Instructions

Connections & Indicators

LEDs

The LED indicators make it easier to monitor the switch and its connections.

Ports

All RJ45 ports on the switch support Auto-MDI/MDI-X functionality, so you

can use straight or crossover UTP/STP cables to connect the RJ45 ports to PCs, routers, hubs, other switches, etc. Cat5e/6/6a UTP/STP cables provide optimal performance; if a status LED doesn't indicate a link or activity, check the corresponding device for proper setup and operation.

Power

Use the included power adapter to connect the “DC IN” port to a power outlet. Confirm that the PWR LED on the front panel is lit.
