Thank you for using the products produced by our company. Before use, please read this manual carefully and correctly grasp the usage method of this product, in order to fully utilize its superior performance. | believe it will bring convenience and comfort to your and your family's lives.

Precautions for product use

⊘ Prohibition

*To ensure safe use and avoid personal injury and property damage to you or others, please be sure to follow the following safety precautions: Failure to follow safety warnings may lead to accidents when using

This product is prohibited from idle or overloaded operation: the maximum squeezing time for this product is 30 seconds each time, after which the product automatically stops working; If you need to continue squeezing juice, you need to restart the button switch.

When the product is working, it is strictly prohibited to unscrew the cup cover and put hands or other hard objects into the juice cup to prevent accidents.

This product is a fruit juicer and is prohibited from being used for mincing meat and grinding other products such as beans, as it may affect the product's service life.

Do not clean or disinfect the components of this product in dishwashers, disinfection cabinets, microwave ovens, and other cleaning equipment with temperatures exceeding 60 ° C to avoid deformation of the components due to heat.

The juice squeezed by this product should be drunk or stored in time, It is prohibited to store it in a mixing cup for more than 6 hours, otherwise the juice may produce spoilage and odor, which is harmful to human health. Do not use accessories and accessories other than this product. Please do not allow children, people with intellectual disabilities, and people with disabilities to come into contact or use this product.

⚠ Notice

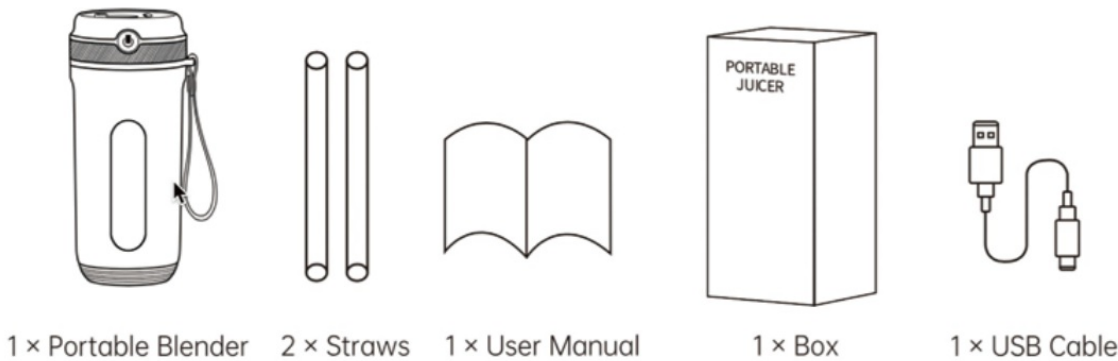

This product drives the DC motor to work through a battery, and the battery can be charged by connecting it to an external power source through a charging cable

Please do not allow children, people with intellectual disabilities, and people with disabilities to come into contact or use this product.

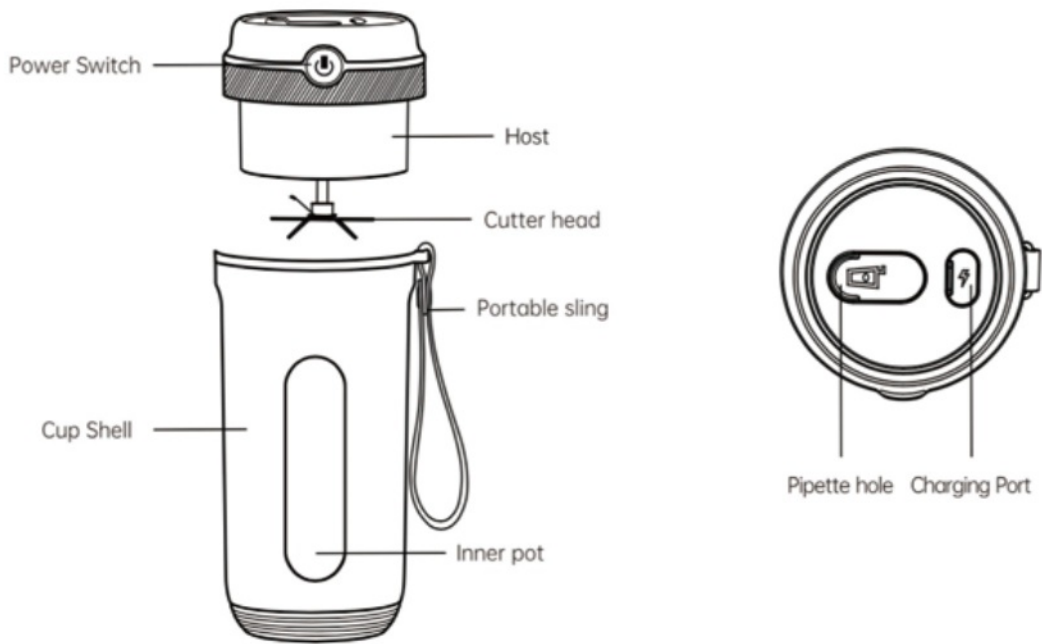

Technical parameter

Model	JS-GZ001	Capacity	350m1
Charging Voltage	5V	Charging current	800mA
Rated power	80W	Rated voltage	7.4V
Battery capacity	1500mAh*2		

What’s Included

Product Part Name

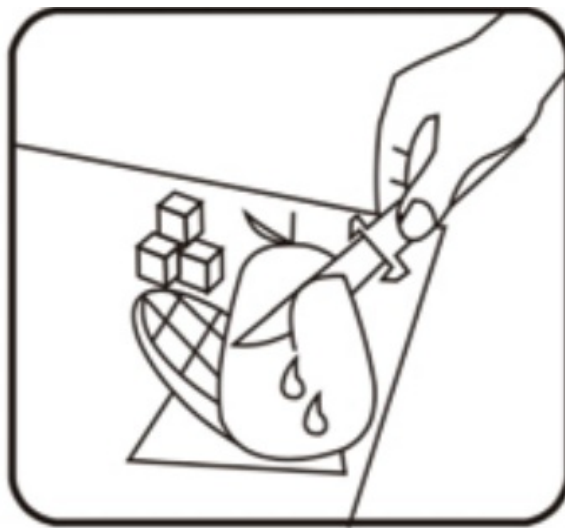

Operation Guide

Operating Instructions

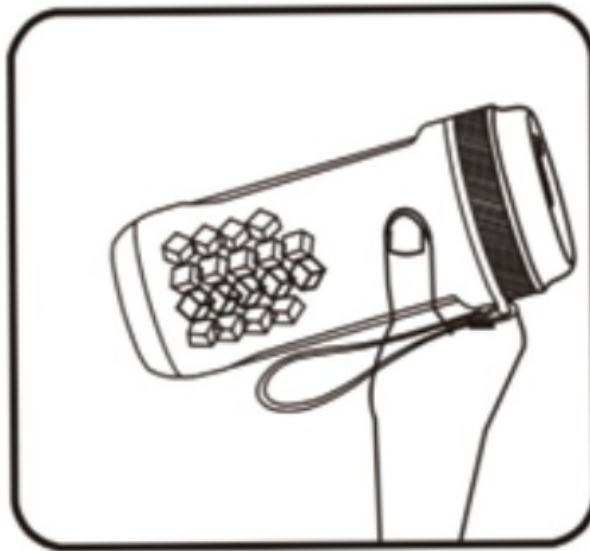

1. Unscrew the mixing cup and cup cover counterclockwise and clean them thoroughly.

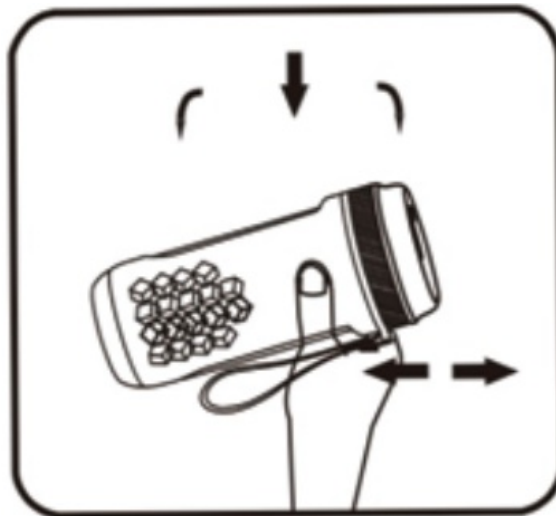

2. Wash, peel, and seed the fruit, and then cut it into small pieces about 10X10X10mm (about the size of a small thumb).

3. Put the cut fruit into a juicer, add appropriate pure water, and then tighten the lid clockwise
 1. The total amount of fruit/water added should not exceed the maximum water level of 300ml (three-quarters of the mixing cup) in the mixing cup, and the water temperature should not exceed 40 ° C.
 2. Hard fruits and vegetables (such as carrots) not exceeding 50g.

4. Double click the start button switch diagonally downwards by about 45 °, and the work indicator light will display in blue. The product will work for a cycle of 30 seconds.

5. Place the juicer horizontally in your hand, and then tilt the main machine back and forth at 15 ° until the juice is made. Shake the entire process back and forth for better mixing effect.

6. After completing the juice extraction, you can pick up the host and drink directly, or you can unscrew the cup lid and pour the drink into a cup for drinking.

Tips:

1. Gently shaking the product during operation will improve the mixing effect.

2. The juicer is equipped with a safety protection device, and the machine cannot be started if the lid is not tightened.
3. If there is jamming with large pieces of food during the juice extraction process, the machine will stop working and can only resume normal operation after being cleaned again.

Charging instructions:

1. Double-click the power button twice, and the indicator light will cycle from blue to red to blue, indicating that the device is out of power.
2. After plugging in the USB power cord, the barrier turns red and stays on, indicating charging.
When the indicator light turns blue and stays on, it means it is fully charged.

Tips:

1. The battery charging time is 4-6 hours, and the charging time may vary slightly depending on the season,
2. Recharge at least once every three months, otherwise using up the original battery power will affect the battery's lifespan.
3. It is necessary to frequently charge and operate lithium-ion batteries.

Maintenance

After using the product, it is recommended to clean it immediately to avoid residual juice spoilage and odor. When cleaning, the following operations can be referred to:

1. Whole machine cleaning:

Add half a cup of clean water to the cup, and add a small amount of detergent if necessary. Then stir according to the method of beating juice for about 30 seconds.

2. Juice cup cleaning:

Turn the juice cup counterclockwise, open it and rinse it under the faucet, or put it in warm water with detergent for cleaning. When cleaning, pay attention to the water temperature not exceeding 40 degrees.

3. Host cleaning:

It is strictly prohibited to directly immerse the host in water for cleaning or rinse with water. When wiping the host, a damp cloth that has been wrung dry can be used to wipe it clean.

The blade is very sharp. It is recommended to use a cleaning brush to clean the blade and be careful of scratches! After cleaning, place the machine and components in a ventilated area to dry, and then assemble them for storage.

This product and components are strictly prohibited from being placed in a high-temperature disinfection cabinet for high-temperature disinfection! Do not soak in boiling water! Otherwise, it may cause serious deformation or damage to the product!

Fault Analysis and Elimination
