JUNO L-Type Track Adapter

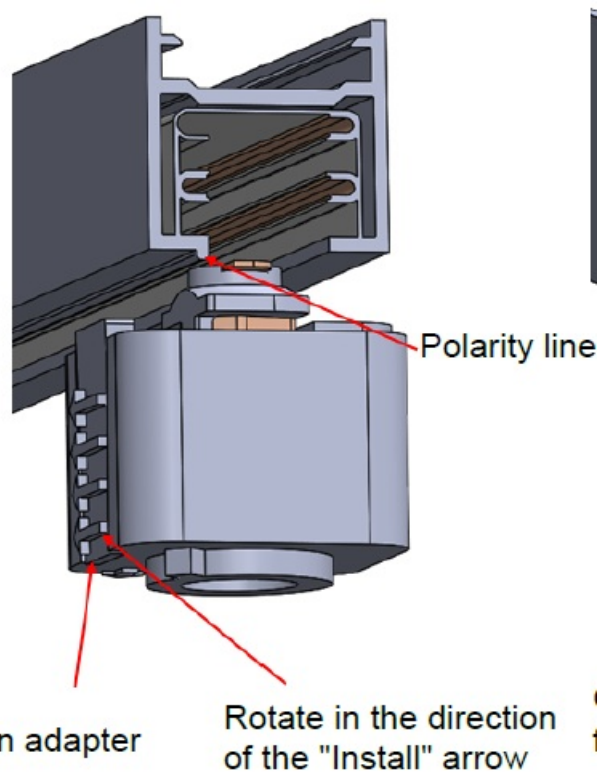

Product Information:

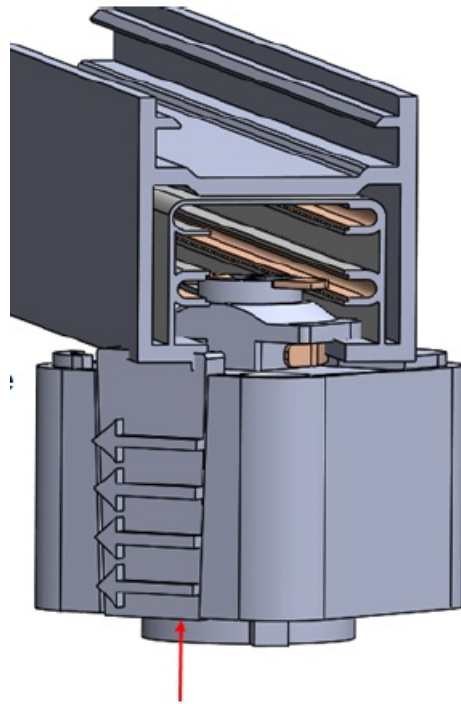

The product is an L-Type Track Adapter option. It is used for installation purposes.

Product Usage Instructions

1. Find the latch and the polarity line.
2. Align the parts as shown below.
3. Insert the adapter box into the track.

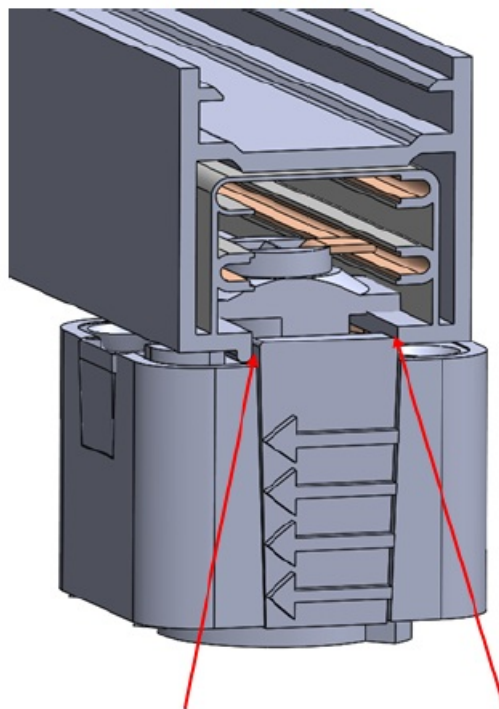

4. Continue to rotate the adapter box until the latch snaps in place between the two track rails.

Continue to depress latch until final position

5. Depress the latch until it reaches the final position.
6. The latch should snap into place between the rails.

Final Position

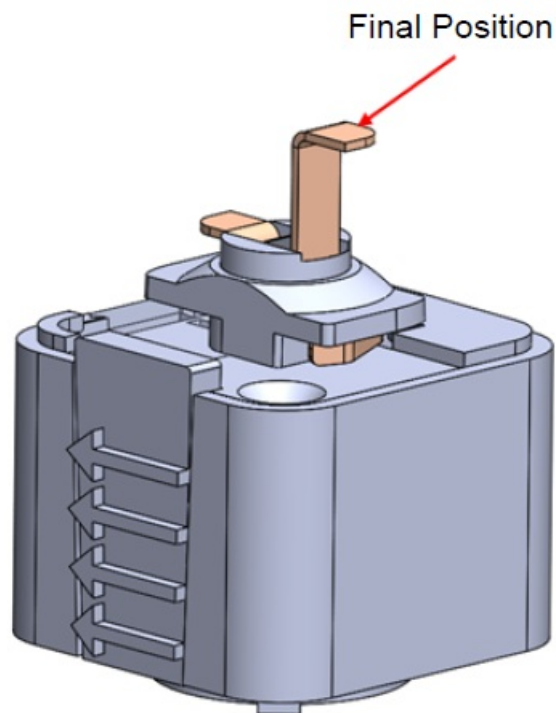

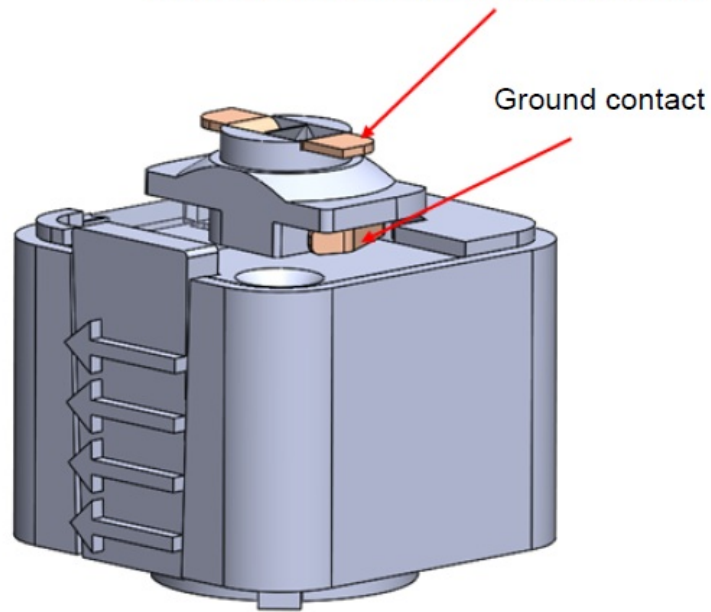

Latch snaps into place between rails

Second Circuit Positioning

1. Hold onto the Adapter Box with one hand.
2. Place the end of a flat head screwdriver under the contact shown below.
3. Gently pull up, and the contact should move vertically until hitting a hard stop.
4. Follow the instructions for inserting into the track.

Note: Find the contact above the ground contact. This is the only contact that is adjustable.
Find contact above the ground contact.
This is the only contact that is adjustable.
