Insight Intro Mechanism With Seat Slide and Lumbar Support

Overview

3 Lever Independent Mechanism

Simplistic controls located on either side make this mechanism easy to use and ultra-ergonomic. This quick and easy mechanism has been developed to put the user in full control of their chair, enabling them to work in maximum comfort throughout the working day.

1. Ratchet Back Height Adjustment

Lift or drop the backrest to the required height for maximum back support while sitting.

2. Independent Back Angle Adjustment

Lift the lever and apply pressure to the backrest until the angle is comfortable. Release the lever to lock the backrest in position.

3. Independent Seat Angle Adjustment

Lift the lever and apply pressure to the front or back of the seat until the angle is comfortable. Release the lever to lock the seat angle in position.

4. Seat Height Adjustment

Raise the lever and adjust the height of the seat to maximize comfort. Release the lever when your seat is in your preferred position.

5. Body Weight Tension Control

Wind the hand wheel clockwise to decrease resistance, allowing for more free movement. Wind the hand wheel anti-clockwise to increase the resistance.

6. Inflatable Lumbar

The hand pump at the rear of the seat will inflate the lumbar when squeezed. Depressing the valve will deflate the lumbar.

7. Seat Slide

Raise the lever to alter seat depth by sliding the body forward, and push down the lever to lock into position.

Please note that this product carries a maximum weight limit of 150kg

Specifications

Feature	Description
Weight Limit	150kg
