Step 1

- Remove the bracket from the product and drill two mounting holes in the wall spaced apart (see Figure A).

Step 2

- Screw the bracket to the mounting holes on the wall with the screws in the accessories.

Step 3

- Install the speaker on the bracket, adjust it to your desired angle and tighten the screw.

FCC

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. this device may not cause harmful interference, and this device must accept any interference received, including interference that may cause undesired operation.
2. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, under Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used by the instructions, may cause harmful interference to radio communications. However, there is no

guarantee that interference will not occur in a particular installation. Suppose this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on. In that case, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirements. The device can be used in portable exposure conditions without restriction

FAQs

Q: How do I pair multiple speakers?

A: To pair multiple speakers, ensure all speakers are in networking mode and follow the instructions in the manual to connect them using the remote control.

Q: What do I do if the speakers are not connecting?

A: If the speakers are not connecting, try resetting them by turning them off and on again, or refer to troubleshooting section in the user manual for further assistance.
