How do I set my headset as the default audio device on my Mac computer?

You must manually define the setting for the default audio device on your **Mac computer**. Follow these steps:

1. On the Mac home screen, select the Apple logo at the top left.

2. Select System Preferences.
3. Select Sound.
4. On the Output tab, select your Jabra device.
5. On the Input tab, select your Jabra device.
