NIGHTLIGHT INSTRUCTIONS

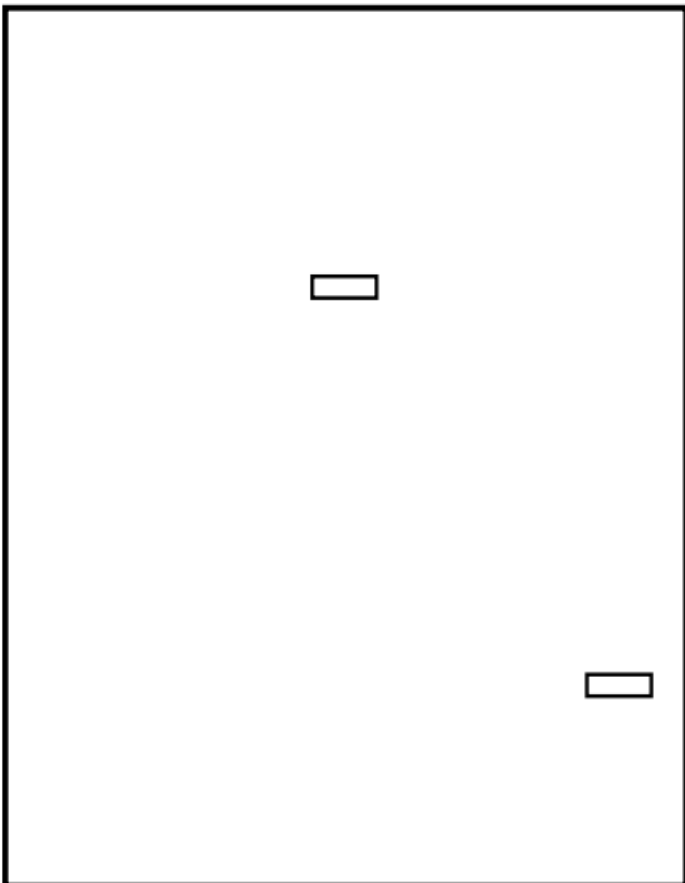

- 4 Circuit Layers & Battery Trays

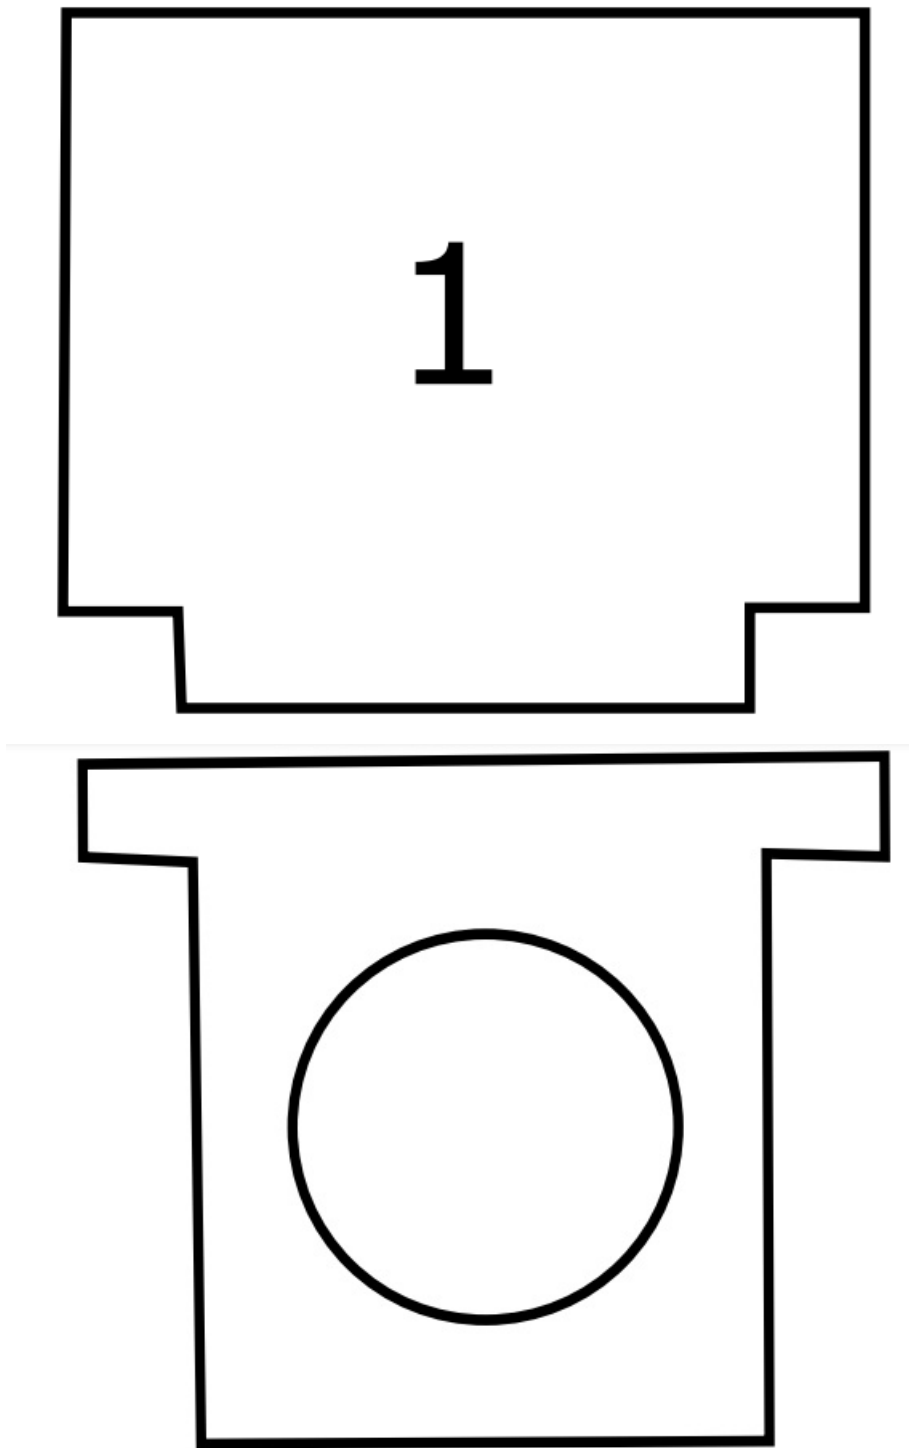

- 2 Backing Cards

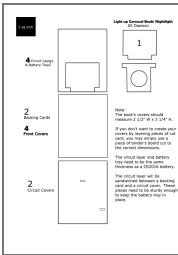

- 4 Front Covers
- 2 Circuit Covers

Note: The book's covers should measure 2 1/2" W x 3 1/4" H. If you don't want to create your covers by layering pieces of cut card, you may simply use a piece of binder's board cut to the correct dimensions. The circuit layer and battery tray need to be the same thickness as a CR2016 battery. The circuit layer will be sandwiched between a backing card and a circuit cover. These pieces need to be sturdy enough to keep the battery tray in place.
