JESTOP HT1500W Anti-scalding Bucket Heater

Launch Date: 2020

Price: \$26.99

Introduction

The JESTOP HT1500W Anti-Scalding Bucket Heater is a strong and useful appliance that quickly heats water for many uses, from personal care to doing things outside. This heater has a strong 1500W output and can quickly warm up to 15 liters of water. It is perfect for use in buckets, basins, small bathrooms, and inflatable pools. The heater has high-tech safety features, such as a 304 stainless steel guard to keep people from getting burned and an overheat security system. Its small size and portability make it easy to use indoors and outdoors, making it great for homes, farms, and even trips. It also comes with an easy-to-use waterproof warning light to make sure it works safely. The JESTOP HT1500W is a safe, quick, and efficient way to heat water for cleaning, bathing, and other uses.

Specifications

- **Power Rating:** 1500W
- **Voltage:** 110V
- **Dimensions:** 12.6 x 6 x 2.5 inches
- **Weight:** 1.2 lbs (approximately)
- **Heating Time:** Heats up to 5 liters of water in about 10-15 minutes
- **Material:** High-quality stainless steel heating element
- **Safety Features:**

- Anti-scalding technology
- Overheat protection
- Thermal cut-off switch to prevent overheating
- **Cord Length:** 6 feet (for extended reach)
- **Water Capacity:** Ideal for use with buckets ranging from 5 to 15 liters

Package Includes

- 1 x **JESTOP HT1500W Anti-Scalding Bucket Heater**
- 1 x User Manual
- 1 x Safety Warning Card
- 1 x Carrying Pouch (for easy storage and portability)

Product Overview

Features

1. **High Power Output (1500W):** The **JESTOP HT1500W** Immersion Heater offers a powerful 1500W heating capacity, enabling you to heat water quickly and efficiently. It can heat up to 15 liters (4 gallons) of water in just

a few minutes, making it perfect for large containers, including buckets, basins, and small bathtubs.

2. **Anti-Scalding Technology:** To ensure safety during use, the **JESTOP HT1500W** features advanced anti-scalding technology. This includes a **304 stainless steel protective guard** that keeps the heating element safely away from direct contact with the user or container walls. The guard also facilitates faster heat dissipation, preventing burns and scalding.
3. **Waterproof Indicator Light:** Equipped with a waterproof indicator light on the back of the heater, users can easily monitor its operation. When the red light is on, it signifies that the heater is active and heating water, ensuring users are aware when the device is in use.
4. **Durable Stainless Steel Construction:** The heater is built with **high-quality stainless steel**, which provides excellent corrosion resistance and durability. This ensures that the **JESTOP HT1500W** can withstand regular use and last for many seasons without significant wear or rusting.
5. **Overheat Protection:** To prevent overheating, the **JESTOP HT1500W** is equipped with an **overheat protection system**. This automatically shuts off the heater if the water temperature exceeds safe limits, providing peace of mind and preventing damage to the unit or potential safety hazards.
6. **Compact and Portable Design:** The heater is lightweight and easy to carry, making it convenient for use in various locations such as homes, farms, and even during outdoor work activities. Its compact size ensures it can be easily stored when not in use, making it an ideal portable heating solution.

7. **Simple and User-Friendly Operation:** The **JESTOP HT1500W** is very easy to use. Simply submerge the heating element into the water, plug it into a 120V power outlet, and the heater will begin to operate, quickly heating the water to the desired temperature. It's ideal for people of all ages, ensuring a hassle-free heating

experience.

8. **Safety Warnings and Instructions:** The **JESTOP HT1500W** comes with several important safety guidelines to ensure proper and safe use. These include:

- Ensure your outlet can withstand high power.
- Always fully submerge the heater in water during operation.
- Do not use it continuously for more than 3 hours.
- Avoid using extension cords, and do not plug two heaters into the same outlet to prevent electrical hazards.

- Never touch the water until the heater is unplugged.

9. **Multiple Applications:** The **JESTOP HT1500W** is versatile and suitable for a variety of uses, including:

Built-in heating cathode,boiling water fast and energy efficient.

FIVE MINUTES HEATING

High quality stainless steel shell prevent scalding hand.

- Heating water for personal hygiene (bath or shower water).
- Warm up water for cleaning purposes (washing dishes, cleaning floors).
- Heating water for farm animals or livestock in cold weather.
- Heating water for outdoor activities, such as camping, or small pools.
- Ideal for use in vehicles (car wash buckets, camper van water heating).

HEATING HELPER

10. **High-Quality Components:** The heater is equipped with a **thickened copper wire** to handle high electricity loads safely without overheating, reducing the risk of fire, smoke, or electrical malfunction.
11. **Temperature Monitoring:** The **JESTOP HT1500W** features a **Fahrenheit water temperature gauge**, allowing users to monitor and adjust the water temperature to their desired level. This makes it easier to ensure that the water reaches the perfect warmth for your needs.
12. **Travel-Friendly:** Due to its compact design and dual voltage compatibility (120V), the **JESTOP HT1500W** is ideal for travel. It is perfect for heating water while camping, during road trips, or in small rented spaces where traditional water heaters may not be available.
13. **Heat Dissipation for Safe Operation:** The **304 stainless steel guard** not only protects users from scalding but also helps in the efficient dissipation of heat, ensuring that the device operates at optimal temperatures without the risk of overheating.
14. **Quick Water Heating:** With the **JESTOP HT1500W**, you can enjoy **instant hot water** in a matter of minutes. It is capable of boiling up to 5 gallons (15 liters) of water rapidly, providing convenience when you're in a hurry to warm up water for any task.
15. **Included Accessories:** The **JESTOP HT1500W** package comes with useful accessories like:
 - A **digital thermometer** to accurately measure the water temperature.
 - A **stainless steel cleaning ball** for easy maintenance and cleaning of the heater.
 - A **protective storage pouch** for easy and safe storage of the heater when not in use.

Usage

- **Home Use:** Quickly heat water for cleaning, dishwashing, or personal hygiene (bathing or washing hands).
- **Office/Workplace:** Ideal for heating water for beverages, such as tea, coffee, or other drinks.
- **Camping:** Convenient for heating water in outdoor settings or when traveling.
- **Industrial Use:** Can be used in small industries or workshops where hot water is needed for cleaning or processing.

Care and Maintenance

Cleaning the Heater:

- After each use, unplug the heater and allow it to cool down.
- Wipe the heating element with a clean, damp cloth to remove any dust or residue.
- Ensure the unit is completely dry before storage.

Storing the Heater:

- Store the heater in a cool, dry place away from water sources to prevent damage to the electrical components.
- Use the included carrying pouch for easy and safe storage, preventing the cord from tangling or becoming damaged.

Periodic Inspections:

- Regularly check the power cord and heating element for signs of wear and tear. If any visible damage is noticed, stop using the heater and have it inspected or replaced.

Avoid Overheating:

- Never leave the heater unattended while in use, especially when the water has already reached a hot temperature.

Troubleshooting

Heater Is Not Heating the Water:

- **Solution:** Ensure the heater is properly submerged in the water. The element must be fully immersed to work correctly.
- Check that the power cord is plugged in and that the electrical outlet is functional.

Water Heating Too Slowly:

- **Solution:** Check if the heater is submerged fully in the water. A partial submersion may cause slower heating. Also, ensure that you're using a bucket that is within the recommended capacity range (5 to 15 liters).

Heater Stops Working or Turns Off:

- **Solution:** The **JESTOP HT1500W** is equipped with overheat protection, which may turn the heater off if the temperature exceeds safe levels. Allow the heater to cool down before restarting.
- Check if the heater is plugged in properly or if there is a power surge or outage.

The Heater Is Making a Strange Noise:

- **Solution:** It's normal for immersion heaters to make slight noises while heating, but if you notice loud or unusual sounds, turn the heater off immediately. Inspect the unit for damage or contact customer support if the issue persists.

Heater Is Not Turning On:

- **Solution:** Check the power cord for any visible damage. If the cord is damaged, do not attempt to use the heater. Contact the manufacturer for replacement or repair.

FAQs

What is the main function of the JESTOP HT1500W Anti-Scalding Bucket Heater?

The JESTOP HT1500W is designed to heat water quickly and efficiently. Its primary function is to provide hot water in a short amount of time, making it ideal for use in buckets, basins, small bathtubs, and even inflatable pools.

What is the power output of the JESTOP HT1500W heater?

The JESTOP HT1500W is a high-powered immersion heater with a 1500W output. This allows it to heat up to 15 liters of water in just a few minutes, making it suitable for both small and medium-sized containers.

How does the JESTOP HT1500W ensure safety during use?

The JESTOP HT1500W features a 304 stainless steel protective guard to prevent direct contact with the heating element, thus reducing the risk of scalding. Additionally, it has overheat protection and a waterproof indicator light for added safety.

What types of containers can I use with the JESTOP HT1500W heater?

The JESTOP HT1500W is suitable for use with various containers such as plastic buckets, basins, small bathtubs, and inflatable pools. It should always be used in containers that are large enough to fully

submerge the heater.

How do I operate the JESTOP HT1500W heater?

To operate the JESTOP HT1500W, simply submerge the heater in water, plug it into a 120V power outlet, and turn it on. The heater will begin heating the water immediately. Make sure the heater is fully submerged during operation.

What should I do if the water does not get hot enough with the JESTOP HT1500W?

Ensure that the JESTOP HT1500W is fully submerged in the water. If it is not submerged completely, it may not heat the water properly. Additionally, check that your power outlet can handle the 1500W output and that the heater is not operating in a container that's too small.

How long can I use the JESTOP HT1500W heater continuously?

The JESTOP HT1500W should not be used continuously for more than 3 hours. Prolonged usage could lead to overheating or damage. Always unplug the heater when not in use.

What kind of safety features does the JESTOP HT1500W have?

The JESTOP HT1500W includes several safety features, such as an overheat protection system, a 304 stainless steel guard to prevent scalding, and a waterproof indicator light to indicate when the heater is in use.

What is the recommended power supply for the JESTOP HT1500W heater?

The JESTOP HT1500W is designed for use with a 120V power supply, which is typical for most household outlets in North America. Ensure that your outlet can handle the 1500W power demand.

What is the cord length of the JESTOP HT1500W heater?

The JESTOP HT1500W comes with a 1.8-meter (5.9-foot) long power cord, providing ample length to

reach most containers comfortably without needing an extension cord.

How do I know if the JESTOP HT1500W heater is working?

The JESTOP HT1500W has a waterproof indicator light on the back of the heater. When the red light is on, it indicates that the heater is working and heating the water.
