jetec THD8 E USB Data Logger Temperature and Humidity

BATTERY INSTALL

1. Push the tenon as the arrow instructed and remove the battery cover
2. Put the battery vertically on the battery groove
3. Make the positive side of the battery contact positive spring plate first and push the negative side of spring to fix the battery position.
4. Finish

LCD

1 Low battery	6 Log capacity
2 Max. Temp/Humi.	7 Battery capacity
3 Min. Temp/Humi.	8 Temp. & Humi.
4 Alarm	9 Unit
5 Up/low alarm indication	

OPERATION

Movement	Operation	LCD icon	Icon display
Start/Load	Auto loading after power on		All icon lighted
Log/ manual stop	① Hold 5s(start/restart log)		Lighted
	② Hold 5s(stop log)		Not lighted
Auto stop logging	① Stop log after full record		Flash
	② Stop log after connect to computer		
Alarm	Temp.&Humi. breach		Lighted/not Lighted
Auto PDF export	Connect to computer	 	Display loading progress of PDF export
search	press button	Refer to menu part	

- Old PDF and record will be deleted after restart logging, please backup old data.

MENU ILLUSTRATION

Menu	Illustration	Example	Menu	Illustration	Example	Before logging
1	Temp.up limit		5	Max Temp.		
2	Temp.low limit		6	Max Humi.		
3	Humi.up limit		7	Min Temp.		
4	Humi.low limit		8	Min Humi.

						C	Data information		
		1	PDF created time			C1	Logging start time	C7	Logging stop time
		2	PDF name			C2	Number of records	C8	Number of alarm
		3	Logging time period			C3	Total logging time	C9	Total alarm time

A Datalogger information

A1	Serial number	A3	Logging type
A2	Software version	A4	Detail infor. (extended/unextended)

B Device setting

B1	Record frequency	B4	Humi. up limit
B2	Temp. up limit	B5	Humi. low limit
B3	Temp. low limit		

D Line indication for parameters

E Graph

C4 Max/Min Temp.
(display red if breach)

C10 Max/Min Humi.
(display blue if breach)

C5 Average temperature

C11 Average humi.

C6 Avg. of breach temp.(High)
Avg. of breach temp.(Low)

C12 Avg. of breach humi.(High)
Avg. of breach humi.(Low)

F Detail Data information

F1 Logging date

F2 Max/Min. breach temp.

F3 Max/Min. breach humi.

F4 Temp. breached(high or low limit). *

F5 Humi. breached(high or low limit). *

* If temp. and humi. both breach, it will display red.

User can make configuration by this software

Installation

- Please complete driver installation before using this software

1. Open Installer folder, press , install according to the indication.

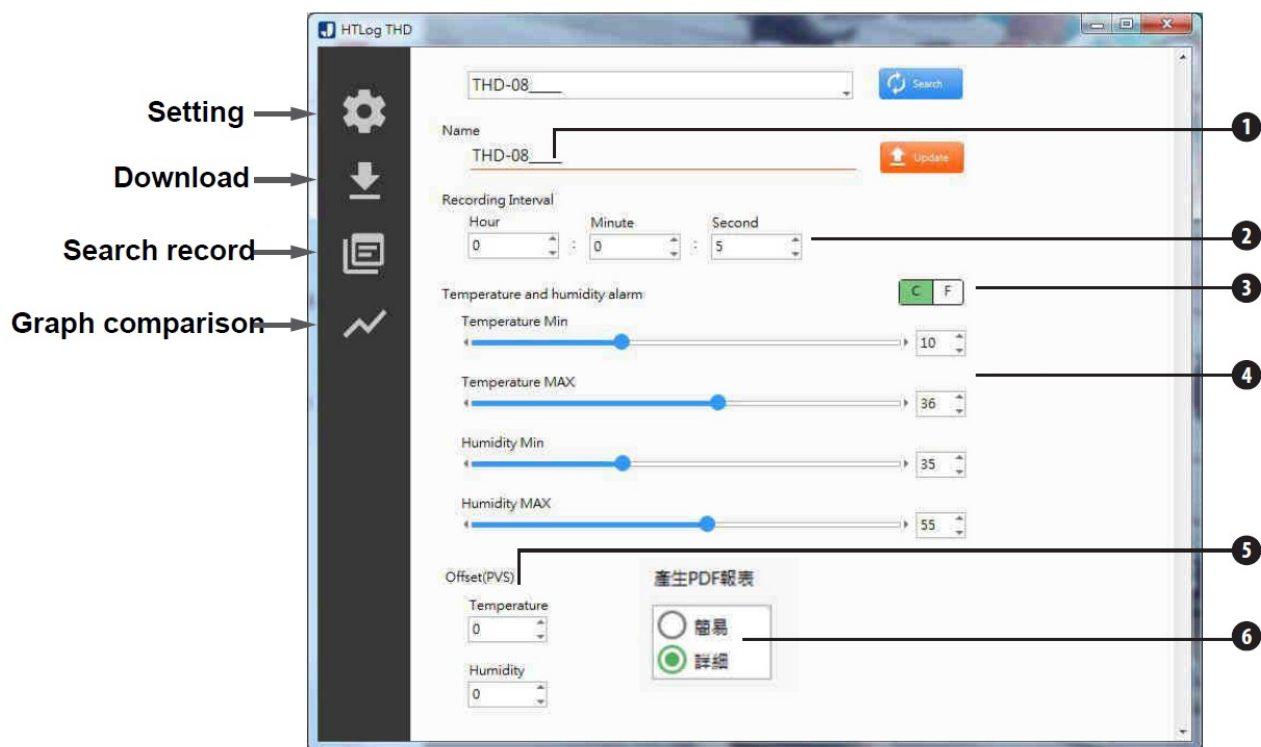

2. After installation, this icon will show on the desktop

Software manual

1. Open software, press , enter into the configuration page

2. Connect datalogger to computer, press  to search the device and load.

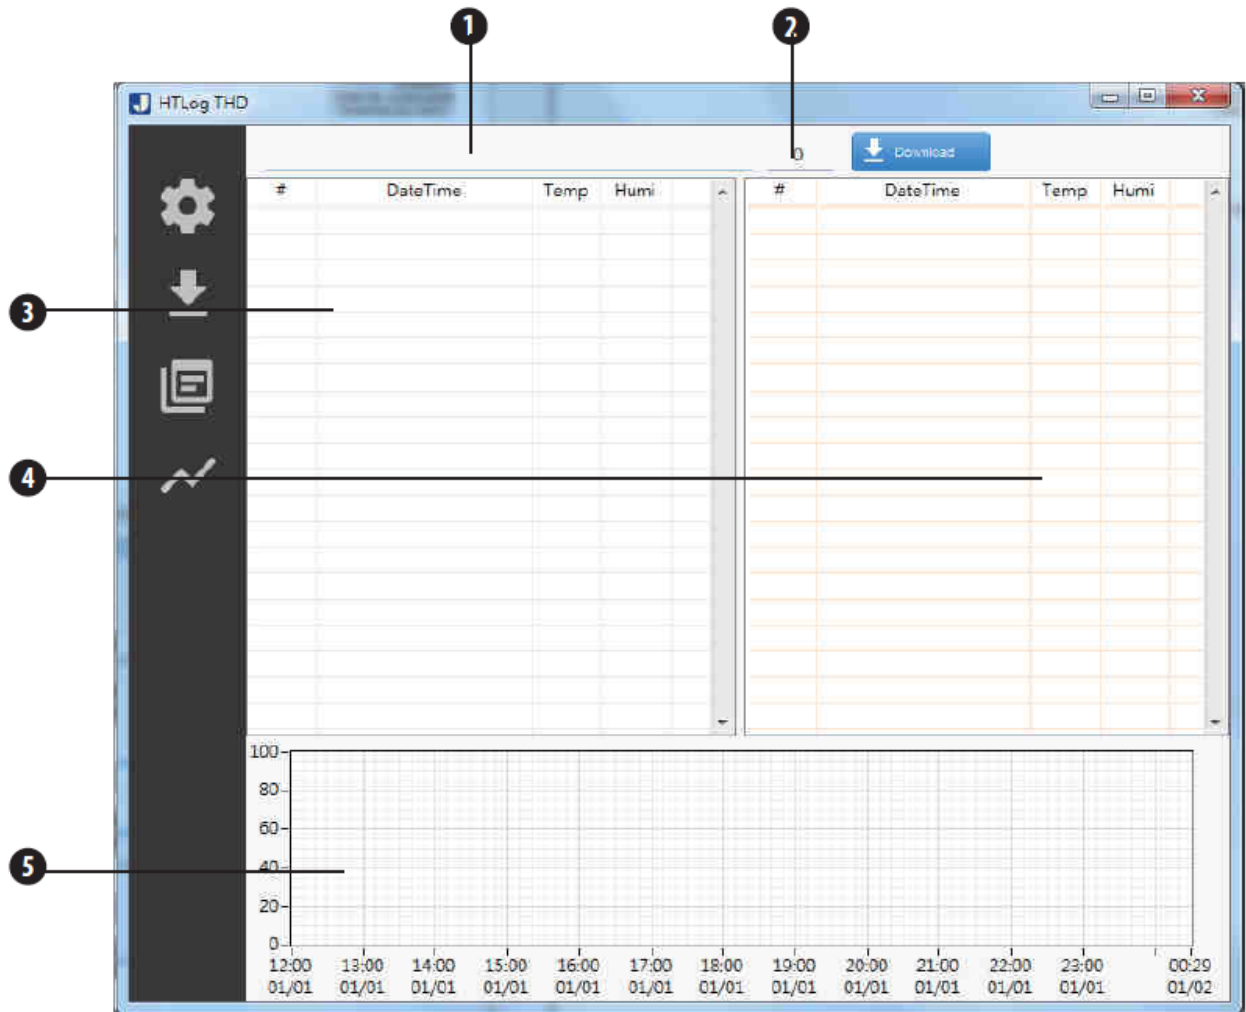

1. Datalogger name, could be revised.
2. Record frequency, Min. 5 second, Max. 24 hours. Temp. Unit°C, °F
3. Temp. alarm range. 20 ~ 80°C (0-110°F)
4. Humi. alarm range. 0~100% rh
5. Temp. correction range ± 5
6. Humi. correction range ± 10
7. PDF report type(if need detail information)

3. Download record

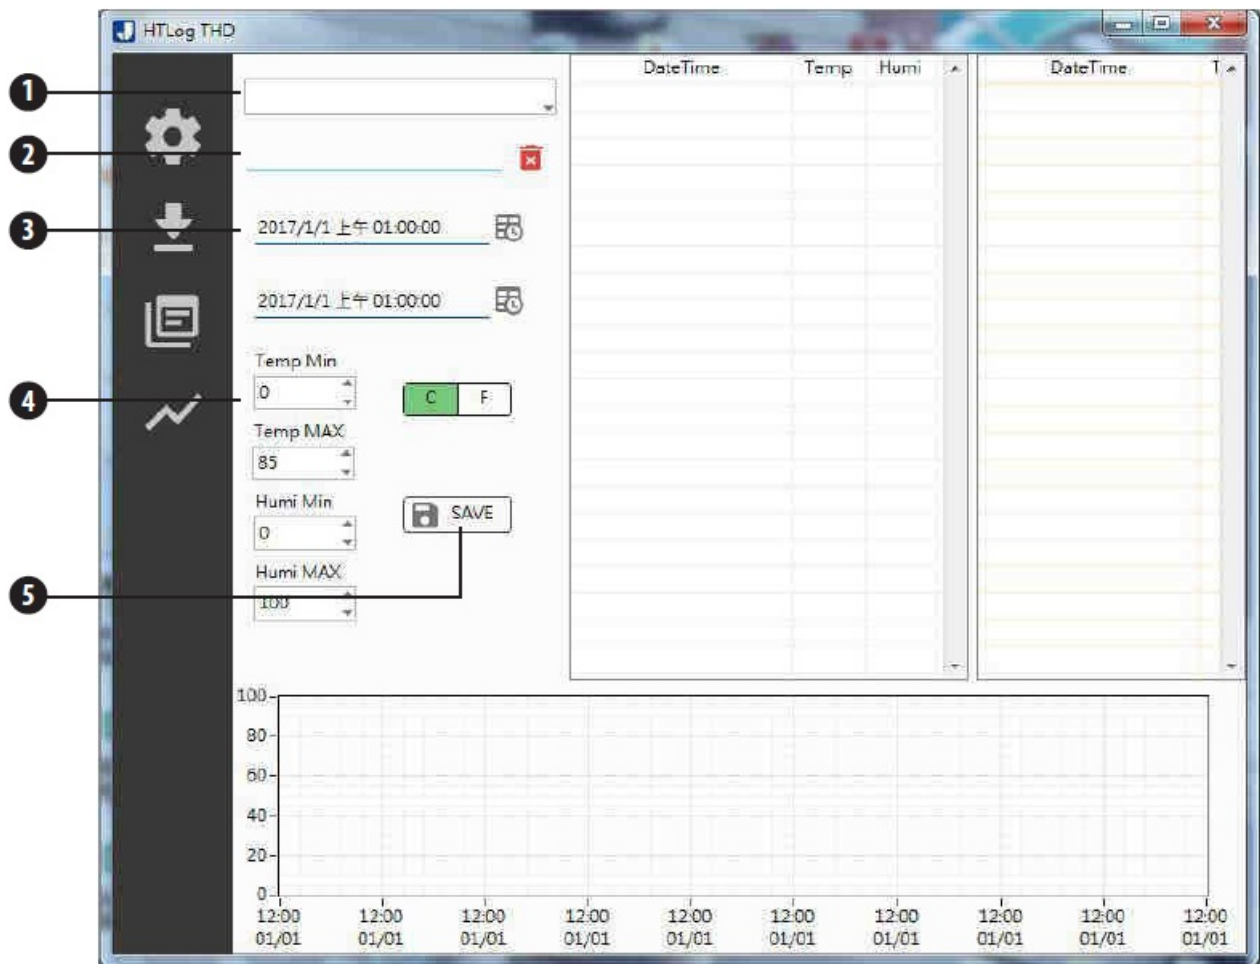

In  page, press  and download the data to software. After loading, data will be saved to database, and can be searched in “Search Record” page.

1. Datalogger name
 2. Number of record
 3. Data of record
 4. Data of alarm record
 5. Graph of Temp. and Humi.
4. Search history record

Press  search downloaded history record and graph.

1. Device name Device will be named by ID+first logging time, if repeat, will add numbers. After selected device, time range will be datalogger recording period, and the latest Time. & Humi. alarm range. The range could be reset, but will not be saved for next review.

2. File name, press  to delete this file. *Noted!The file could't be resumed after deleted.

3. Time period of search.

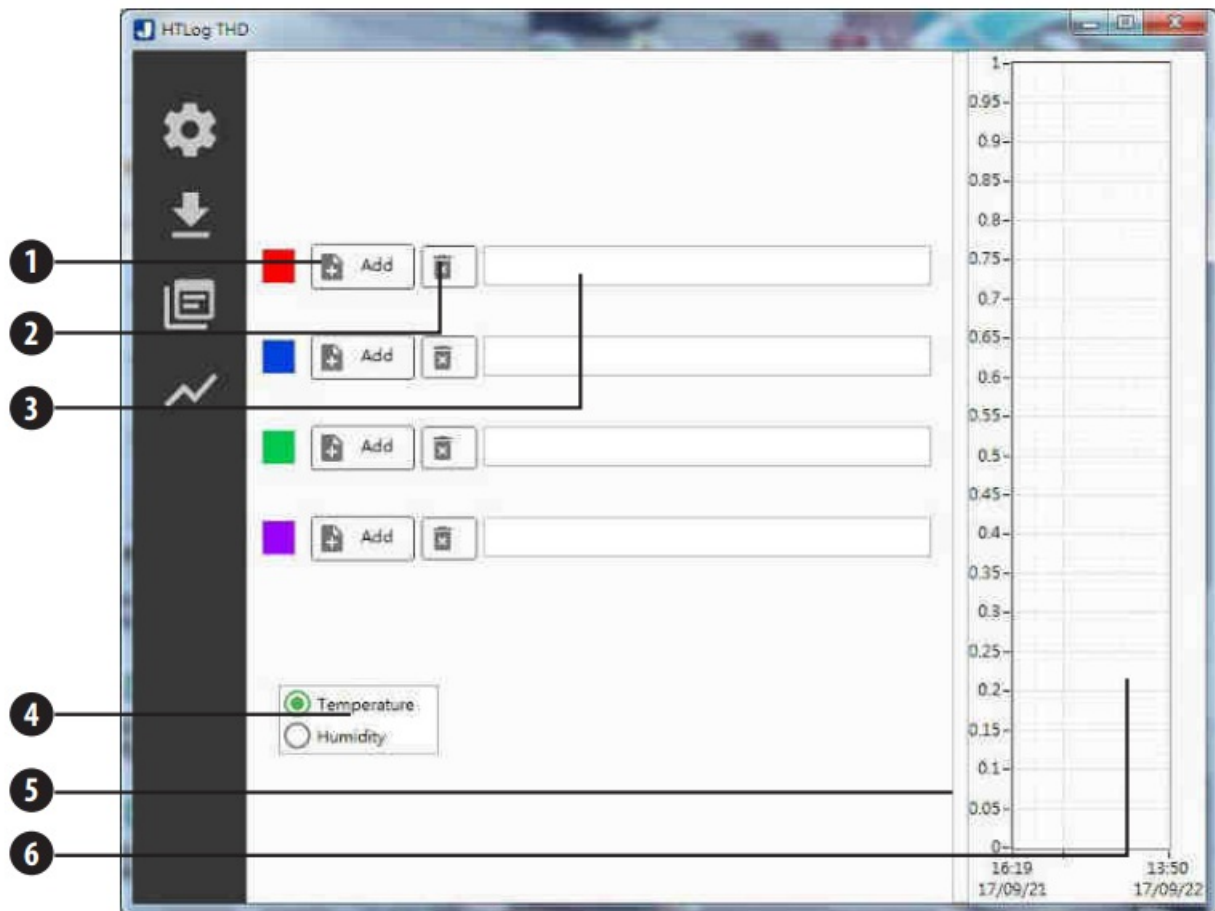

4. Max./Min. Temp.& Humi.and Temp. unit of search.

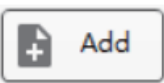

5.  SAVE Save record data(.CSV)

5. Graph Comparison

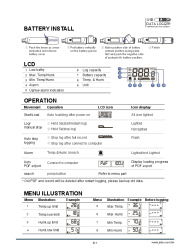

Press  compare four sets of recording graph.

1.  Import file
2.  Delete the selected file.
3.  File name
4. Choose to compare Temp. or Humi.
5. Press this column can extend the graph to full screen.
6. Press this column can extend the graph to full screen.
