Contents [hide]

Important Information

Item number: IN701KNX1000000

Integrate any KNX device or installation with an ASCII BMS or any ASCII IP or ASCII serial controller. This integration aims to make KNX communication objects and resources accessible from an ASCII-based control system or device as if they were a part of the ASCII system and vice versa.

Features And Benefits

✅ **Easy integration with Intesis MAPS**

The integration process is quickly and easily managed using the Intesis MAPS configuration tool.

✅ **Configuration tool and gateway automatic updates**

Both the Intesis MAPS configuration tool and the gateway's firmware can receive automatic updates.

✅ **Control up to 3000 KNX communication objects**

Up to 3000 KNX communication objects can be controlled by the gateway.

✅ **ASCII bus automatic write request on value change**

When an ASCII value changes, the gateway automatically sends a write request to the ASCII bus.

✅ **Commissioning-friendly approach with Intesis MAPS**

Templates can be imported and reused as often as needed, significantly reducing commissioning time.

✅ Support for KNX TP devices

The gateway supports KNX TP (twisted pair) devices.

✅ ASCII Serial (232/485) and ASCII IP support

The gateway fully supports both ASCII IP and ASCII Serial (232/485).

✅ Personalized ASCII strings use

It is possible to use personalized ASCII strings on this gateway.
