Product Introduction

This USB HUB comes with a USB-A cable and a USB-C cable. This means that it can be used on almost all computers . The 3×USB 3.1 ports provide 10Gbps speed. It is designed for mass data transmission. 4×USB-A 3.0 ports can provide 5Gbps data transfer speed and 3×USB-A Charging ports can provide 5V/2.4A power to charging your phone, tablet and so on. The Ethernet port can provide 1000Mbps stable wired network connection. Connect with 12V/5A DC power adapter to make sure all devices can work at the same time.

Structure Diagram

- 1. USB-C 3.1 10Gbps
- 2. USB-A 3.1 10Gbps
- 3. USB-A 3.0 5Gbps
- 4. USB Charging-Only Ports
- 5. Gigabit Ethernet
- 6. USB Power Switch
- 7. USB Power Indicator
- 8. USB Host Port
- 9. DC Power Supply Port

Product Specification

- 1. USB-A cable length: 40 inches; USB-C cable length: 40 inches, Suitable for both USB-A and USB-C computers.
- 2. 3×USB 3.1 10Gbps ports and 4×USB 3.0 5Gbps ports, Max output 5V/0.9A.
- 3. 3×individual charging ports, each can provide 5V/2.4A power. Without data transmission function.
- 4. Integrated 10/100/1000M network interface.
- 5. Power supply: DC 12V/5A, ensure that all USB ports can connect device at the same time.
- 6. No drive need Plug and play. 7. Supported Systems: Windows 11,10,8,7,Vista, XP, Mac OS 10.6-10.12 or later, Linux 2.6.14 or later, android

Package Contents

- Powered Universal USB HUB×1
- USB-A data cable ×1
- USB-C data cable ×1
 12V/5A DC Power adapter×1
- User Manual×1

Note:

1. Press the switch and the connected equipment starts working immediately. However, to prevent the devices

- from being disconnected abnormally due to accidental press, it is necessary to press and hold the switch for 1s thentheequipment will disconnect.
- 2. When connecting a wireless mouse or keyboard it mayn't work properly Most wireless device like mouse, keyboard, and Bluetooth device work in the 2.4Ghz wireless band. When connecting the receiver to any USB 3.0 Port, there is potential for interference that can affect the device's performance. The most effective method is to add a USB 2.0 extension cable between the HUB and the receiver that is why many wireless mouse and keyboard comes with such actable.
- 3. USB-A 3.1,USB-A3.0 and USB-C3.1 are not recommended to charge phones, tablets, etc., because the power only output 5V/0.9A, and the charging speed will be slow. 3 USB-A charging ports can only charge, not support data transfer.
