A2R-U WiFi Camera

<https://use1upgrade.joaniot.com/cam720/appdownloadpage.html>

Download CAM720 APP from APP store or Google play, or by Scanning the QR code above.
Sign up an account by email and login, please read the instructions carefully before use.

Camera introduction

Note: The reset button position will be different for different models, and the picture is for reference only

Q1:What should I pay attention to before WiFi connection?

Q2:What should I pay attention to before Wired connection?

A2:Ethernet cable:pls check the cable is working and check the indicator of the network port is always on
NOTE: pls confirm the cellphone connected the same wifi of the router that camera connected.

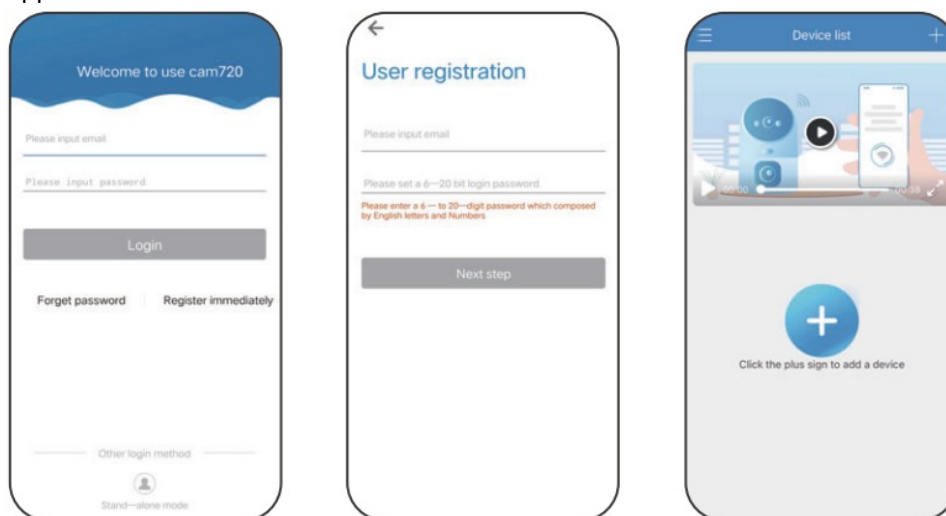

Q3:How to do if the camera is often offline?

A3:Adapter: pls check the adapter and outlet for the camera,or check the camera's record, if there are some broken records, the problem is in power;camera can record without wifi
Network: pls check the network, is it normal
APP permission: pls check mobile network permission on the APP is enable, otherwise, the APP can't work under mobile network.
Reconfigure the camera: delete the camera from the APP> add the camera after reset the camera as the first connection

Sign up & Login

Register an account: Click "Register" > enter your email address, set your APP passcode, check the verification code, and wait for the verification to be completed and then jump directly to the APP list.

Note: if you don't want register an account, it can't remote, but you can use stand alone mode to view the camera. This mode only support Local view.

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
