Software Setup

 Make sure that the iOttie Connect app and the Alexa app aren't open at the same time! The device won't connect to your phone if they are

1. Download the iOttie Connect app to make sure your Easy One Touch Connect has the most up-to-date firmware installed. The iOttie Connect app is available from the Apple App Store or the Google Play Store.
2. Once firmware is updated, close the iOttie Connect App.

3. Download the Alexa app on your smartphone. The Alexa app is available from the Apple App Store or Google Play store.

4. Log into the Alexa App with your Amazon account.
5. Go to the Device menu and tap + add a device.
6. In the setup, scroll down on the "All Devices" list and select "Headphones."
7. Select "Done."

 There will be no visual cue on the screen that announces the connection except that the color of the light should be blue.

 The Alexa app must be running in the background of your phone for the device to work. When app is reopened, it will reconnect automatically

Using Alexa on the Easy One Touch Connect

A wake word should always be used to ask Alexa anything. The wake word is simply "Alexa."

1. The mute button on the back of the mount turns Alexa on and off.
 1. Press and hold for 2-3 seconds to keep the device muted. Once placed in mute, the device will stay on mute.
 2. Just press the mute button again (don't hold) to turn Alexa on. Pressing the mute button can also be used instead of the Wake Word.
