- Turn the scroll wheel “+ [|||||] -” Select from the 8 available alarm tones (51-58).
- Press the “**AL1**” button to finish.
- After setting “**AL 1**” will be automatically turned on by default
- “” will be on to indicate “AL 1” is ON

### Volume of Alarm:

- Press “” to adjust the Volume of the Alarm

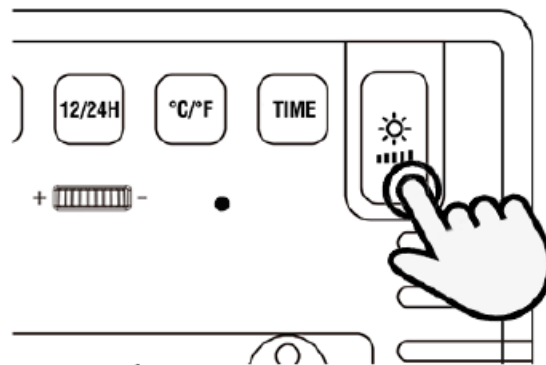

#### • 6 Volume levels

- V6.....100%
- V5.....75%
- V4.....50%
- V3.....25%
- V2.....10%
- V1.....5%

- Adjust the volume to your preference.

#### Brightness Setting:

- Press “☀️” to adjust brightness. Or turn the scroll wheel to adjust.

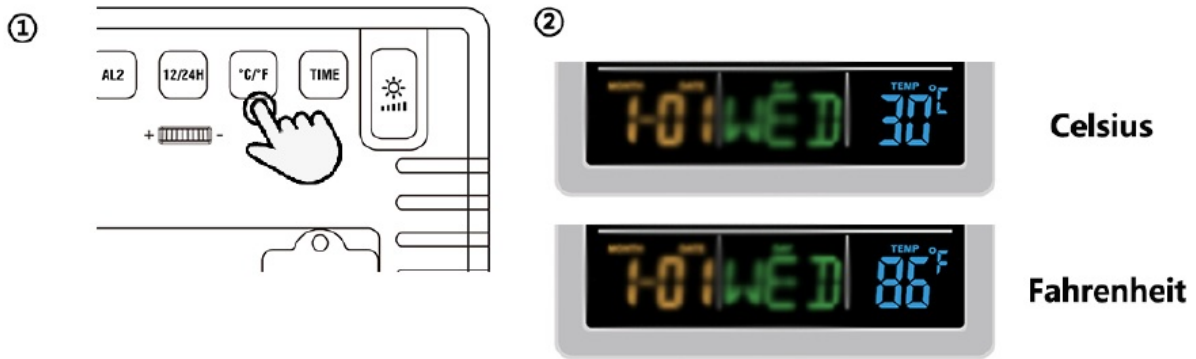

#### • 6 Brightness levels

- L6.....100%
- L5.....75%
- L4.....50%
- L3.....25%
- L2.....10%
- L1.....5%

- Select your preference brightness.

#### Temperature Setting:

- Press “°C/°F” button to change temperature unit from C° / F°

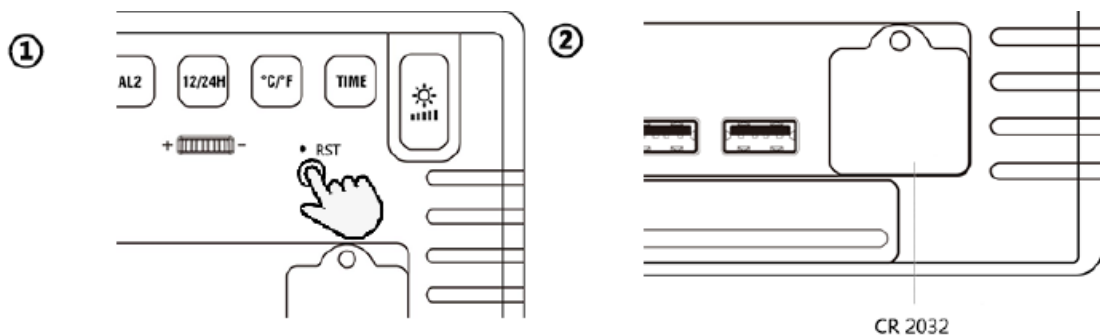

### Snooze:

1. When the alarm goes off, press “SNOOZE” on the top. The corresponding alarm indicator light will flash, giving you an extra 9 minutes of snooze time.

**Notice:** The snooze function will automatically shut off after 4 consecutive uses.

2. To turn off the snooze feature, simply press any button on the back twice. This will stop the flashing of the alarm indicator light. Alarm will go off on the next day.

### Reset

- Use a needle or a little stick to press the “Reset” button and the alarm clock will be reset.
- The CR 2032 battery is for memory settings only. The clock can restore the correct time even after a power outage.

### Product Features

- **Input Voltage:** AC110v-240V, 50/60HZ.
- **Output Voltage:** DCSV / 1500MA-2000MA.

### Trouble Shooting

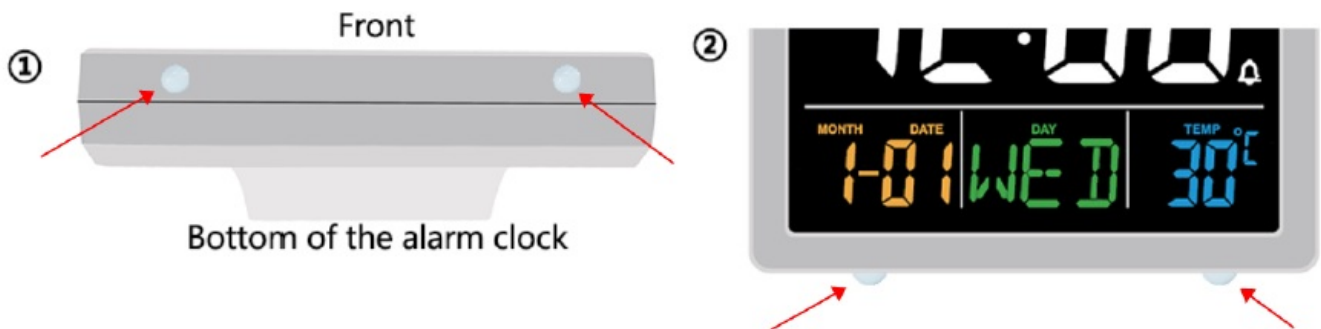

1. Missing power accessories, or instructions, please contact us on Amazon or by email for a new replacement.
2. Please understand the temperature sensor is pre-set inside the clock. As electronic components may produce heat when working. So it's normal that the temperature is not as accurate as other professional thermometer. It's normal there are 1-2 degrees difference.

3. The temperature cannot reset manually because it's detected by sensor automatically. If the difference is higher than 5 degrees, please contact us for a new replacement.
4. If you find that your alarm clock cannot be restored to the current time after a power outage, it may be because the CR2032 battery on the back of the clock is depleted. Please try replacing the battery.

**Notice:** The CR2032 is only used to store the alarm clock's settings and cannot be used to power the clock separately.

5. If you think the alarm clock is too slippery, please use the rubber bumpers that comes with the clock and stick it on the bottom of the alarm clock. It doesn't affect aesthetics.
  - Stick the rubber bumper feet on the position as shown, which can effectively prevent the alarm clock from sliding.

## FREQUENTLY ASKED QUESTIONS

What brand manufactures the JALL V1021 Digital Alarm Clock?

The JALL V1021 Digital Alarm Clock is manufactured by JALL.
