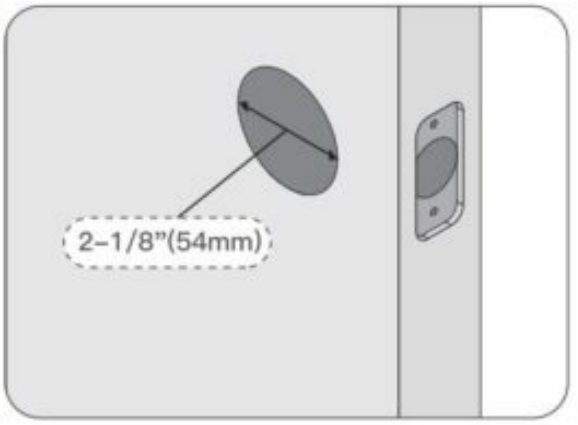
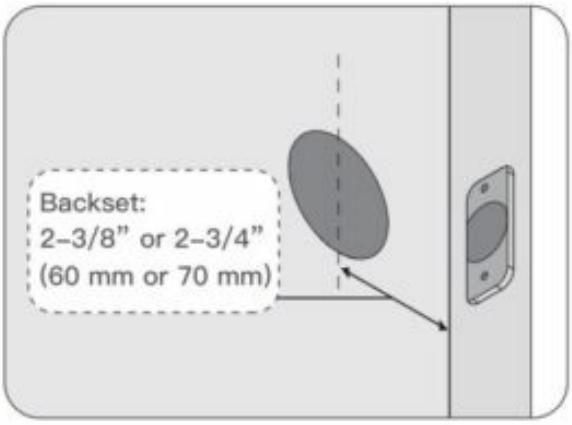
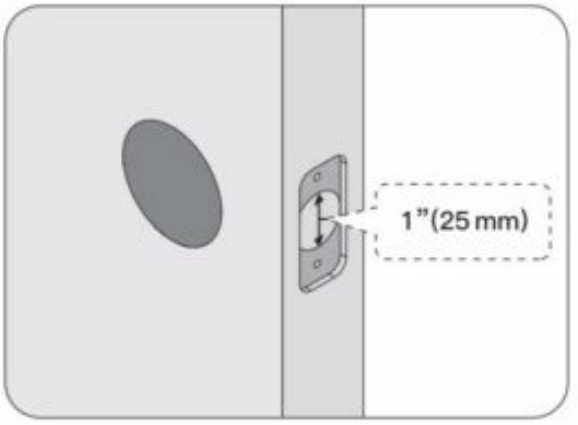
1 . Prepare the door and check dimensions



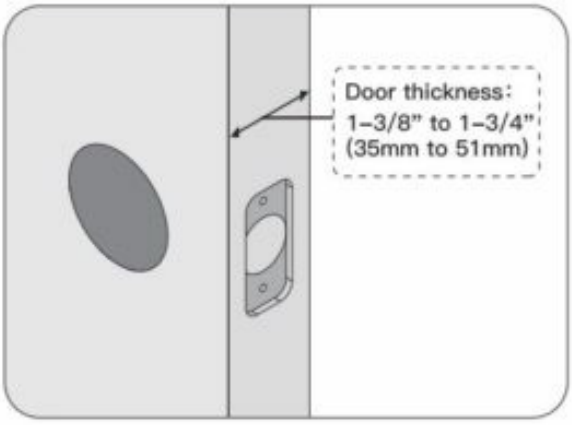
Measure to confirm that the hole in the door is 2-1/8"(54mm).



Measure to confirm that the backset is either 2-3/8"or 2-3/4"(60 or 70mm).

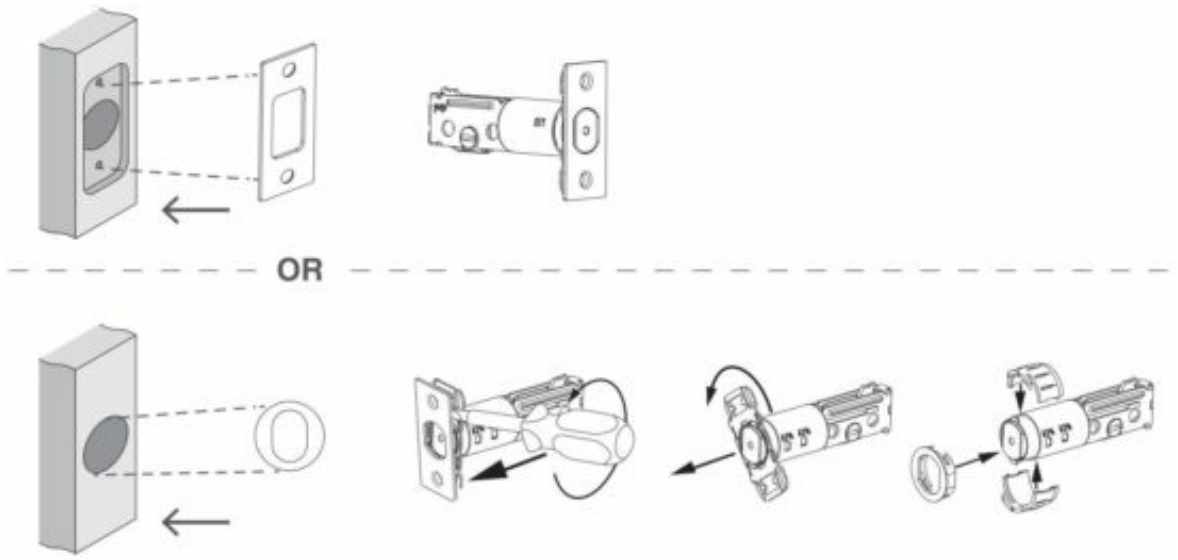


Measure to confirm that the hole in the door is 1"(25mm).

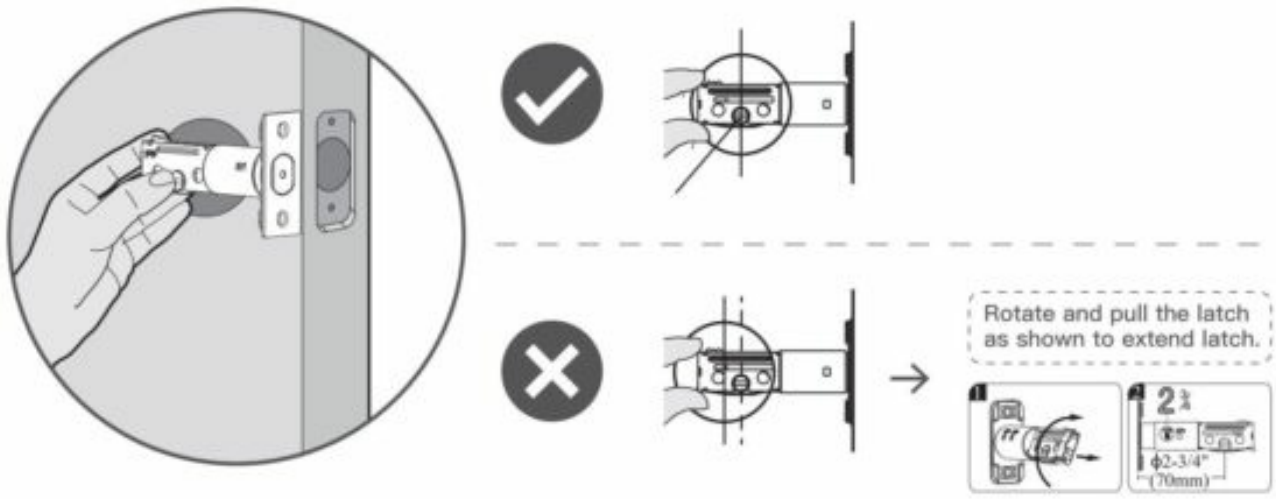


Measure to confirm that door thickness is between 1-3/8" and 1-3/4" (35 to 51mm).

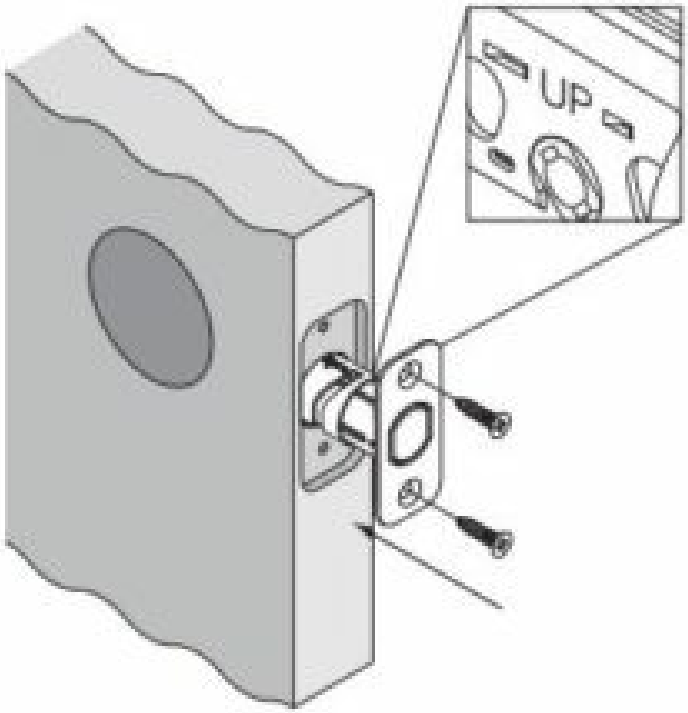
2. Choose faceplate



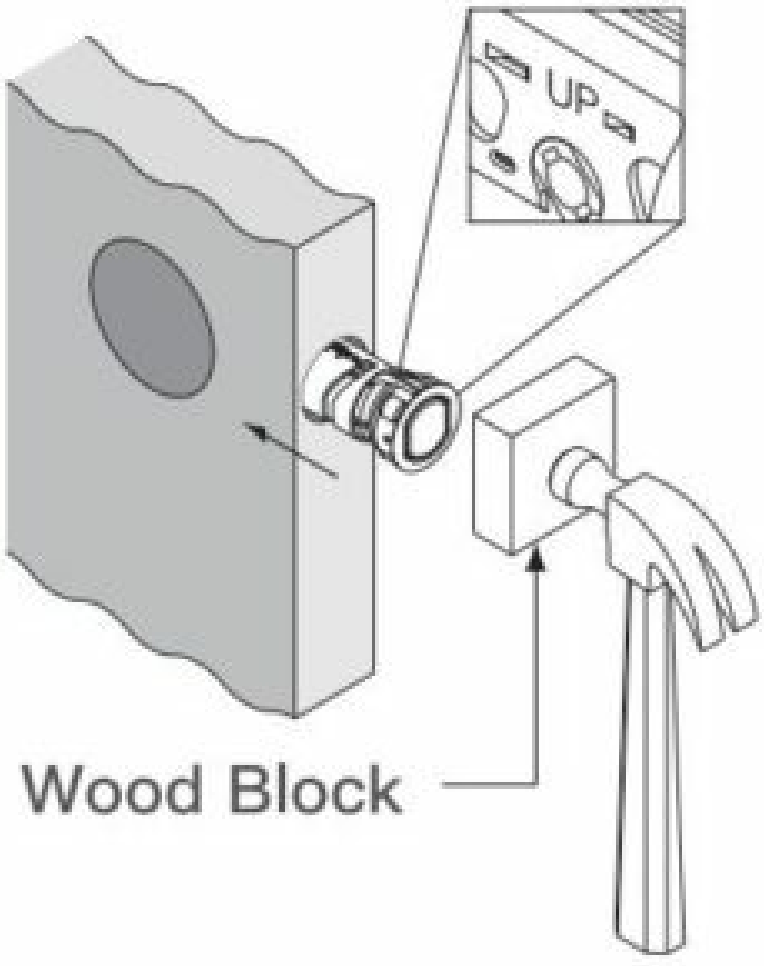
Is the slotted hole centered in the door hole ?



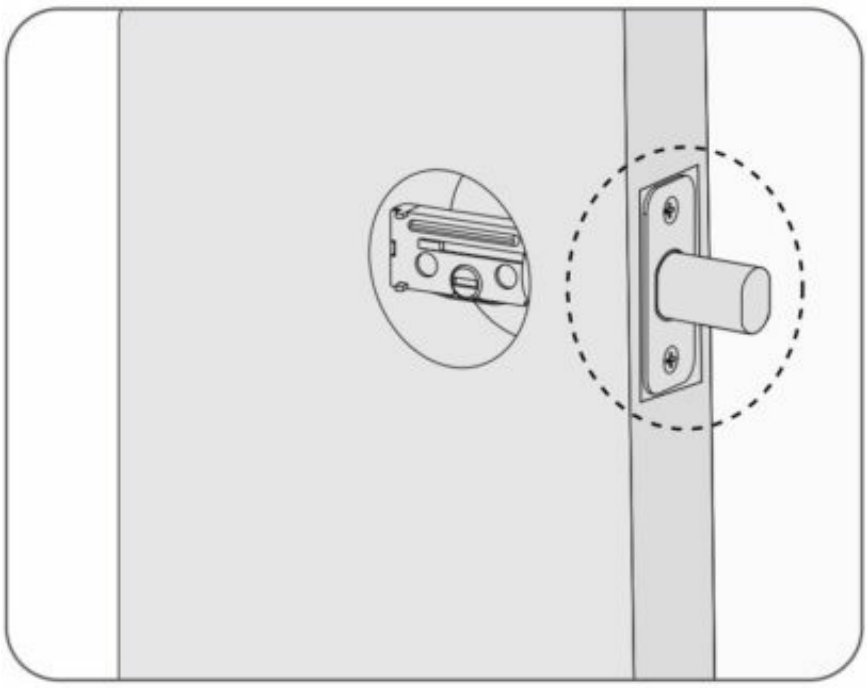
3. Install latch and deadbolt

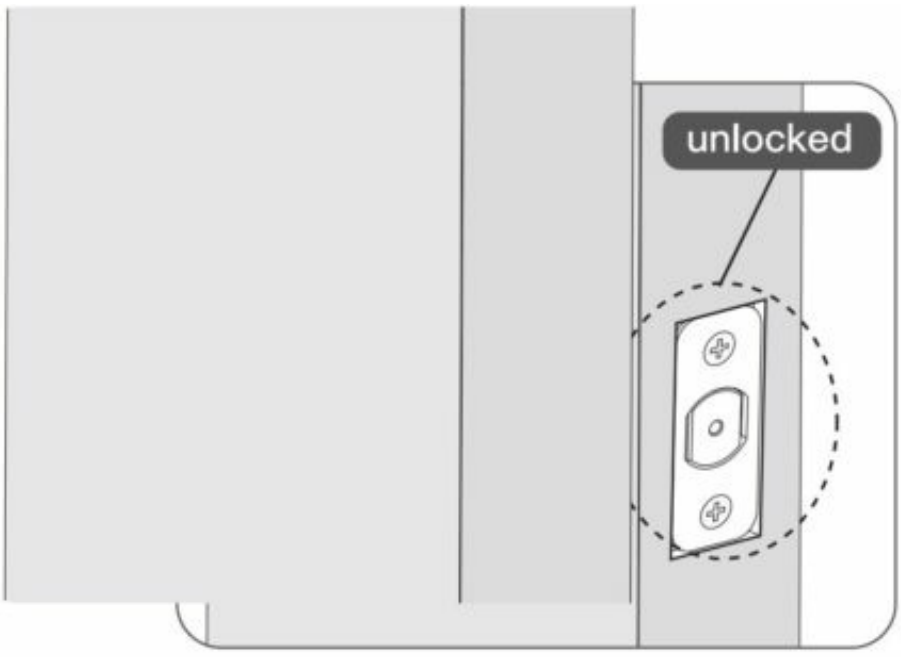


OR

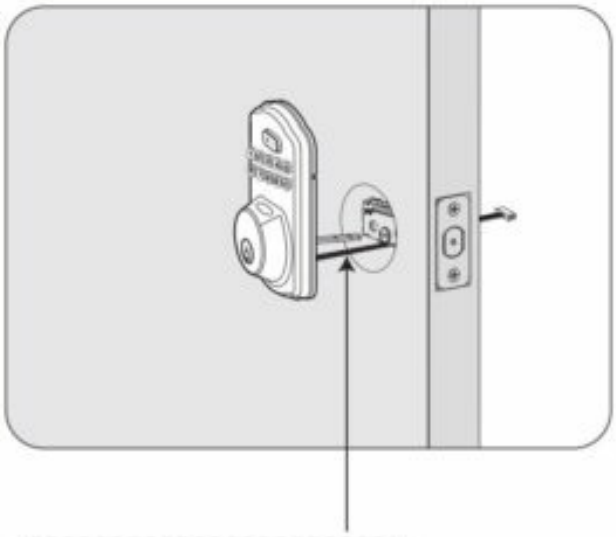


IMPORTANT: Keep the latch In unlocked position before installation.

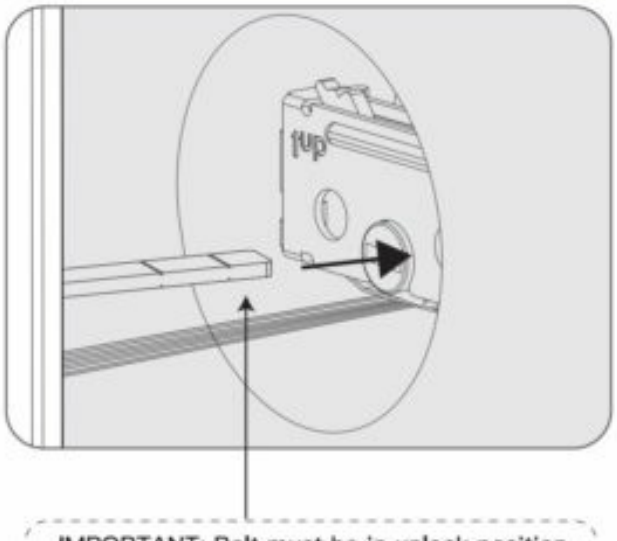




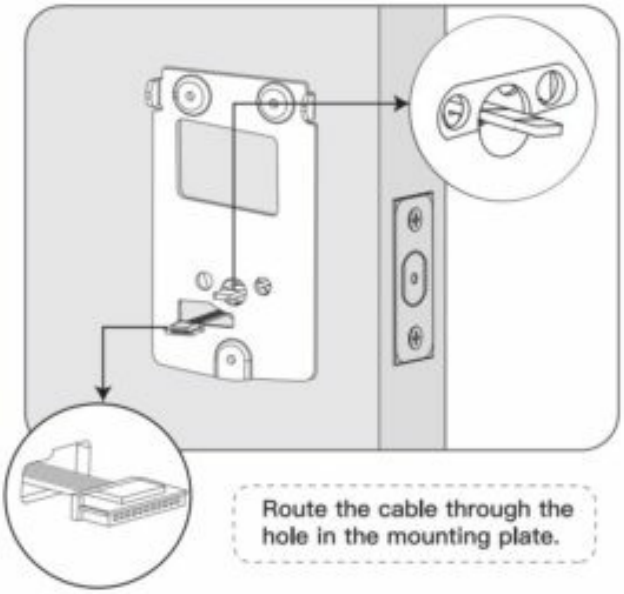
4. Install exterior assembly



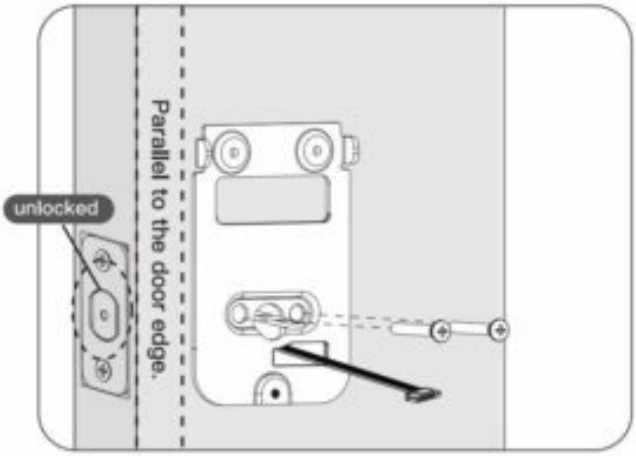
Route the cable below the latch.



IMPORTANT: Bolt must be in unlock position.
Note horizontal orientation of tourque blade.



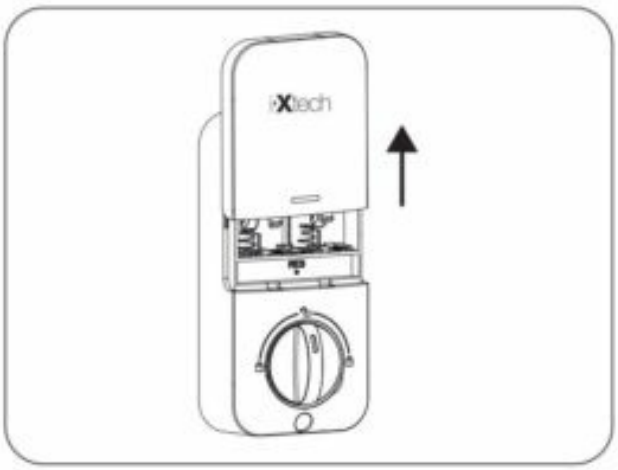
Route the cable through the hole in the mounting plate.



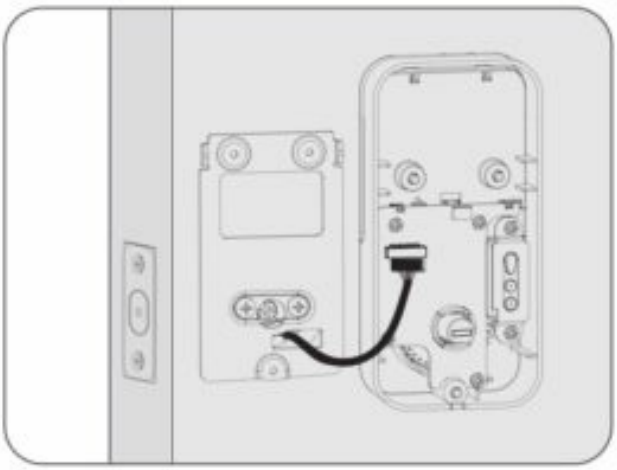
Secure the mounting plate with the supplied screws.

5 Install interior assembly

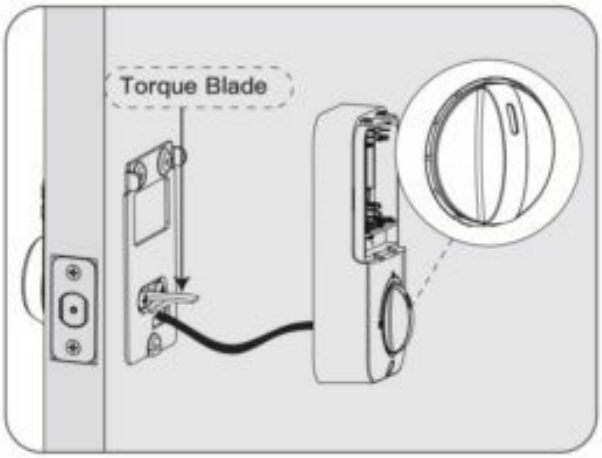
Do not load batteries until lock is completely installed.



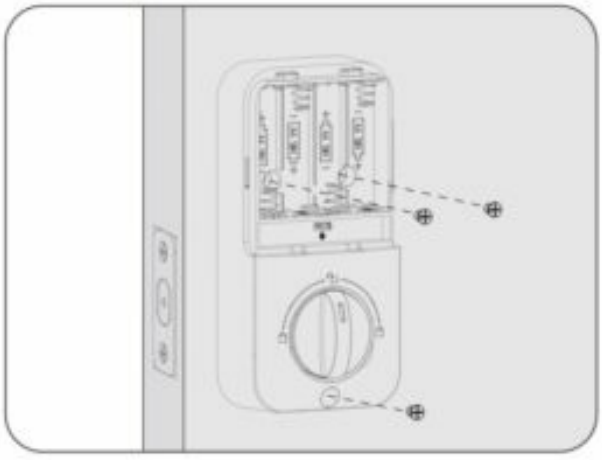
Remove the battery cover.



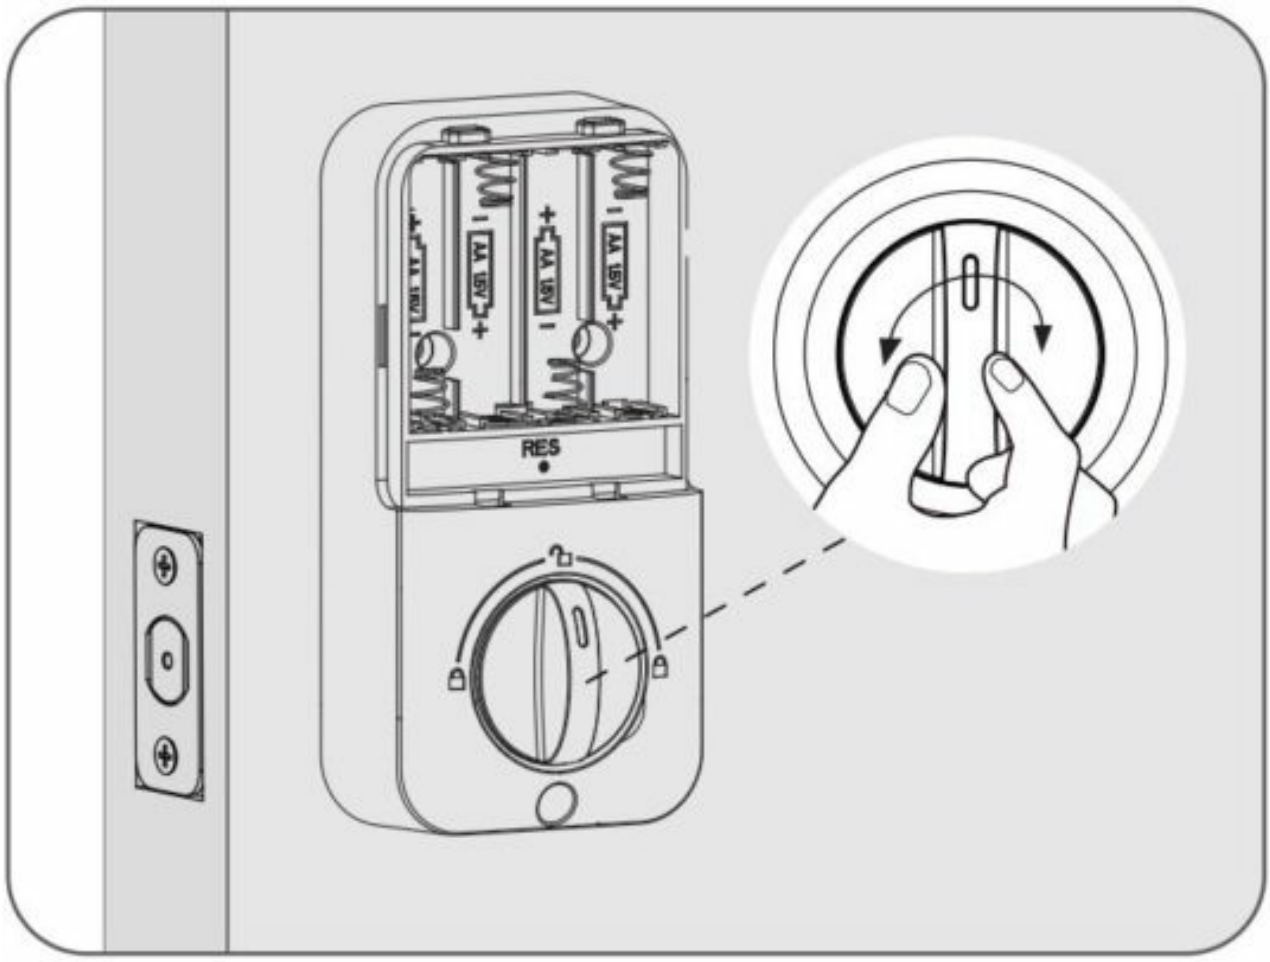
Connect the cable and ensure tight cable connection.



Rotate the Thumb turn in vertical position and insert the horizontal orientation of torque blade into the inside escutcheon.

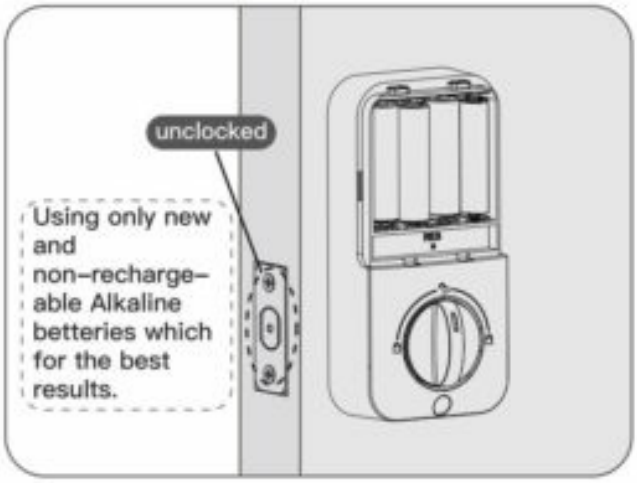


Secure the interior assembly with the supplied screws.

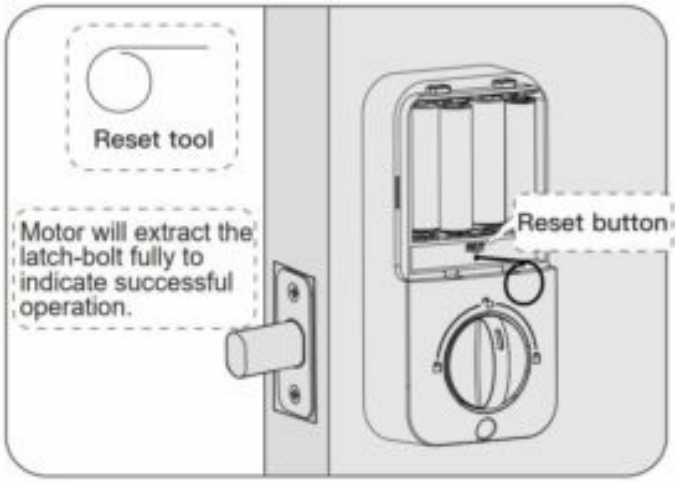


6. Detect left/right hand door installation

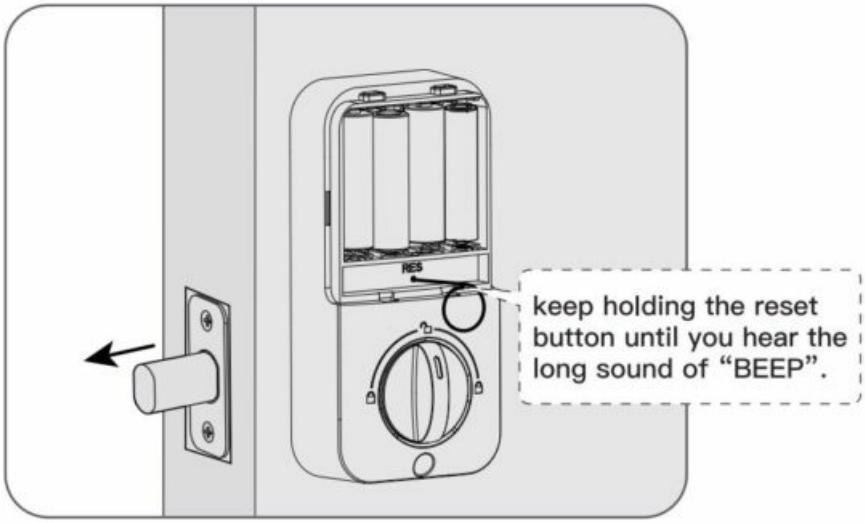
⚠ **IMPORTANT:** This step is required and crucial for the lock after installation!



While the door is open and unlock, load 4XAA batteries into the interior assembly.

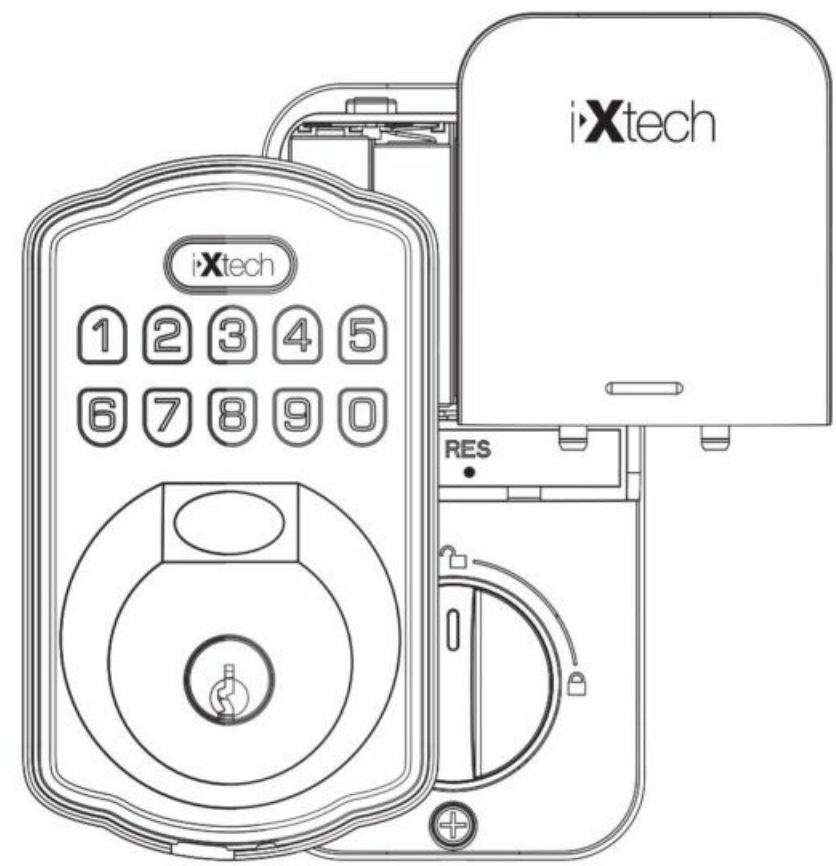


Press and hold the reset button on the interior assembly for 3 seconds, until you hear BEEP sound



Load the last battery and keep holding the reset button for 3 seconds, until you hear the long sound of “BEEP”, the latch bolt will extend to learn the orientation of the door.

Programming Instructions

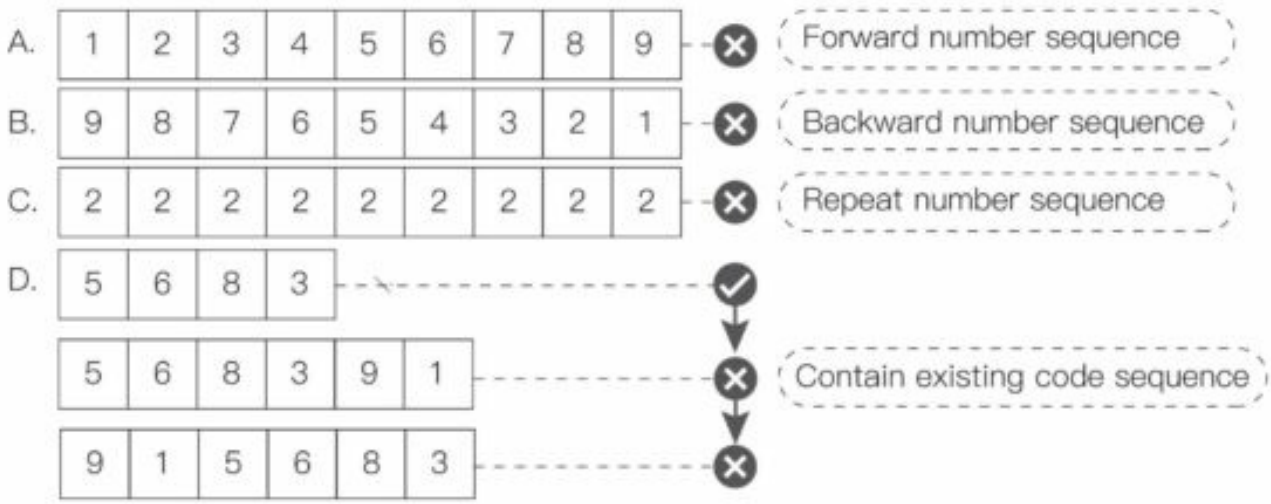


Information and safety warnings

Do not load batteries until lock Is completely Installed.

- Protect your user codes and master code.
- Restrict access to your lock’s interior assembly and routinely check your settings to ensure they have not been altered without your knowledge.
- This lock set is designed to provide the highest standard of product quality and performance.Care should be taken to ensure a long lasting finish. When cleaning is required use a soft and damp cloth. Using lacquer thinner, caustic soaps, abrasive cleaners or polishes could damage the coating and result in tarnishing.

1. Master PIN Code (4M 0 digits): The default master pin code is “12345678”, t’s required that you change it to a code of your own before programming.
2. User PIN Code (410 digits):A total of 20 user codes(and one temporary one—time user code) may be programmed.
3. Both master and user PIN codes don’t support the fol owing combination of numbers.



Parts Illustration

⚠ The default master code is 12345678. It's required that you change it to a code of your own before programming.

ITEM	SPECIFICATIONS	REMARKS
Battery (Using only new and non-rechagerable Alkaline betteries which for the best results.)	AA alkaline battery x4 (Operation voltage:4.6~6.0V)	Last up to one year (10 times open/close per day)

Definitions

Master code:
Required for programming and feature settings, Master code can be used to unlocked the door under vacation mode. The default master code needs to be changed before programming.(Property owner/ manager should keep this information confidential.)

Auto lock:
Automatically locks the deadbolt 30 seconds after unlocking. This feature is off by default. You can set the Auto lock delay between 10 and 99 seconds.

Wrong entry limit:
After 10 unsuccessful attempts at entering a valid PIN code, the unit will shut down for 3 minutes.

Silent mode:
The beep sounds when pressing keypad can be muted.
But you will still hear low battery and system alerts.

Vacation mode:
This is a security feature for you when you are leaving your home for vacation or long trip. Enabling vacation mode will restrict all user codes until master code is entered on keypad. If the lock is unlocked by thumb turn, the lock will sound an alarm.

One time user code:
This code can only be used once and is automatically deleted when used.

Unlock with fake code:
User can prevent PIN code exposure strangers by entering random digits before or after PIN code.

How to use?

Unlock the door from outside

Lock the door from outside

Auto re-lock mode
In auto re-lock mode, the bolt will extend out automatically in 30 seconds after unlocking.

Manual mode
Press any of the buttons on keypad for 2 seconds.

Unlock the door from inside

Rotate the turnpiece unlock position.

Lock the door from inside

Auto re-lock mode
In auto re-lock mode, the device will be automatically.

Manual mode
Rotate the turnpiece to lock position.

Factory default settings

SETTINGS	FACTORY DEFAUlt
Master code	12345678
Auto lock	Disabled
Silent mode	Disabled
Wrong code entry limit	10 times
Shutdown time	3 mins
Vacation mode	Disabled

Restore factory default settings ⚠ This procedure will delete all user codes which associated with the lock.

1.Keep the door open and unlocked.
2.Press and hold the Reset-Button (e.g. with the Reset-Tool) for 3 seconds.
3.Beep sound and motor extract the Latch-bolt to indicate successful operation.

Troubleshooting

• The turnpiece can’t rotate or operate the lock?
Remove and re—install the lock, making sure that the turnpiece is in vertical position.

• The lock can’t be locked or unlocked by keypad?
Make sure that the codes are not disabled. f needed, restore the lock’s default settings.

• The keypad doesn’t respond when touched (no lights are visible and no beeping is heard)?
Make sure the cab es are properly connected, and make sure the batteries are new installed correctly.

• After the installation of batteries, there is no response when you press any button and no beeps are heard.
Check the cab e connection and the polarity of the batteries. a so make sure the batteries are not dead.

Forget your master codes?
Perform a reset in order to erase all passcodes. Once the reset is comp ete, all passcodes will be erased and the master code will return to the default value(1 2345678).

Quick set up

The default master code is 12345678. It's required that you change it to a code of your own before programming.
