Changing Brushes

Changing Brushes for CLU and CLR

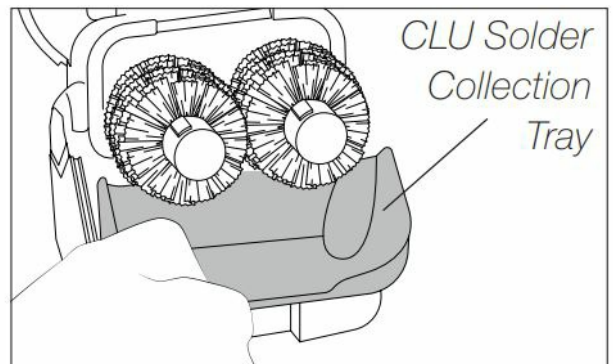

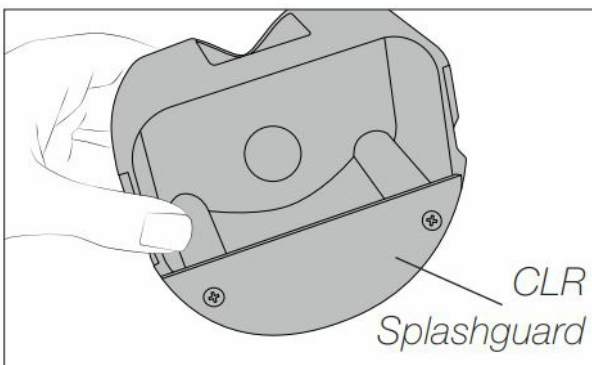

Before opening the tip cleaner, unplug it from the mains.

- For CLR, open the side closures and remove the splashguard.
- For CLU pull the locking tab to open the splashguard.

- Press the brush buttons (1) to remove the brushes (2).
- Align the brush with the axis and push them in until a click is heard. Check if the brush is properly fixed.

- The CLR splashguard also works as a tin collector.
- CLU features a solder collection tray.

Clean the splashguard/solder collection tray, place them back in its position and close the cleaner.
