itsensor PYR-420 Class C Thermopile Pyranometer

GENERAL DESCRIPTION

- PYR1-420 and PYR2-420 are ISO 9060:2018 CLASS B (First Class) and CLASS C (Second Class) thermopile pyranometers for measuring solar irradiance in PV plants.
- PYR1-420 and PYR2-420 are equipped with electronics to amplify a very weak signal coming from the thermopile.
- They are composed of the best operational amplifiers on the market to guarantee linearity, noise immunity, constant behavior over time, and temperature variations. They have a 4 to 20 mA output signal.

DIMENSIONS

INSTALLATION

It is recommended to install the product at a minimum height of 180cm above the ground. There are the following fixing types:

- With M5 screw on flat bases;
- Bracket on a pole;
- Inclinal bracket in degrees

M5 screw on flat bases screw's thread must be 0,4cm + distance between the pyranometer and the base. (approx. 1,5 – 1,8 cm long.)

CALIBRATION

It is recommended to send to the factory for verifying calibration after 2 years of outdoor work.

MAINTENANCE

Reading is reduced if the dome is not clean.

1. Keep the dome clean using water or alcohol.
2. Keep instrument leveled.
3. Recalibrate every 2 years.
