ISOACOUSTICS 892ASUB Aperta Sub Subwoofer Isolation

Instructions

1. Choose the location where the subwoofer will be positioned.
2. Place the Aperta Sub stand in position with the also acoustics logo facing forward. If the Aperta Sub stand will be positioned on a medium or thick carpet, attach the carpet disks underneath the isolators. The carpet disks

provide a strong connection in the carpet and a solid foundation for the Aperta Sub.

3. Gently lower the subwoofer on top of the Aperta Sub stand. The isolator should be positioned directly against the bottom of the subwoofer cabinet. The shape of the Aperta Sub stand allows positioning directly underneath the subwoofer cabinet without interference with the existing subwoofer feet. In some cases, the existing feet may need to be removed (if possible) to avoid interference.

Weight Capacity: 80 lbs (36.3 kg)
