Turning off the system

- Press the home button on the remote
- Choose the Settings section on the welcome screen
- Select the Shutdown option within here and this will shutdown the software as well as the mobile unit or the room pc and projectors

Measured Outcomes Editor Pro Required

- The Sense Micro Interactive Projector offers a wealth of benefits by providing measurable outcomes through its advanced tracking capabilities. To begin, simply seat a resident or group of residents at the start of a session. Subsequently, the Well Being Suite will prompt you to rate how they are feeling. During the session, the Well Being Suite or Imaginate Suite will discreetly monitor various outcomes. Consequently, you can generate detailed reports over a selected date range.
- Furth more, by monitoring a variety of metrics, the Sense Micro delivers comprehensive well being scores. This, in turn, allows users to gain valuable insights into their physical, mental and emotional health, thereby promoting a balanced and holistic approach to well being.
- You will be provided with a username and password to access your personalized portal
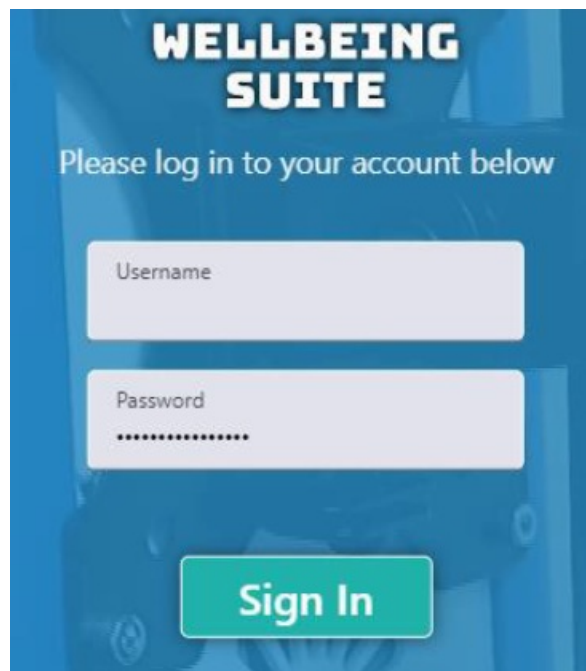

Measured Outcomes

- Once inside the portal, you can start to add each user via the add new button.
- It will ask you to type in the user's name, once all users are entered into the portal we can start to use the tracking capabilities of the Well Being Suite.

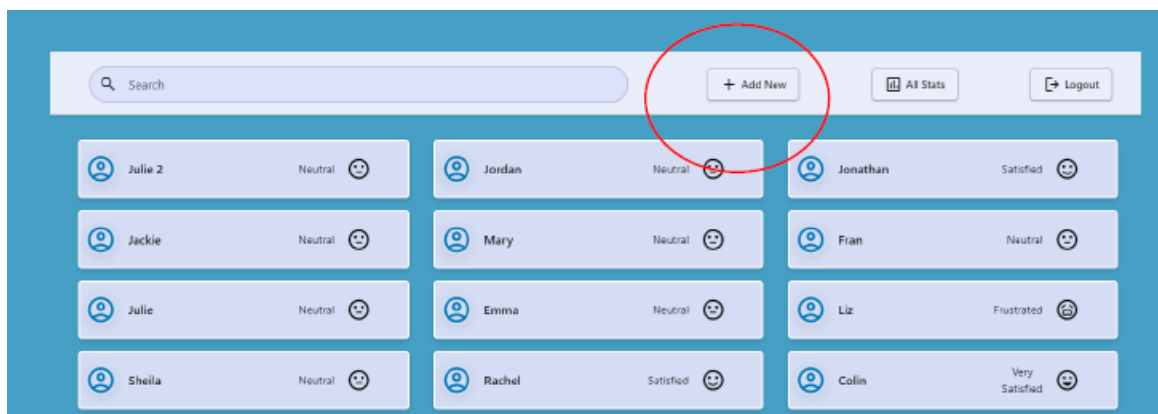

- To allow the system to track an individual you will need to seat them at the table within the Software. If you press the button on the remote with the four lines, it will bring up a box to allow you to seat a user or multiple users. When seating a user, it will ask for a well being score at the beginning of the session, it will ask again at the end and this can be selected via the OK button on the remote, the user or caregiver can make this assessment. This allows for the system to track wellbeing scores at the beginning of a session and at the end.
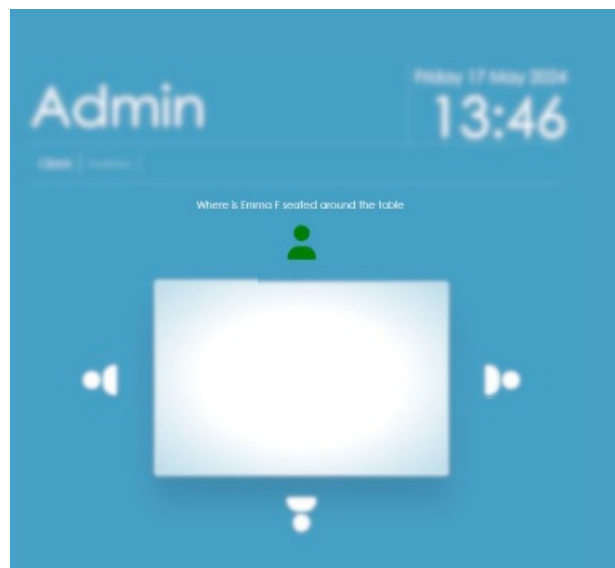

Measured Outcomes

Accessing the Data

We can access the data the system has been tracking through the portal, either for the setting as a whole or an individual
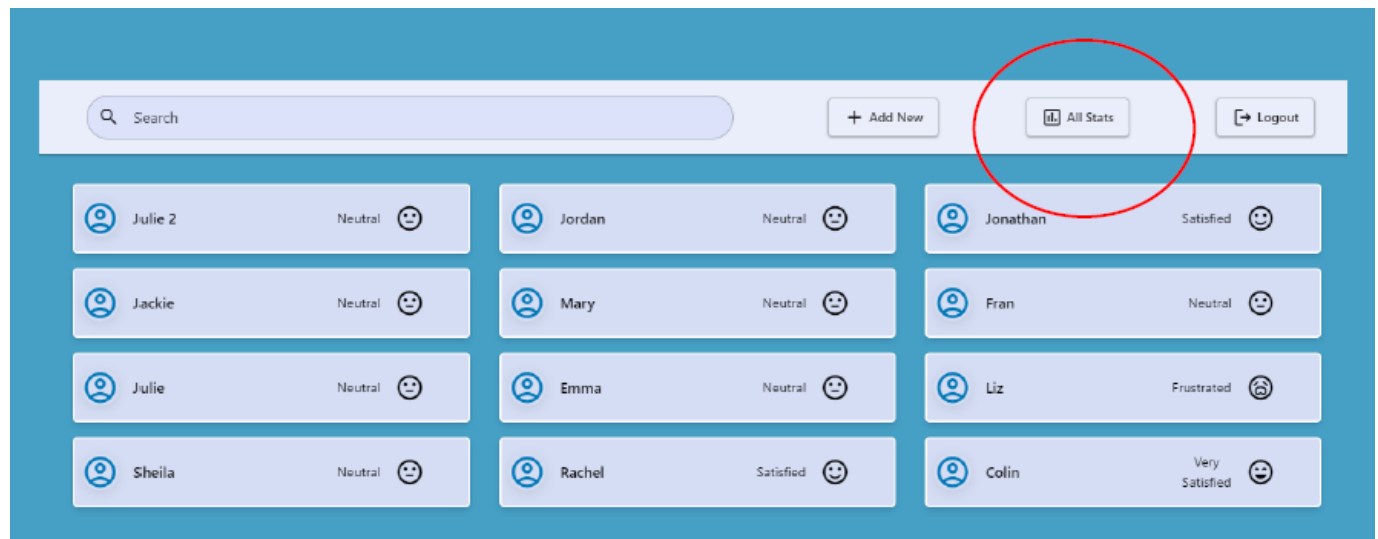

What is measured?

The Well Being suite will measure:

- Wellbeing scores
- Average reaction time
- Slowest and fastest reactions
- Playtime
- Left and right hand usage
- Interaction areas
- Popularity of activities

Help

- The help guide can be found in the top right hand corner and will bring up a video user guide of everything covered in this guide
- If you are experiencing any technical difficulties with the machine or software please call 01283 551551
- Remote training sessions are available please call 01283 551551 to arrange.
- Office Hours are 9am 5pm.

Frequently Asked Questions

- **Q: How do I access new themed events?**
  - A: Themed events are available in the Editor Portal section where you can check daily for new events.
- **Q: How do I control hardware functions with the app?**
  - A: If you have an Immersive Room, you can control hardware functions such as lighting and aromatherapy from within the app.
