MS8009R LED Digital Clock

Thank you for purchasing this instrument from Intellitronix. We value our customers!
INSTALLATION GUIDE
LED Digital Clock
Part Number: M8009
* Always disconnect the battery before attempting any electrical work on your vehicle.*

WIRING INSTRUCTIONS

Note: Automotive circuit connectors are the preferred method of connecting wires. However, you may solder if you prefer.
Ground – **Black** Connect directly to the engine block.
Power – **Red** Connect to a switched +12V source, such as the ignition.
Memory – **Pink** Connect directly to the battery to retain the time when the ignition is shut off.
Dimmer – **Purple** Connect to the parking lights to dim the LEDs 50% when the headlights are on. However, do not connect to the headlight rheostat control wire; the dimming feature will not work properly.

Once the gauge is wired in, program the time with the two separate push buttons for hours and minutes.

Made in America
