Current Release

Version 1.1 – April 2024

Important Notes

- To remove virtual cards from sites in STid customers must complete the virtual card revocation process. Once a virtual card has been revoked in Integriti the end user will have to refresh their STid Mobile ID application on their mobile device to remove the virtual card from their mobile device. Only then Integriti will be able to complete the virtual card removal process.
- Virtual Card generation feature requires the persisted connection to be running.

Licensing Requirements

- The Integriti STid Mobile Credential Integration requires an Integriti/Infiniti Professional, Business or Corporate Software Edition license to be present on the product key running the integration.
- Additionally, the Integriti Mobile Credential Integration requires the 996964 Mobile Credential Management Integration license to operate.

Minimum Installed Integriti Version
Integriti Pro/Infiniti v22.1 or higher

- API Version
  - STid Web API v2.1.0.20
- Tested Against
  - STid Mobile ID Cloud Service v2.5.0.101
- Issues Resolved
  - Card Creation with Insufficient credits: Resolved an issue where cards would still be created on the STid Portal even if they failed to generate in Integriti
