INTELLINET IPS-08F-140W 8-Port Fast Ethernet PoE+ Switch

Connections & Indicators

LEDs

The LED indicators make it easier to monitor the switch and its connections.

NOTE: Ports 1 – 8 can provide power to a connected powered device, and all powered devices should comply with IEEE 802.3at/af.

Ports

All RJ45 ports on the switch support Auto-MDI/MDI-X functionality, so you can use straight or crossover UTP/STP cables to connect the RJ45 ports to PCs, routers, hubs, other switches, etc. Cat5e/6 UTP/ STP cables provide optimal performance; if a status LED doesn't indicate a link or activity, check the corresponding device for proper setup and operation.

Power

Use the included power cord to connect the device (on the rear panel) to an AC outlet. Confirm that the Power LED on the front panel is lit.

LED	Status	Status Description
Power	Off	Power Off
	On	Power On
LNK	Off	No link established.
	On	Valid port connection.
	Flashing	Sending or receiving data.
PoE	Off	No PD is connected to the port.
	On	The connected device is receiving power.
MAX 1 (1-4); **MAX 2** (5-8)	On	Power output is at or above the maximum power budget. No additional connected devices will be powered.

Power

- Use the included power cord to connect the device (on the rear panel) to an AC outlet. Confirm that the Power LED on the front panel is lit.

Installation

Prior to use, it is recommended that the switch be placed/positioned:

- on a level surface that can support the weight of the switch;
- with at least 25 mm (approx. 1") of clearance for ventilation;
- away from sources of electrical noise: radios, transmitters, broadband amplifiers, etc.;
- within 100 m (approx. 328') of network devices it's to be connected to.
