**iPGARD SDVN-82-X 8 Port 2 User SH Secure DVI-D Matrix KVM**

## Product Information

The product is a multi-functional device designed to perform various tasks. It is equipped with advanced technology and features to enhance usability and convenience.

### Key Features:

- Compact and lightweight design
- Multiple functions for versatile usage
- Easy to operate and user-friendly interface
- High-quality materials for durability and long-lasting performance
- Advanced technology for efficient and reliable operation

## Product Usage Instructions

Follow the instructions below to properly use the product:

1. Ensure that the product is placed on a stable and flat surface.
2. Connect the necessary power source to the product.
3. Refer to the product's control panel or interface to select the desired function or mode of operation.
4. If applicable, adjust any necessary settings such as speed, temperature, or intensity.
5. Carefully place the item to be processed or operated into the designated area or slot.
6. Activate the product by pressing the appropriate button or switch.
7. Monitor the progress of the operation and make any adjustments if required.
8. Once the operation is complete, safely remove the item from the product.
9. Turn off the product and disconnect it from the power source.
10. Clean and maintain the product according to the provided instructions to ensure optimal performance and longevity.

**Note:** For specific functions or operations, refer to the detailed instructions provided in the product manual.

## TECHNICAL SPECIFICATIONS

VIDEO		
Format	DVI-I Dual Link	
Host Interface	SDVN-42-X/SDVN-44-X	(4) DVI-I 29-pin (female)/DVI-D
	SDVN-82-X/SDVN-84-X	(8) DVI-I 29-pin (female)/DVI-D
User Console Interface	SDVN-42-X/SDVN-82-X	(2) DVI-I 29-pin (female)/DVI-D
	SDVN-44-X/SDVN-84-X	(4) DVI-I 29-pin (female)/DVI-D
Max Resolution	2560 x 1600 @ 60Hz; 3840x2160 @ 30Hz	
DDC	5 volts p-p (TTL)	
Input Equalization	Automatic	
Input Cable Length	Up to 20 ft.	
Output Cable Length	Up to 20 ft.	
USB		
Signal Type	USB 1.1 and 1.0 Keyboard and Mouse only. USB 2.0 for CAC connection.	
Type A to B	SDVN-42-X/SDVN-44-X	(8)
	SDVN-82-X/SDVN-84-X	(16)
User Console Interface	(2/4) USB Type-A for keyboard and mouse connection only	
	(2/4) USB Type-A for CAC connection (P models only)	
AUDIO		
Input	(4/8) Connector Stereo 3.5mm Female	
Output	(2/4) Connector Stereo 3.5mm Female	
POWER		
Power Requirements	12V DC, 2A (minimum) power adapter with center-pin positive polarity. Quad head models require a 12V DC 3A (minimum) power adapter with center-pin positive polarity.	
ENVIRONMENT		
Operating Temp	32° to 104° F (0° to 40° C)	
Storage Temp	-4° to 140° F (-20° to 60° C)	
Humidity	0-80% RH, non-condensing	
CERTIFICATIONS		
Security Accreditation	Common Criteria Validated To NIAP, Protection Profile PSS Ver. 3.0	
OTHER		
Emulation	USB 1.1 and USB 2.0 Compatible	
Control	Front Panel Buttons	

## WHAT'S IN THE BOX?

SDVN Unit	4/8-Port Single-Head Secure DVI-D Secure KVM Matrix Switch
PS12VDC2A or PS12VDC3A	12V DC, 2A (minimum) power adapter with center-pin positive polarity. Quad head models require a 12V DC 3A (minimum) power adapter with center-pin positive polarity.
User Manual	

## SECURITY FEATURES

- **Anti-Tamper Switches**

Each model is equipped with internal Anti-Tamper switches, which sense attempts to open the device enclosure. Once the system identifies such an attempt, all the front panel LED's will flash rapidly and the unit will become useless by shutting off connection with all attached PCs and peripherals disabling any functionality.

- **Tamper-Evident Seal**

The enclosure of the unit is protected with a tamper-evident seal to provide a visual evidence if the unit has been opened.

- **Protected Firmware**

The controller of the unit has a special protection feature that prevents reprogramming or reading the firmware.

- **High Isolation on USB Channels**

Opto-isolators are used in the unit to keep USB data paths electrically isolated from each other, providing high isolation and preventing data leakage between ports.

- **Secure EDID Emulation**

The unit prevents unwanted and unsecure data to be transmitted through the DDC lines by means of secure EDID learning and emulation.

## INSTALLATION

### SYSTEM REQUIREMENTS

1. iPGARD Secure PSS is compatible with standard personal/portable computers, servers or thin-clients, running operating systems such as Windows or Linux.
2. The peripheral devices that are supported by the KVM are listed in the following table:

Console Port	Authorized Devices
Keyboard	Wired keyboard and keypad without internal USB hub or composite device functions, unless the connected device has at least one endpoint which is a keyboard or mouse HID class, KVM/KM extender;
Audio out	Analog amplified speakers, Analog headphones, Digital audio appliance.
Mouse/Pointing Device	Any wired mouse or trackball without internal USB hub or composite device functions, Touch-screen, Multi-touch or digitizer, KVM/KM extender.
User Authentication Device	Smart-card reader, PIV/CAC reader, Token or Biometric reader*

TOE-P and -X models only

### Single-Head Units

1. Ensure that power is turned off or disconnected from the unit and the computers.

2. Use a DVI cable to connect the DVI output port from each computer to the corresponding DVID IN ports of the unit.
3. Use a USB cable (Type-A to Type-B) to connect a USB port on each computer to the respective USB ports of the unit.
4. Optionally connect a stereo audio cable (3.5mm to 3.5mm) to connect the audio output of the computers to the AUDIO IN ports of the unit.
5. Connect monitors to the DVI-D OUT console port of the unit using a DVI cables.
6. Connect a USB keyboard and mouse in the two USB console ports.
7. Optionally connect ste COMMON ACES CARD, SMART AND READER) to the CA port in the user console interface.
8. Finally, power on the Secure KVM Switch by connecting a 12VDC power supply to the powerconnector, and then turn on all the computers.

**Note:** The computer connected to port 1 will always be selected by default after power up.

**Note:** You can connect up to 8 computers to the 8 port KVM and up to 4 computers to the 4 port KVM.

Figure 7-1: SDVN-44-X

#### IMPORTANT WARNINGS – For security reasons:

- This product does not support wireless devices. Do not attempt to use a wireless keyboard or a wireless mouse with this product.
- This product does not support keyboards with integrated USB hubs or USB ports. Only use standard (HID) USB keyboards with this device.
- This product does not support microphone audio input or line input. Do not connect any microphones or headsets with microphones to this device.
- Connection of authentication devices (CAC) with external power sources is prohibited.

#### EDID Learn:

- The Secure KVM Switch is designed to learn the connected monitor's EDID upon power up. In the event of connecting a new monitor to the Secure KVM Switch, a power recycle is required.

- The Secure KVM Switch will indicate to the user the EDID learn process by flashing the front panel's server signal.
- The monitor must be connected to the video output connector "1" located in the console space at the back of the Secure KVM Switch during the EDID learn process.
- If the read EDID from the connected monitor is identical to the current stored EDID in the Secure KVM Switch then the EDID learn function will be skipped.

## **CAC (COMMON ACCESS CARD, SMART CARD READER) INSTALLATION**

- The following steps are intended for the system administrator or IT manager only. If you have the optional CAC ports there will be 2 ports on a 2 host ports KVM and 4 ports on a 4 host ports KVM.
- CAC connection to the computer requires a USB cable connection separate from the keyboard and mouse. This allows the CAC to be connected independently from the keyboard and mouse. It also allows the user to select whether CAC for a certain computer is supported or not.
- Ensure that power is turned off or disconnected from the unit and the computer. Use a USB cable (Type-A to Type-B) to connect a USB port on a computer to its respective CAC USB ports on the KVM. Do not connect the USB cable if CAC functionality is not needed for that computer. Connect a CAC (smart card reader) to the CAC port in the user console interface.
- Power on the KVM by connecting a 12VDC power supply to the power connector, and then turn on all computers
- To enable CAC for any channel, press and hold the CAC button, then press the † button for three seconds. The BLUE LED should illuminate, indicating CAC is enabled.
- To disable CAC for any channel, use the front panel buttons – Press and hold the CAC button, then press the † button for three seconds once again. The BLUE LED should turn off, indicating that CAC is disabled.

## **CAC PORT CONFIGURATION**

The following steps are intended for the system administrator and operators (users).

**Note:** Only one computer connected to port 1 is required for this operation CAC port Configuration is an optional feature, allowing registration of any USB peripheral to operate with the KVM. Only one peripheral can be registered and only the registered peripheral will operate with the KVM. By default, when no peripheral is registered, the KVM will operate with any Smart Card Reader.

### **Configure the CAC Port via User Menu Options**

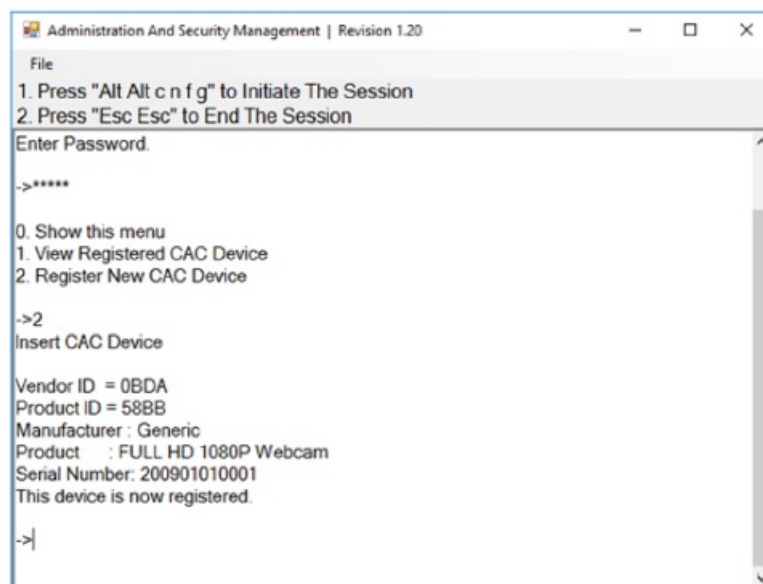

Figure 9-1: User Menu

1. Open the Administration and Security Management Program.
2. Using the keyboard, press the Alt key twice and type "config".
3. At this stage the mouse connected to the KVM/KM will stop functioning.
4. Enter the default username "user" and press Enter.
5. Enter the default password "12345" and press Enter.
6. Select option 2 from the menu on your screen and press Enter.
7. Connect the peripheral device to be registered to the CAC USB port in the console side of the KVM/KM and wait until the KVM/KM is reading the new peripheral information.
8. The KVM/KM will list the information of the connected peripheral on the screen and buzz 3 times when registration is completed.

#### **AUDITING: Dumping the Event Log via User Menu Options**

The following steps are intended for the system administrator.

**Note:** Only one computer connected to port 1 is required for this operation The Event Log is a detailed report of critical activities stored in the KVM or KVM memory. A comprehensive feature list and guidance for Administration and Security Management Tools can be found in the Administrator's Guide available for download from:

<http://ipgard.com/documentation/>

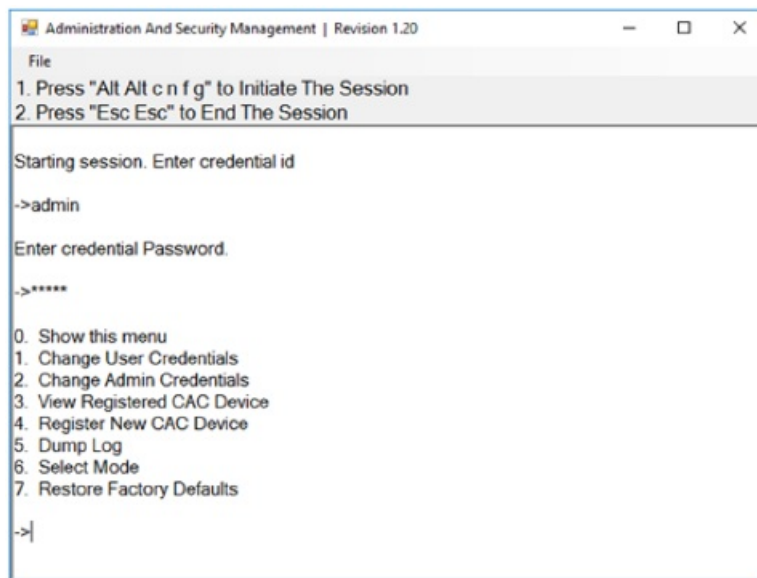

Figure 10-1

### To view or dump the Event Log:

1. Open the Administration and Security Management Program
2. Using the keyboard, press the Alt key twice and type “config”
3. Enter the default admin name “admin” and press Enter.
4. Enter the default password “12345” and press Enter.
5. Request a Log Dump by selecting option 5 in the menu. (Shown in Figure 10-1)

Figure 10-1 deaded istraman and Security Management Tool Guidance

### RESET: Restore Factory Defaults

The following steps are intended for the system administrator.

**Note:** Only one computer connected to port 1 is required for this operation

Restore Factory Defaults will reset all settings on the KVM to their original state

- KVM mode
- CAC port registration will be removed
- KVM settings will be reset to factory defaults

### To Restore Factory Defaults via User Menu Options:

1. Open the Administration and Security Management Program
2. Using the keyboard, press the Alt key twice and type “cnfg”
3. Enter the default admin name “admin” and press Enter.
4. Enter the default password “12345” and press Enter.
5. Select option 7 from the menu on your screen and press enter. (Menu shown in Figure 10-1)

See Administration and Security Management Tool Guidance for detailed information.

### LED's BEHAVIOR

User Console Interface – Display LED:

#	Status	Description
1	Off	Monitor is not connected
2	On	Monitor is connected
3	Flashing	EDID problem – Learn EDID to fix the problem

User Console Interface – CAC LED:

#	Status	Description
1	Off	Monitor is not connected
2	On	Monitor is connected
3	Flashing	EDID problem – Learn EDID to fix the problem

Front Panel – Port Selection LED's:

#	Status	Description
1	Red	View only mode
2	Green	Control Mode
3	Off	Display is disabled

Front Panel – CAC Selection LED's:

#	Status	Description
1	Off	CAC port is disabled or non-selected port
2	On	CAC port is enabled
3	Flashing	EDID learn in process

Front Panel – Port and CAC Selection LED's:

#	Status	Description
1	All Flashing	Connected peripheral to keyboard or mouse console ports is rejected

**IMPORTANT!**

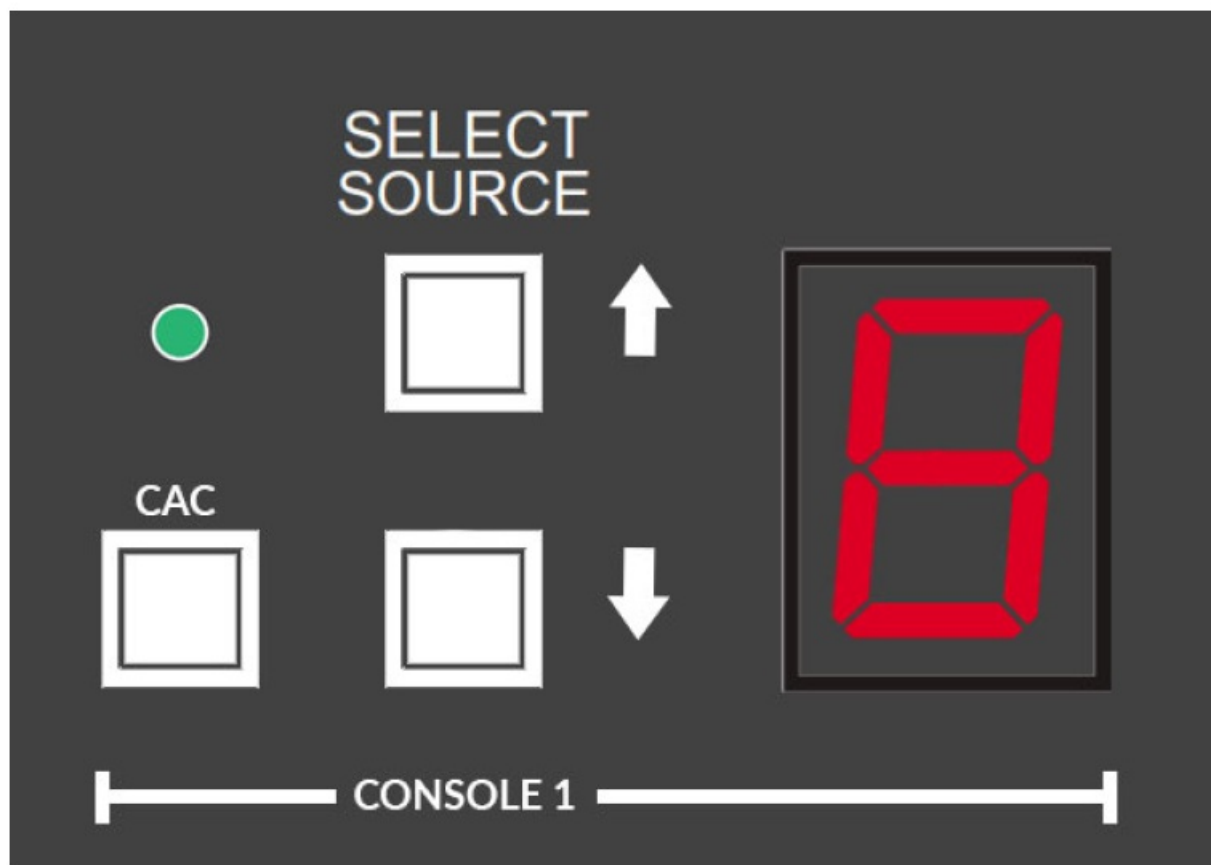

- If all the Front Panel LED's are flashing and the buzzer is beeping, the KVM has been TAMPERED with and all functions are permanently disabled. Please contact iPGARD technical support at [support@iPGARD.com](mailto:support@iPGARD.com).
- If all Front Panel LED's are on and not flashing, the POWER UP SELF TEST has failed and all functions are disabled.
- Check if any of the front panel port selection buttons are jammed. In this case, release the jammed button and

recycle the power. If power-up self-test is still failing, please contact iPGARD technical support at [support@iPGARD.com](mailto:support@iPGARD.com).

## SYSTEM OPERATION

### Front Panel Control

- Below is a list of commands sent through button presses on the front panel. Refer to the diagram below for the names of the buttons:
- Press CAC button – Toggle between Control and View mode
- Press UP button – Increment current channel, loop back to 1 after ch. 8
- Press DOWN button – Decrement current channel, loop back to 8 after ch. 1
- Press and hold the CAC button, then press the UP button – enables CAC mode only when user is already in control mode
- Press and hold the CAC button, then press the DOWN button – disables the display and KM control for that user.

Close-up of the Front Panel controls for the matrix series.

## TROUBLESHOOTING

### No Power

- Check the input voltage at the power supply and make sure that the voltage value is around 12VDC.

- Replace the power supply.

## **No Video**

- Check if all the video cables are connected properly.
- Connect the computer directly to the monitor to verify that your monitor and computer are functioning properly.
- Restart the computers.

## **Keyboard is not working**

- Check if the keyboard is properly connected to the unit.
- Check if the USB cables connecting the unit and the computers are properly connected.
- Try connecting the USB on the computer to a different port.
- Make sure that the keyboard works when directly connected to the computer.
- Replace the keyboard.

**Note:** The NUM, CAPS, and SCROLL Lock LED indicators on the keyboard are not supposed to light up if connected to the KVM.

## **Mouse is not working**

- Check if the mouse is properly connected to the unit.
- Try connecting the USB on the computer to a different port.
- Make sure that the mouse works when directly connected to the computer.
- Replace the mouse.

## **No Audio**

- Check if all the audio cables are connected properly.
- Connect the speakers directly to the computer to verify that the speakers and the computer audio are functioning properly.
- Check the audio settings of the computer and verify that the audio output is through the speakers.

## **No CAC (COMMON ACCESS CARD, SMART CARD READER)**

- Check if the USB cables connecting the unit and the computers are properly connected.
- Make sure the CAC port is enabled.

## **TECHNICAL SUPPORT**

For product inquiries, warranty questions, or technical questions, please contact [info@iPGARD.com](mailto:info@iPGARD.com).

## **LIMITED WARRANTY STATEMENT**

Extent of limited warranty iPGARD, Inc. warrants to the end-user customers that the iPGARD product specified above will be free from defects in materials and workmanship for the duration of 1 year, which duration begins on the date of purchase by the customer. The customer is responsible for maintaining proof of date of purchase.

iPGARD limited warranty covers only those defects which arise as a result of the normal use of the product, and do not apply to any:

- Improper or inadequate maintenance or modifications
- Operations outside product specifications
- Mechanical abuse and exposure to severe conditions

If iPGARD receives, during the applicable warranty period, a notice of defect, iPGARD will at its discretion replace or repair the defective product. If iPGARD is unable to replace or repair a defective product covered by the iPGARD warranty within a reasonable period, iPGARD shall refund the cost of the product. iPGARD shall have no obligation to repair, replace or refund unit until the customer returns defective product to iPGARD.

Any replacement product could be new or like new, provided that it has functionality at least equal to that of the product being replaced. iPGARD's limited warranty is valid in any country where the covered product is distributed by iPGARD.

#### **Limitations of warranty**

To the extent allowed by local law, neither iPGARD nor its third-party suppliers make any other warranty or condition of any kind whether expressed or implied with respect to the iPGARD product and specifically disclaim implied warranties or conditions of merchantability, satisfactory quality, and fitness for a particular purpose.

#### **Limitations of liability**

To the extent allowed by local law the remedies provided in this warranty statement are the customer's sole and exclusive remedies.

To the extent allowed by local law, except for the obligations specifically outlined in this warranty statement, in no event will iPGARD or its third-party suppliers be liable for direct, indirect, special, incidental, or consequential damages whether based on contract, tort or any other legal theory and whether advised of the possibility of such damages.

#### **Local law**

To the extent that this warranty statement is inconsistent with local law, this warranty statement shall be considered modified to be consistent with such law.

#### **NOTICE**

The information contained in this document is subject to change without notice. iPGARD makes no warranty of any kind with regard to this material, including but not limited to, implied warranties of merchantability and fitness for particular purpose. iPGARD will not be liable for errors contained herein or for incidental or consequential damages in connection with the furnishing, performance or use of this material. No part of this document may be photocopied, reproduced, or translated into another language without prior written consent from iPGARD, Inc.
