JOOAN T2R-U Wifi Camera

Camera Introduction

Note: The reset button position will be different for different models, and the picture is for reference only

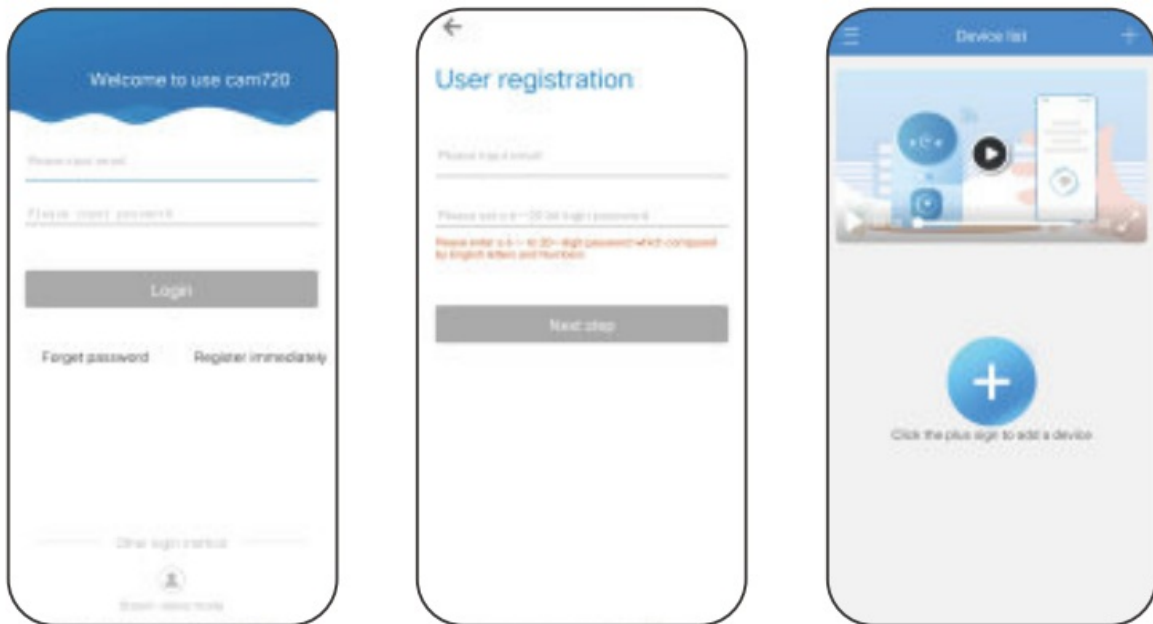

FAQ

- **Q1:**What should I pay attention to before WiFi connection?
- **A1:**APP permission: Pls turn on GPS and all permissions and select"allow": 105 iPhone: pls enable location action by setting> privacy > location services> cam 720 APP>enablepreciselocation, select"always" WiFi requirement: Pls ensure the Name and password ofthe router are not more than 16 characters
Note: pls take the camera near the router for the first connection, cellphone is connected to the same wifi
- **Q2:**What should I pay attention to before a Wired connection?
- **A2:**Ethernet cable: pls check the cable is working and check the indicator of the network port is always on
NOTE: pls confirm the cellphone is connected to the same wifi of the router that the camera is connected to.
- **Q3:**How to do if the camera is often offline?
- **A3:** Adapter: pls check the adapter and outlet for the camera,or check the camera's record, if there are some broken records, the problem is in power; the camera can record without wifi Network: pls check the network,is it normal APP permission: pls check mobile network permission on the APP is enable, otherwise, the APP can't work under mobile network. Reconfigure the camera: delete the camera from the APp> add the camera after resetting the camera as the first connection

Sign up & Login

Register an account: Click "Register" > enter your email address, set your APP passcode, check the verification code, wait for the verification to be completed and then jump directly to the APP list.

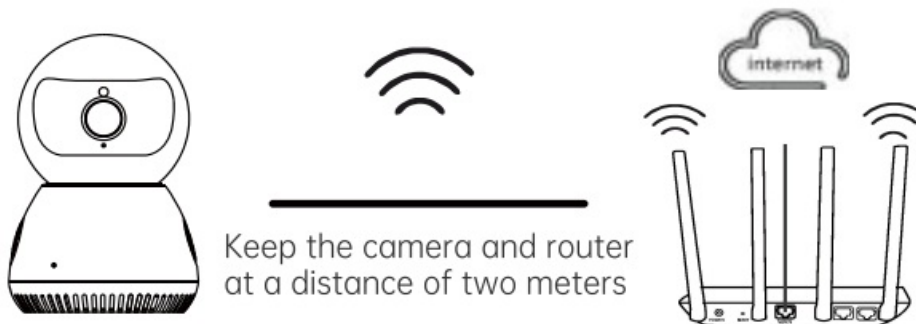

Note: if you don't want to register an account, it can't remote, but you can use stand-alone mode to view the camera. This mode only supports the Local view.

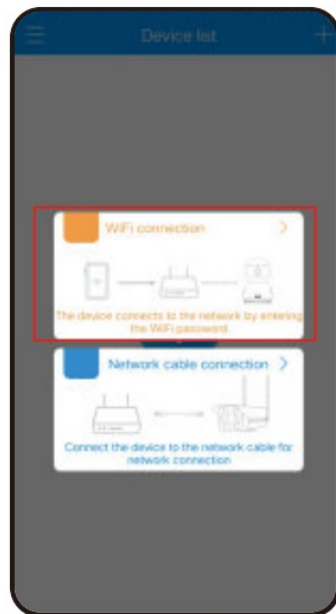

WiFi connection

Power and Reset the camera: Pls plug in the adapter for the camera, Reset the camera by long pressing the reset button for 5 seconds until you hear “Di-“, the camera will do self-inspection after “Di-“2 times Requirement Before WiFi connection: pls read Q1 above: Don’t ban permissions of the APP

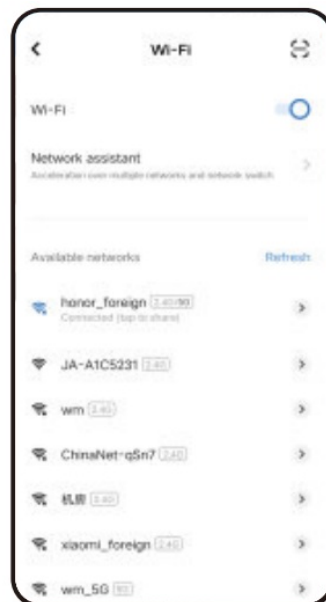

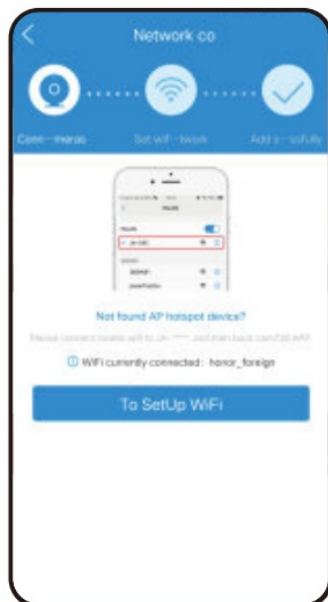

NOTE: some models only support 2.4Ghz WiFi, and cellphones connected to 2.4G WiFi for the first connection; if the camera support 2.4G/5G dual-band WiFi, pls choose the right WiFi according to the place you want to install (2.4Ghz signal transfer distances longer, 5Ghz is shorter but faster in speed).

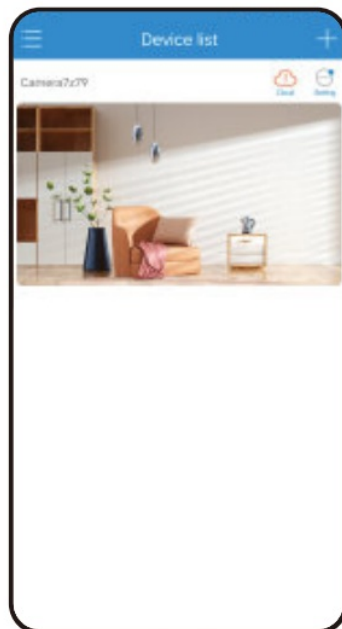

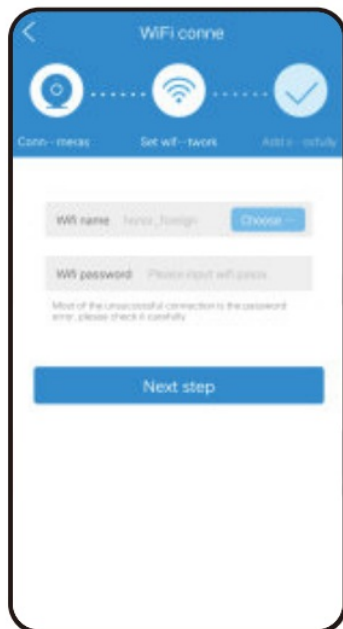

1. In the APP: click”+”> select”WiFi connection”
2. Check “configure the network when you hear the device tone” > Tap” next step”

3. Follow the Tips Shown in the APP(pls connect WiFi to JA-*** or JAA-***, and then back to Cam720 APP)to find the Camera's WiFi(namedJA-** / JAA-***),after connected it pls back to cam720 APP

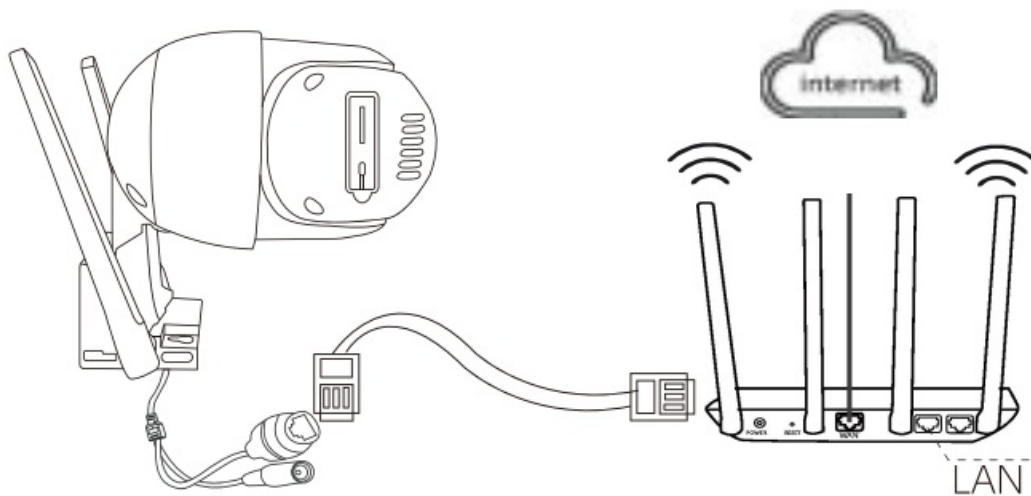

4. Enter the right password for the WiFi that your phone is connected to, Tap"Next Step)
5. When the device is connected, pls wait patiently until camera is online", then click the video to view

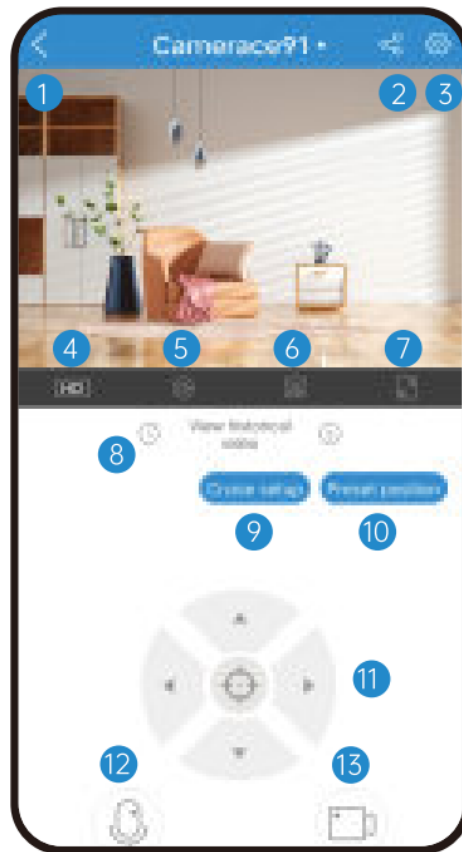

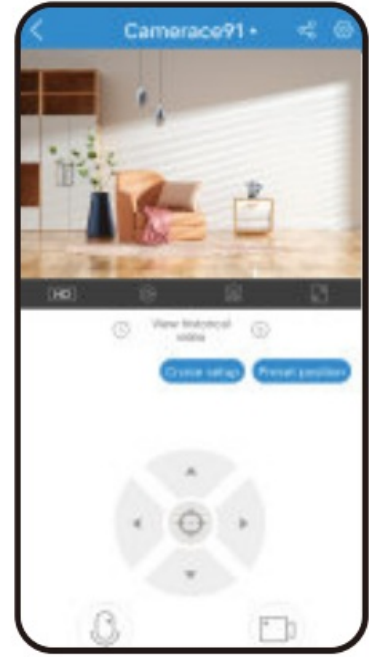

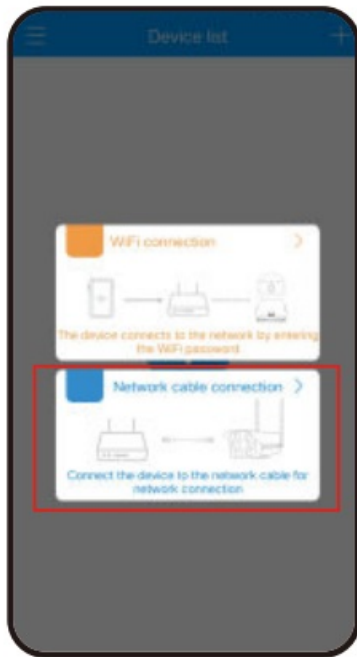

Wired Connection

Plug the power supply and Ethernet cable into the router: Pls plug the adapter for the camera, and connect the camera with the Ethernet cable to the router. Reset the camera: Long-press the reset button about 5-8s until you hear Prompted, and select a wired connection to connect it.

NOTE: pls read Q2 above if there is a problem with the wired connection if the camera has a Network port, it supports wired/WiFi connection, otherwise, pls select a Wi-Fi connection to connect.
