JBL PROCRISTAL i30 Filter Module

Product Information

The JBL PROCRISTAL i30 FilterModul is a filter module designed for the ProCristal i30 aquarium filter system. It is specifically designed to provide clean water and maintain the health of your fish. The filter module is easy to install and attaches to the underside of the ProCristal i30 filter.

Key Features:

- Easy installation: Attaches to the underside of the ProCristal i30 filter
- Ready for use: Includes filter foam
- Extension of the filter: Adds approximately 3 cm to the height, reaching a total height of 15.9 cm

Package Contents:

- 1 x Filter module for ProCristal i30
- 1 x ProCristal i30 FilterModul

Product Usage Instructions

Installation:

1. Ensure that the ProCristal i30 filter is properly installed in your aquarium.
2. Attach the FilterModul to the underside of the ProCristal i30 filter using the provided attachment mechanism.
3. Make sure that the FilterModul is securely attached and aligned with the filter.

Filter Foam Replacement:

To maintain optimal filtration performance, it is recommended to replace the filter foam regularly. Follow these steps to replace the filter foam:

1. Remove the FilterModul from the ProCristal i30 filter.
2. Open the FilterModul by gently pulling apart the two halves.
3. Remove the used filter foam and discard it.
4. Insert a new filter foam into the FilterModul.
5. Close the FilterModul by pressing the two halves together until they click into place.
6. Reattach the FilterModul to the ProCristal i30 filter.

FAQ

- **Q: Can the FilterModul be used with other aquarium filters?**

A: The FilterModul is specifically designed for use with the ProCristal i30 filter and may not be compatible with other filters.

- **Q: How often should I replace the filter foam?**

A: It is recommended to replace the filter foam regularly, approximately every 4-6 weeks, or as needed depending on the water conditions and aquarium stocking levels.

- **Q: Where can I find spare parts for the ProCristal i30 FilterModul?**

A: Spare parts for the ProCristal i30 FilterModul can be found on the JBL website or through authorized JBL retailers.

Product information

- **Clean and healthy water**

Plants and food remain and metabolic substances lead to a deterioration of the quality of the water in the aquarium. Good water quality is necessary for healthy fish and plants. This can be achieved with various filters and filter materials. The filters suck in the aquarium water and remove the pollution and waste materials with the filter material from the water.

- **Higher filter performance**

By adding one further filter module to the filter ProCristal you can increase the filter performance and prolong the service life. The module comes ready for use. Depending on the height of the aquarium the filter can be extended by up to 3 modules.
