JANOME 202-464-008 Bias Tape Guide and Belt Loop Folder

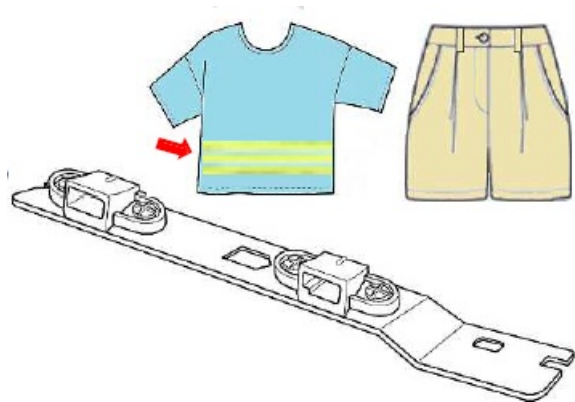

JANOME BULLETIN

For CoverPro Models

Bias Tape Guide and Belt Loop Folder

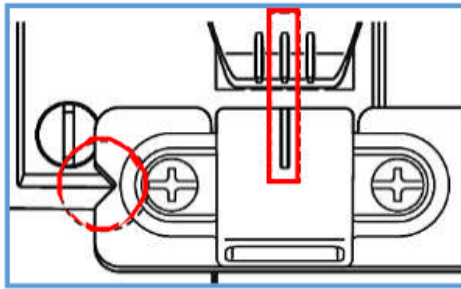

This attachment can be used in two ways: as a “Bias Tape Guide” that can guide bias tape (single fold) and sew it on to knit fabric, and as a “Belt Loop Folder” that can make belt loops from fabric tape. This attachment is useful for creating various types of sewing work.

- **Stitch pattern:** Top cover stitch Wide 6 mm Cover stitch Wide 6 mm
- **Co verPro 900CPX:** Cover stitch Wide 5 mm

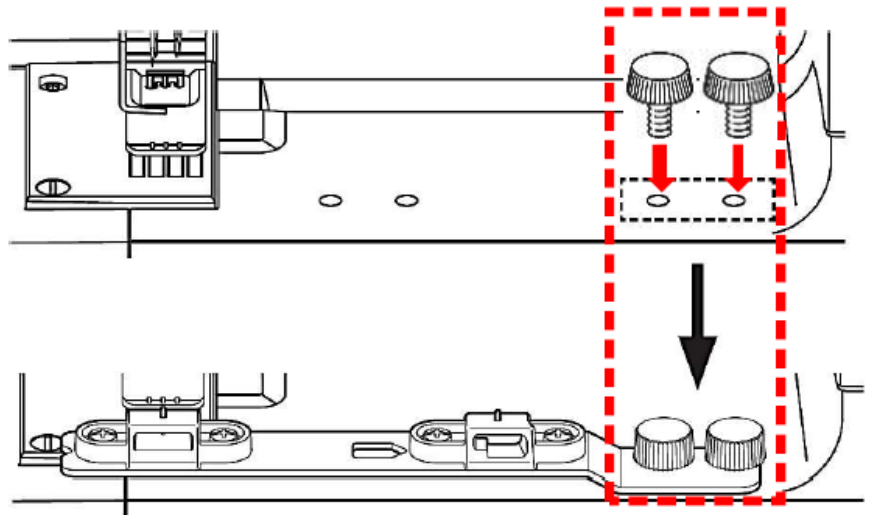

Bias Tape Guide

Attach the attachment to the 2 holes on the front right of the CoverPro Models with the attachment screws (standard accessories).

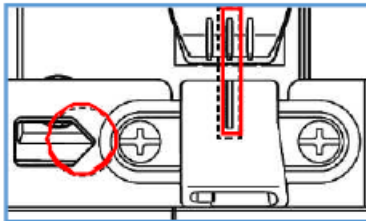

Set the attachment properly to the machine as shown above.

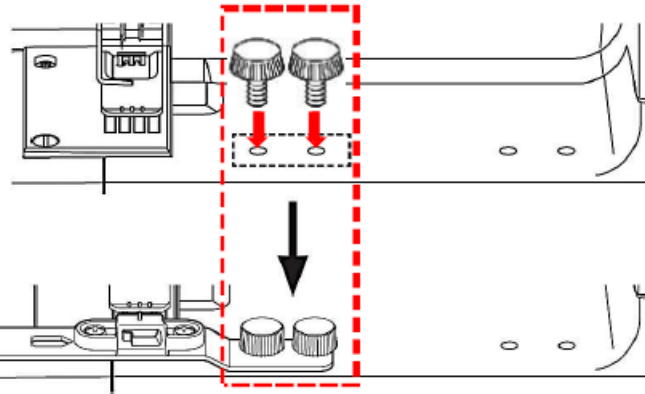

Belt Loop Folder

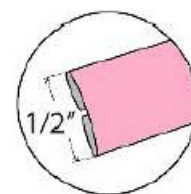

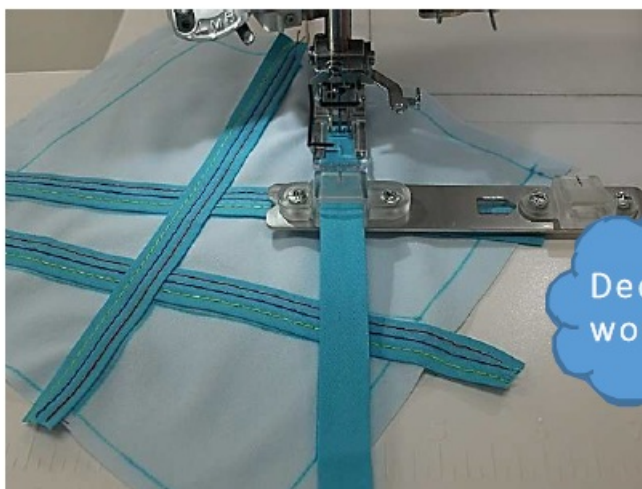

Attach the attachment to the 2 holes on the front left of the CoverPro Models with the attachment screws (standard accessories).

Set the attachment properly to the machine as shown above.

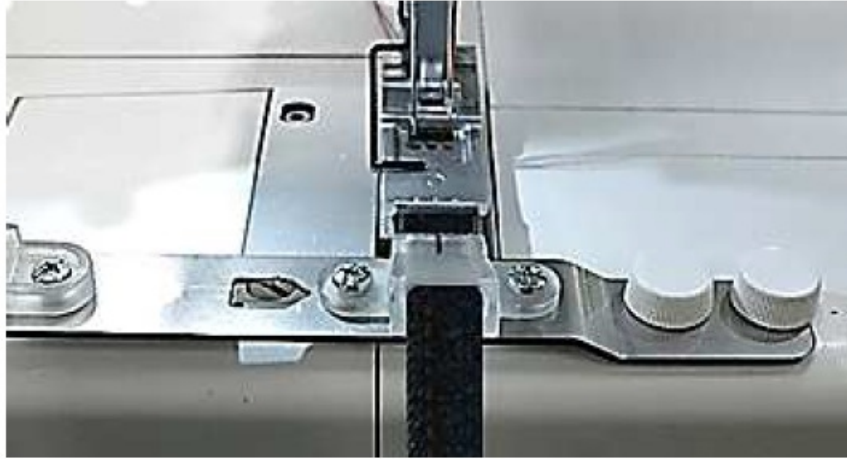

Instead of bias tape, can also use ribbons of around the same width. Enjoy creating decorative knit works!

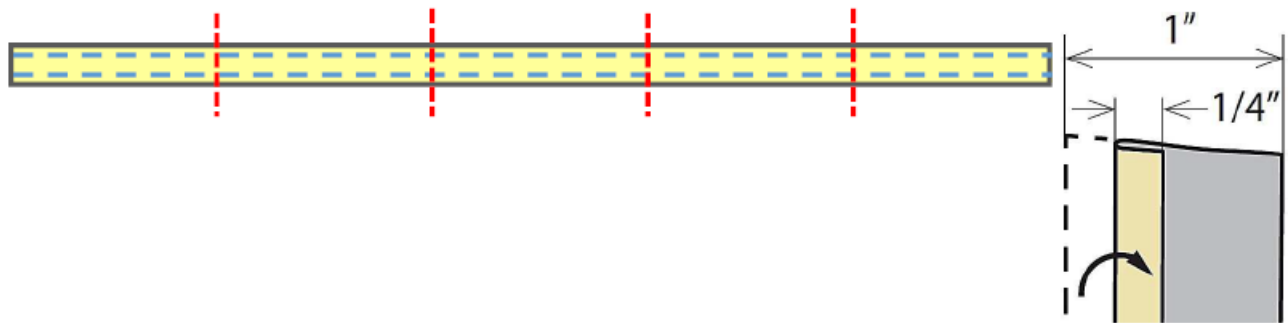

Decorate your work!

- It is easier to use with the Extra Wide Table #795812008 (Optional Item)
- $\frac{7}{16}$ " (11 mm) wide belt loops can be easily made from 1" (25 mm) wide strips of fabric

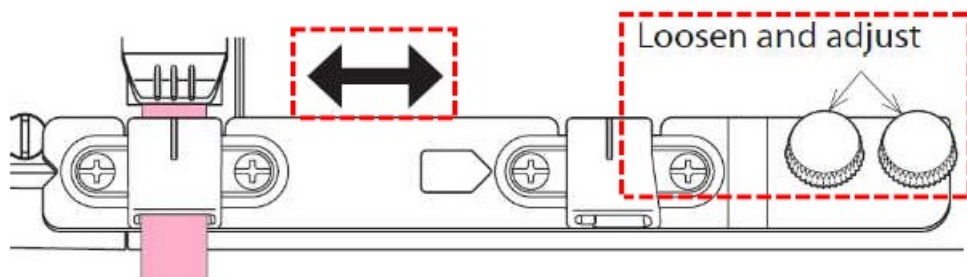

- Medium-heavy fabrics (10 oz denim or chino cloth, etc.) are recommended
- After making a long belt loop, cut it to the appropriate length for each piece.

- Fold back the edge of the 1" (25mm) fabric tape to form a $\frac{1}{4}$ " (6mm) fold and iron it.

Tips

How to adjust Bias Tape Guide on the CoverPro Models

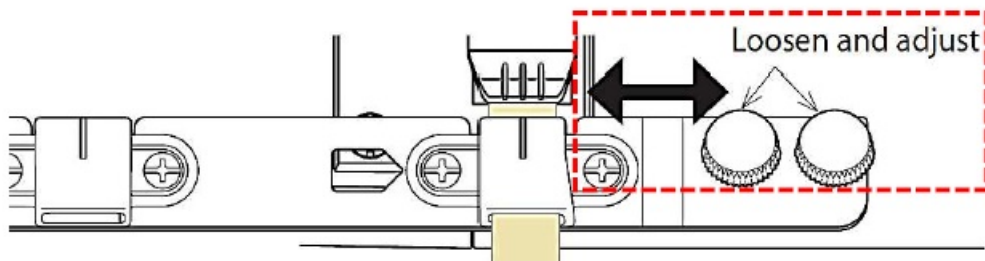

If the seam line seems out of alignment, adjust the Bias Tape Guide position by loosening the attachment screws.
