Intpw B0B12XMTDQ USB C Docking Station

Product Information

The resolution setting for Windows 10 and macOS allows you to adjust the display settings of your computer. You can set the display mode to PROJECT, PC screen only, Duplicate, Extend, or Second screen only. The DisplayLink DL-6950 chip used in this product only supports two active outputs at a time, and DP and HDMI 1 cannot be used simultaneously.

product Graphics Settings for Windows 10

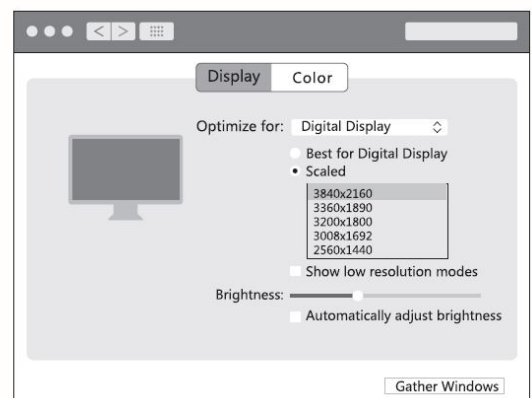

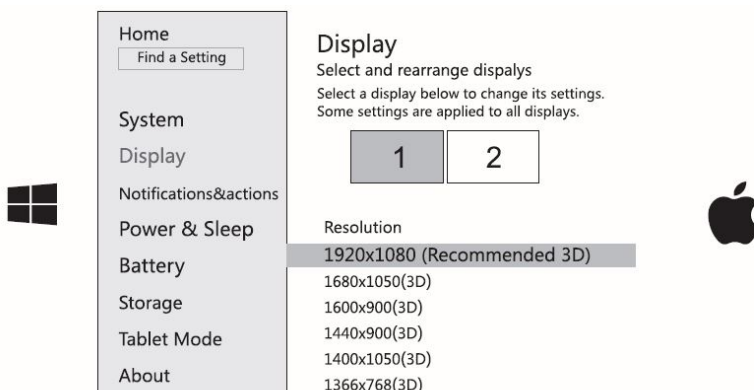

1. Right-click on the desktop and select Display Setting.
2. Click the + P keys simultaneously to select the display mode.
3. Select one of the following display modes:
 - PROJECT
 - PC screen only
 - Duplicate
 - Extend
 - Second screen only
4. Choose the source device and the DP/HDMI 1 Display or HDMI 2 Display.
5. In Duplicate mode, you can view the same content on both screens.
6. In Extend mode, you can extend your desktop onto the second screen.

product Graphics Settings for macOS (including M1/M2)

1. Click the Apple icon and select About This Mac > Displays > Displays Preferences > Arrangement.
2. To use Mirror Mode, check the Mirror Displays option.
3. To use Extend Mode, cancel the Mirror Displays option.
4. Choose the source device and the DP/HDMI 1 Display or HDMI 2 Display.
5. In Mirror mode, you can view the same content on both screens.
6. In Extend mode, you can extend your desktop onto the second screen.

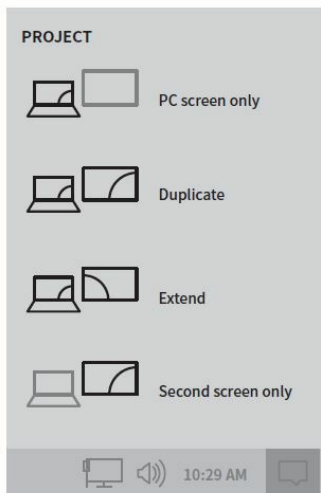

Resolution Setting for Windows 10 & macOS

- Right Click Desktop > “Display Setting”
- Apple Icon  > “System Preferences” > “Displays”

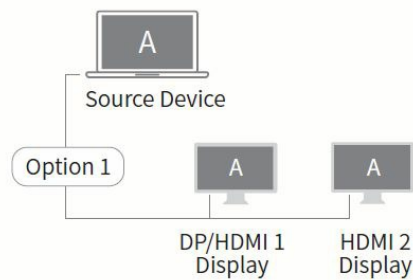

Graphics Settings for Windows 10

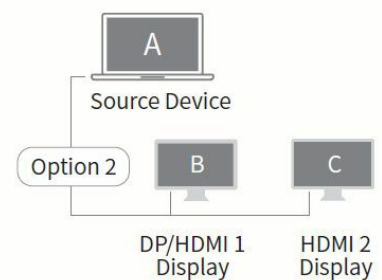

- Click the "⊞" + "P" simultaneously to select the display mode.
