ITC 69389 Surface Mount Docking Backup Light Installation Guide

Contents

ITC 69389 Surface Mount Docking Backup Light

Specifications

- Part Number: 69389
- Power Source: 12V DC
- Color: Black and Red
- Installation Location: Any suitable surface

Parts Needed

- Docking/Backup Light
- Mounting Screws
- Power Drill
- Safety Instructions
- Wire Nuts (not provided)

Installation Instructions

1. Remove the bezel if it is not already disassembled.
2. Determine the installation location for your light.
   - Select a suitable surface to mount the light.
3. Once the location is determined, drill a 0.5″ hole.
4. Connect the wires to a power source.
   - Use wire nuts to securely connect the wires.
   - Black (-) wire should be connected to the negative terminal.
   - Red (+) wire should be connected to the positive terminal.
5. Feed the wires back through the hole.
6. Screw the light in place using the provided screws.

7. Reattach the bezel.

FAQ

Q: Can this light be used underwater?

A: No, this light is not designed for underwater use. It is recommended to keep it dry and away from water.

Q: Can the light be connected to a different power source?

A: The light is designed to be connected to a 12V DC power source. Connecting it to a different power source may cause damage and void the warranty.

Q: What is the lifespan of this light?

A: The lifespan of the light depends on various factors such as usage, operating conditions, and maintenance. Generally, it can last for several thousand hours of continuous use.
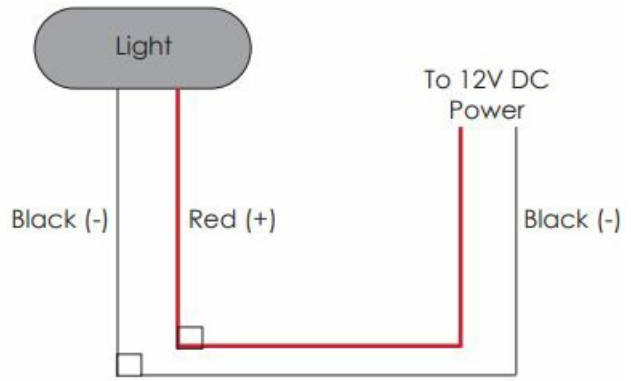

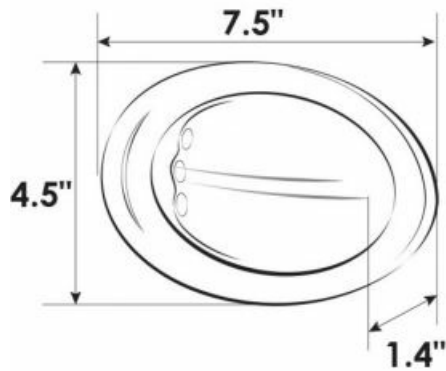

Part#: 69389

PARTS NEEDED

Docking/Backup Light	Mounting Screws	Power Drill	Wire Nuts (not provided)

Safety Instructions

- Disconnect power before installing, adding or changing any component.
- To avoid a hazard to children, account for all parts and destroy all packing materials.
