- Windows
- Mac OS
- Linux
- Android/Google/Smart TV

How to use:

1. **Recharge your keyboard:** when your keyboard ▭▭ is always flashing even without any operation, this means your keyboard is in low power capacity. Please charge it by connecting micro end of USB cable to your keyboard and another end to computer. (the ⊟ will light up and be steady on, and then go out when it is fully charged.)
   Note: To ensure a better performance, please charge the keyboard the first time you use it.

▭▭ Low-power indicator
⊟ IR/Charging indicator
🎧 Signal indicator
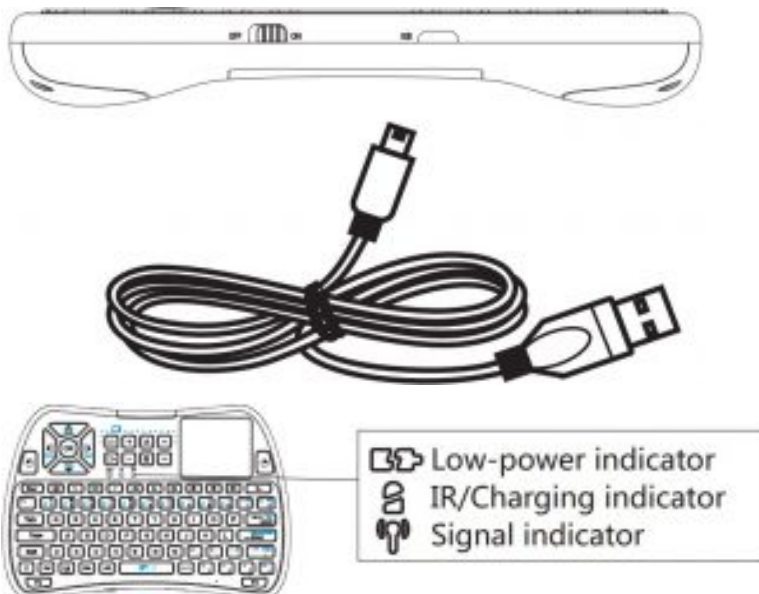

2. **Open the battery cover and remove the insulation sticker;**
3. **Establish Bluetooth connection:**
   - **Step 1**.Find and turn on 'Bluetooth' function on your devices, search new devices around;
   - **Step 2.**Turn on ipazzport keyboard and press key 'FN' and 'Esc' (with an signal icon) simultaneously till the blue indicator flashes (about 2-5 seconds)
   - **Step 3.**Your devices will display "iPazzPort Bluetooth' option, click it to connect, the blue indicator goes off after done. (If can't find it,need to delete the existing bluetooth records,because device only support limited bluetooth connection)

IR learning

Power/Source/Volume+-/ Channel up/down / Other two free buttons
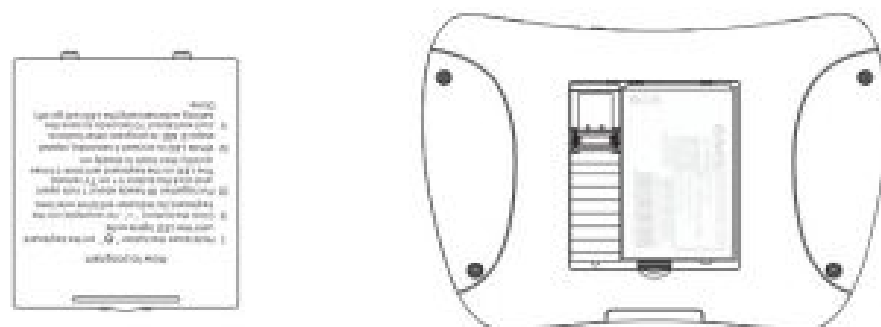

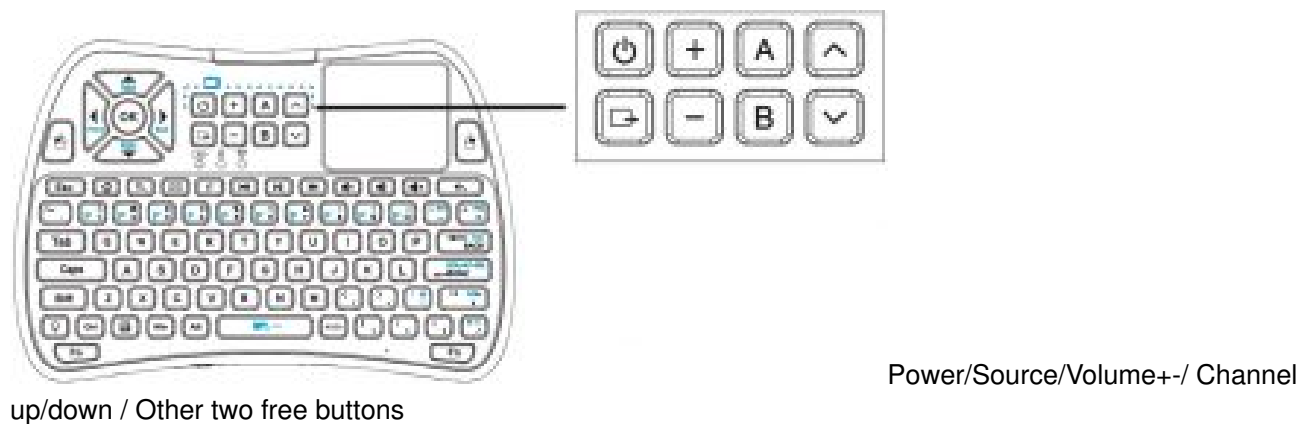

The detailed steps are printed on the battery cover

Steps:

1. On iPazzPort keyboard,hold down the button " " seconds, until the second light flash to solid.
2. Put together your keyboard remote and the source IR remote, head to head, approximately 1 inch apart.
3. Press the button on keyboard "+" for example, and the LED will start blinking and be steady on, then press the button V+ on your source IR remote.
4. The LED on the keyboard will blink 3 times quickly, indicating a successful learning
5. While LED is on solid, repeat steps 3) & 4) to program other target buttons.
6. When the learning process is all completed, just wait for its auto setting process approximately 10 seconds till the LED goes off.
7. It is ready to use, now.
   Note: Please wait for 3 seconds before programming the next button.

Multi-touch function

the touchpad supports various gesture as described below:
One finger:

1. Slide to move the cursor;
2. Keep pressing " FN" and slide freely to scroll up/down the screen (to change the entire touchpad to a scrollbar);
3. Single click to act as the left mouse;
4. Double click to open a file or application;
5. Two quick clicks on the touchpad, and don't let your finger go on the second click and slide to move the file or picture.
6. Hold down the left mouse button and slide your finger on touchpad to select the target.

Two finger: Click to act as right mouse.
Scroll Bar:slide the scroll bar to up/down the page.

FAQ:
