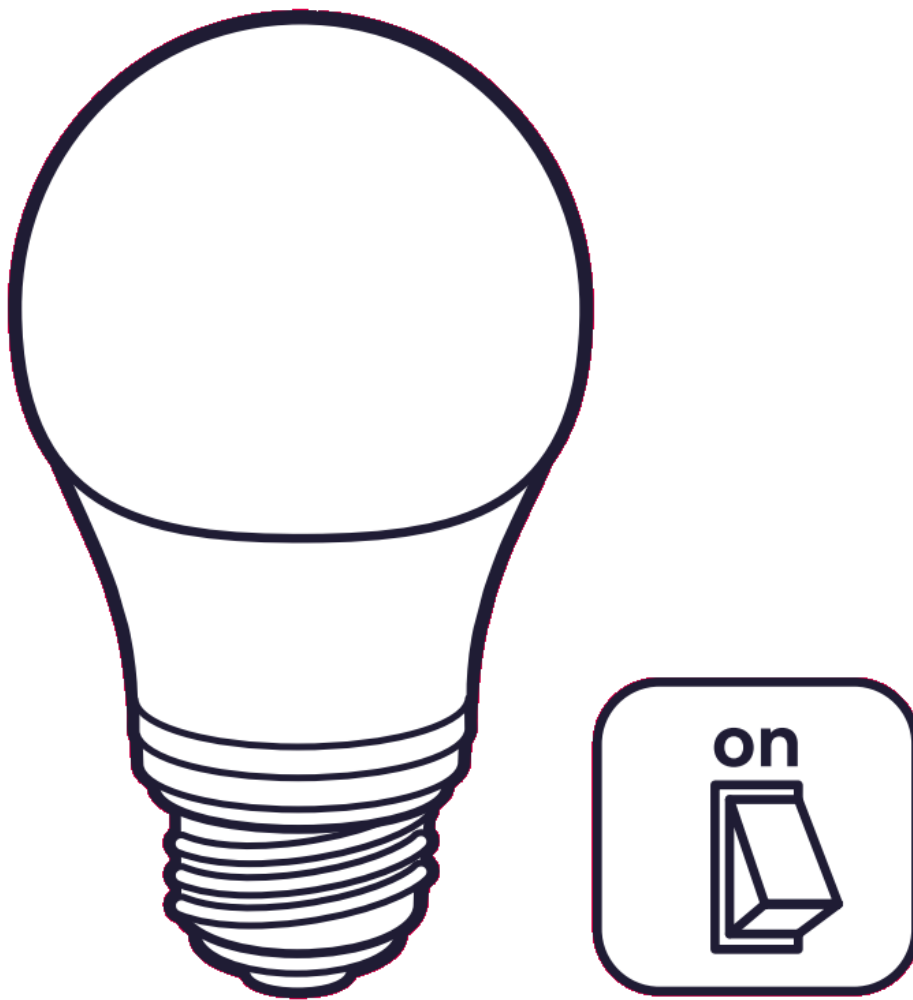

Remove the plastic tab to put the Remote Control in pairing mode. The LED on the front will start blinking once per second.*

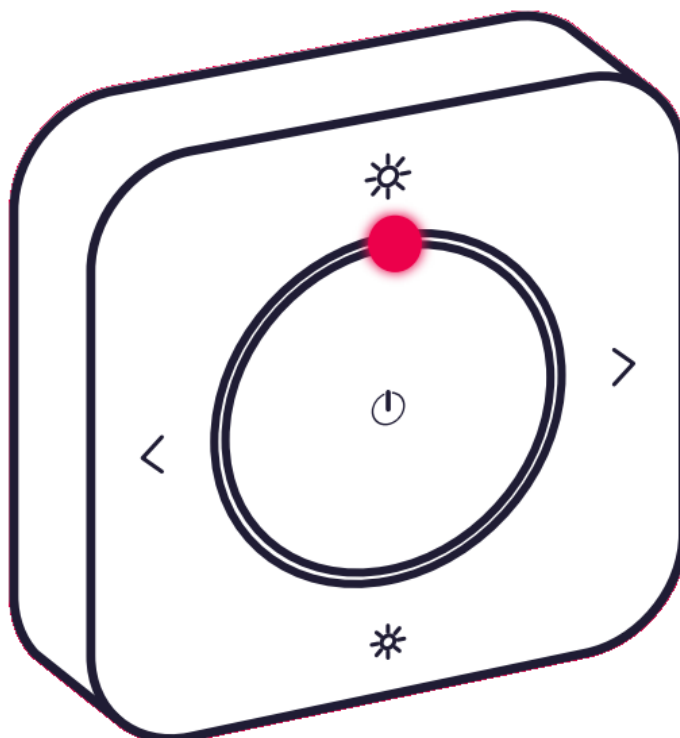

The LED will rapidly blink twice to confirm it's successfully connected.
NOTE: the Remote Control will not appear in the Philips Hue app.

*No blinking LED? Press and hold the reset button behind the battery lid for 3 seconds.

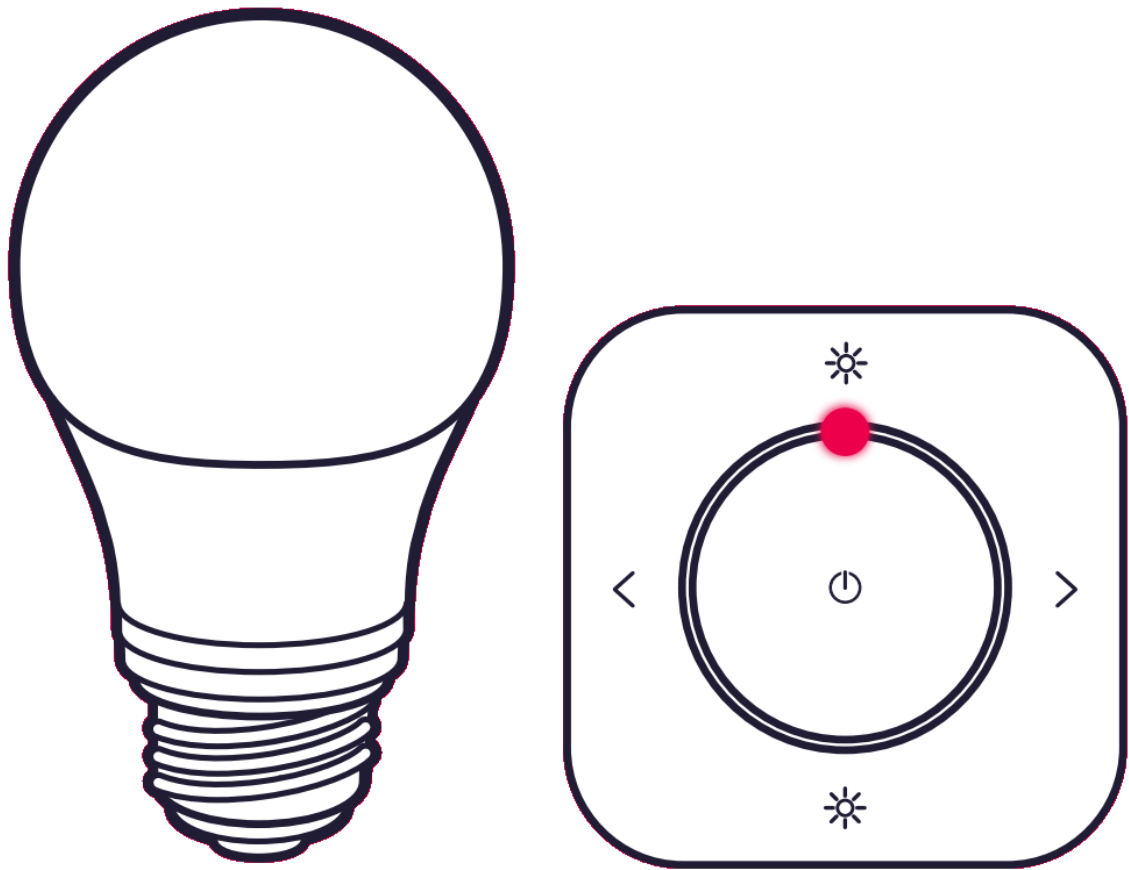

Step 2: Connect the Remote Control to the individual lights

Turn the light off for at least 5 seconds using the wall switch and turn it on again. The light is in pairing mode for 1 minute from now.

Press the button in the middle together with the top button (big sun) and hold for 3 seconds. The LED will start blinking once per second.

Bring the Remote Control close to the light (< 10cm). The light will blink to confirm it's successfully connected. Repeat Step 2 for all lights that you want to connect to the Remote Control

Successful!

You can now control the connected light(s) from the app and with Remote Control.
