Mic	Speaker	Host	Power In PD 60W

Features

- Uncompressed 4K@30 Capture + 4K@60 HDR passthrough
- Ultra-low latency stream with high-performance USB-C® 3.2 connection
- LED indicator to keep track of USB™ speeds and compression rates
- No driver installation required

System Requirements

- Available USB-C® or USB™ Type-A port (USB™ 3.2 / 3.0 is recommended)
- Recommended system requirements to achieve 4K@30 capture and 4K@60 passthrough:
- Windows® 7 or later
- macOS® 10.12 or later
- Android™ 8.1 and higher
- CPU: Intel® Core™ i7 6700HQ or above
- GPU: NVIDIA® GTX 960M or above
- RAM: 8 GB or above

Recommended Software

- Windows®: OBS™, XSplit® Broadcaster
- macOS® : OBS™, QuickTime®
- Android™ : CameraFi™ Live

Installation

- **Step 1.** Connect the HDMI™ cable from JVA14 HDMI™ input port to the HDMI™ port on the source device (such as a game console) that will be recorded/streamed live.
- **Step 2.** Connect to the computer using the supplied USB-C® to Type-A or USB-C® cable.
- **Step 3.** Use a third-party program (such as OBS™, etc.) to begin the livestream or recording.

LED Indicator

- **USB3.0 connection:** Purple (Uncompressed)
- **USB 2.0 connection:** Blue (Uncompressed)
- **Power Only:** Orange
