Safety Tips

- Avoid dropping the Pro Guide.
- Never disassemble or modify your Pro Guide controller for any reason.
- Keep the Pro Guide dry and do not submerge it in water.
- Keep out of reach of children – the small parts may be a choking hazard.
- Clean with a dry, soft lint-free cloth, do not use harsh chemicals or strong detergents.
- Do not expose the Pro Guide to excessive heat or humidity.

Product Details
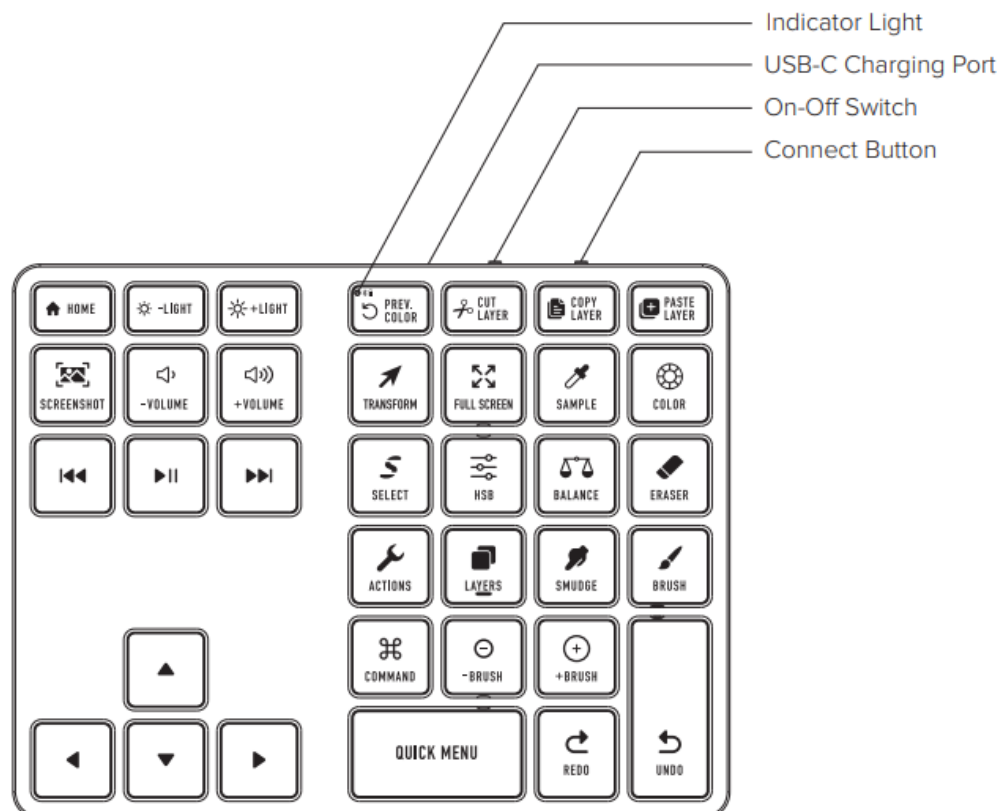

Specifications

- **Product Code**: JCP3110
- **Materials:** ABS, Aluminum alloy
- **Dimensions:** 146.8 x 113.8 x 13mm
- **Weight:** 168g
- **Bluetooth Version:** 5.0
- **Bluetooth Name:** Pro Guide Controller
- **Wireless Distance:** <8M
- **Charging Method:** USB-C Cable
- **Battery Capacity**: 300mAh
- **Working Voltage:** 3.7V
- **Charging Current:** 200mA
- **Charging Time:** <2 hours
- **Standby Time:** 27 days
- **Hibernation Time:** 30min

Compatibility

Supports iPad OS system
Compatible with iPad OS 13.4 or above

Directions for Use

- Toggle the black power switch to the On position and the blue indicator light will quickly flash to indicate the controller is on.
- Tap the Bluetooth button and the indicator light blinks slowly to show the controller is ready to pair with your iPad.
- Turn on Bluetooth on your iPad, select the name "Pro Guide Controller" and click pair to connect the Pro Create to your iPad.

 To use the Eye Dropper/Color Sample button on the controller please update the Pro Create app on your iPad to the newest version.

 To enable the Smudge Tool in Procreate go to Settings > Gesture Controls. Select Smudge Tool then enable the " ◯+ Touch" option. Now when you hold the Smudge button on the controller the Smudge Tool will be active.

Indicator Light

Red light instructions	Low voltage indicator: When the voltage is lower than 3.3V, the red light blinks slowly. Charging state: When the device is charging, the red light stays lit. Once the battery is full the red light turns o.
Blue light instructions	**Startup state:** Blue light flashes for 2 seconds and then turns o. **Bluetooth pairing:** 1. Press the pairing button once, and the blue light will blink slowly to indicate pairing mode is active. 2. If the blue indicator blinks quickly six times, this indicates the pairing is successful. 3. After 60 seconds without connection pairing mode will be exited.

* After the device is powered on again or woken up, the device is automatically connected back to the paired device. A quick flash indicates that the connection is successful.

Included Items
